# FEELNEEDY FN-W06 Cat Water Fountain Filter Instruction Manual

Model: FN-W06

## 1. INTRODUCTION

---

This manual provides instructions for the proper use and maintenance of the FEELNEEDY FN-W06 Cat Water Fountain Filters. These filters are designed to ensure clean and fresh drinking water for your pet by effectively removing impurities.

Image 1.1: Overview of FEELNEEDY FN-W06 filters and compatible pet water fountains.

## 2. PRODUCT FEATURES

The FEELNEEDY FN-W06 filter system incorporates a 3-layer filtration process to provide optimal water quality:

- **High-Density Cotton:** This layer effectively filters out large particles, pet hair, and other visible debris from the water.
- **Ion Exchange Resin:** Designed to soften water by reducing calcium and magnesium ions, and removing heavy metal ions.
- **Coconut Shell Activated Carbon:** This component absorbs residual chlorine, unpleasant odors, and other organic impurities, improving water taste and freshness.

# Compatible FeelNeedy Fountains 3.5 Liter

FN-W08 /W08L

### 3. COMPATIBILITY

These replacement filters are specifically designed for use with the **FEELNEEDY FN-W06 Cat Water Fountain** (108 fl oz/3.2L model).

**Important:** Please verify the dimensions of your existing filter or fountain's filter slot to ensure proper fit. The filter has an approximate diameter of 9 cm.

# Compatible with FEELNEEDY 3.2L Pet Water Fountains

(FN-W06)

Note: Please choose official feelneedy filters as others may not be of the right size or material.

## 4. SETUP AND INSTALLATION

Follow these steps to install or replace your FEELNEEDY FN-W06 filter:

1. **Prepare the Filter:** Before first use or replacement, soak the new filter in clean water for 5 minutes. Thoroughly rinse it under running water to remove any loose carbon particles. This prevents carbon dust from entering the fountain water.

Image 4.1: Soaking the filter for 5 minutes as part of the preparation process.

- 2. Assemble the Filter Shell:** The filter comes with a reusable snap-on shell. Place the filter pad securely into the shell, ensuring it is properly seated.

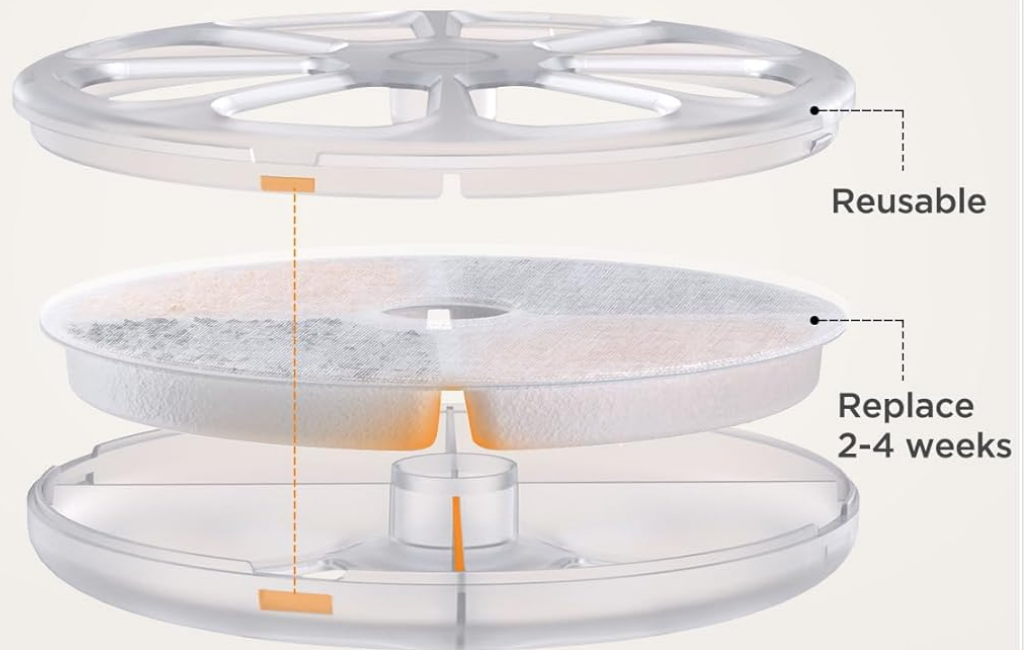

# PURIFY IN EVERY DROP

Keep the water clean and fresh

## Snap-on Filter Shell

## Install completed

For environmental protection, there is ONE shell for each pack of filters.

Image 4.3: The filter pad correctly positioned within its shell.

- Place the Filter:** Position the assembled filter onto the designated filter tray or top cover of your FEELNEEDY FN-W06 cat water fountain. Ensure it sits securely and flat.

Image 4.4: Placing the prepared filter onto the fountain's top cover.

4. **Fill the Fountain:** Fill the water fountain with clean water to the appropriate level, ensuring the pump is fully submerged. Refer to your fountain's manual for specific water level indicators.

## 5. MAINTENANCE

### 5.1 Filter Replacement Frequency

For optimal filtration performance and to maintain water quality, it is recommended to replace the FEELNEEDY FN-W06 filter every **2 to 4 weeks**. This frequency may need to be increased if you have multiple pets, if the water quality in your area is poor, or if you observe a noticeable reduction in water flow or clarity.

### 5.2 Fountain Cleaning

In addition to regular filter replacement, it is crucial to clean the entire water fountain system regularly. This includes the water reservoir, trays, and the pump. Refer to your specific FEELNEEDY FN-W06 fountain's instruction manual for detailed cleaning procedures to prevent mineral buildup and bacterial growth.

## 6. SPECIFICATIONS

<b>Brand</b>	FEELNEEDY
<b>Model</b>	FN-W06 (Filter)
<b>Material</b>	High-Density Cotton, Ion Exchange Resin, Coconut Shell Activated Carbon
<b>Dimensions (Individual Filter)</b>	Approx. 9.7 x 9.7 x 1.5 cm (or 9 cm diameter)
<b>Weight (Individual Filter)</b>	Approx. 0.05 Kilograms

## 7. TROUBLESHOOTING

### 7.1 Filter Does Not Fit

If the filter does not fit your fountain, please double-check your fountain's model number. These filters are specifically designed for the FEELNEEDY FN-W06 model. Verify the dimensions of your fountain's filter slot against the filter's stated dimensions (approximately 9.7 x 9.7 x 1.5 cm or 9 cm diameter as shown in visuals).

### 7.2 Reduced Water Flow

If you observe reduced water flow from your fountain, ensure the filter is not clogged. Rinse the filter thoroughly or replace it if it has reached the end of its recommended lifespan (2-4 weeks). Additionally, inspect the fountain pump for any blockages or debris that might be impeding water circulation.

## 8. WARRANTY AND SUPPORT

For warranty information, technical support, or any inquiries regarding your FEELNEEDY FN-W06 Cat Water Fountain Filters, please contact FEELNEEDY customer service directly. Refer to the product packaging or the official FEELNEEDY website for the most current contact details.
