5. SETUP

5.1 Initial Charging

1. Before first use, fully charge the clipper for approximately 3 hours.
2. Connect the power adapter to the charging stand.
3. Place the clipper onto the charging stand, ensuring proper contact. The indicator light will show charging status.
4. Once fully charged, disconnect the adapter.

5.2 Attaching Guide Combs

1. Ensure the clipper is turned off before attaching or removing guide combs.
2. Select the desired guide comb length (e.g., 1.5mm, 3mm, 4.5mm, 6mm, 10mm, 13mm).

3. Align the comb with the clipper blade and push it firmly until it clicks into place.
4. To remove, gently pull the comb away from the blade.

6. OPERATING INSTRUCTIONS

6.1 Turning On/Off

Locate the power switch on the clipper body. Slide it to the 'ON' position to start the clipper and to the 'OFF' position to turn it off.

6.2 Adjusting Blade Length

The clipper features 5 levels of adjustable blades. Use the taper lever on the side of the clipper to adjust the cutting length without a guide comb, allowing for fine-tuning and blending.

6.3 Hair Cutting Techniques

1. Ensure hair is clean and dry before cutting.
2. Attach the desired guide comb for the initial cut length.
3. Hold the clipper with the blade teeth pointing upwards and flat against the head.
4. Move the clipper slowly against the direction of hair growth.
5. For blending and fading, use shorter guide combs or adjust the taper lever.
6. Regularly clear cut hair from the blades during use to maintain performance.

Trim your hair to your desired length

Trim your beard to your desired length

7. MAINTENANCE

7.1 Cleaning the Blades

1. Turn off the clipper and disconnect it from the power source.
2. Remove any attached guide comb.
3. Use the provided cleaning brush to remove loose hair from the blades and the clipper body.
4. For a more thorough clean, the blades can be carefully detached (refer to specific instructions if provided with your model for blade removal).

7.2 Oiling the Blades

1. After cleaning, apply 1-2 drops of the provided lubricating oil across the top of the blades.

- 2. Turn the clipper on for a few seconds to allow the oil to distribute evenly.
- 3. Wipe off any excess oil with a soft cloth.
- 4. Oiling regularly (after every few uses) helps maintain blade sharpness and smooth operation.

7.3 Storage

Store the clipper in a cool, dry place, away from direct sunlight and moisture. Ensure the clipper is clean and oiled before storing for extended periods.

8. TROUBLESHOOTING

Problem	Possible Cause	Solution
Clipper does not turn on.	Battery is depleted.	Charge the clipper fully.
Clipper pulls hair or cuts poorly.	Blades are dull, dirty, or not oiled.	Clean and oil the blades. If blades are dull, consider professional sharpening or replacement.
Clipper makes unusual noise.	Blades are misaligned or internal issue.	Ensure blades are properly aligned. If noise persists, contact customer support.
Clipper overheats.	Extended continuous use or blocked ventilation.	Allow the clipper to cool down. Ensure ventilation ports are clear.

9. SPECIFICATIONS

Feature	Detail
