## ASSEMBLY INSTRUCTIONS

Assembly is designed to be straightforward. It is recommended to assemble the bed frame with two people. Do not fully tighten bolts until all components are in place.

### Step 1: Unpack and Identify Parts

Carefully remove all components from the packaging. Lay them out on a clean, soft surface to prevent scratches. Identify each part using the provided parts list.

### **Step 3: Install Center Support Beam and Legs**

Attach the center support beam to the designated brackets on the headboard and footboard. Secure the support legs to the center beam and side rails. Ensure all legs are firmly on the ground.

### **Step 4: Place Wooden Slats**

Lay the wooden slats across the bed frame. The slats feature a Velcro design for quick installation and to prevent movement and noise. Ensure all slats are evenly spaced and securely attached.

### Step 5: Final Tightening

Once all components are in place and aligned, fully tighten all bolts using the provided Allen wrench. Do not overtighten.

## OPERATING INSTRUCTIONS

---

### Mattress Placement

Place your mattress directly onto the wooden slats. No box spring is needed for this bed frame. The sturdy wooden slats provide ample support for various mattress types, including latex, memory foam, or spring mattresses.

### Adjusting Headboard Height

The headboard is height-adjustable to accommodate different mattress thicknesses. To adjust, loosen the bolts connecting the headboard to the side rails, slide the headboard to your desired height (between 41.7 and 47.7 inches), and then re-tighten the bolts securely.

## MAINTENANCE AND CARE

To ensure the longevity and appearance of your VECELO bed frame, follow these care instructions:

- **Cleaning:** The upholstered parts of the bed frame should be dry cleaned only. For minor spills, gently blot with a clean, dry cloth. Avoid using harsh chemicals or abrasive cleaners.
- **Regular Inspection:** Periodically check all bolts and connections to ensure they remain tight. Re-tighten if necessary to maintain stability and prevent squeaking.
- **Weight Distribution:** Distribute weight evenly across the bed frame to prevent undue stress on any single point.
- **Moving the Bed:** When moving the bed frame, lift it rather than dragging it to prevent damage to the legs and frame structure.

## TROUBLESHOOTING

Problem	Possible Cause	Solution
Bed frame is squeaking.	Loose bolts or uneven slat placement.	Ensure all bolts are fully tightened. Check that wooden slats are properly seated and evenly distributed. The Velcro design should minimize noise.

Problem	Possible Cause	Solution
Bed frame feels unstable.	Incomplete assembly or loose connections.	Re-check all connections, especially where side rails meet the headboard/footboard and the center support beam. Ensure all support legs are making firm contact with the floor.
Headboard is not at desired height.	Incorrect adjustment.	Loosen headboard bolts, adjust to one of the pre-drilled height settings, and re-tighten securely.
Missing parts.	Packaging error.	Contact VECELO customer service immediately with your model number and a description of the missing part.
