FVOAI Fruit Fly Trap for Indoors (Model 240117) - Instruction Manual

INTRODUCTION

The FVOAI Indoor Fly Trap is designed to provide an effective and safe solution for controlling flying insects within your home. This device utilizes a combination of insect-attracting light and a powerful suction system to capture fruit flies, mosquitoes, gnats, small moths, and other bugs. It features time setting options for convenient daily use and a discreet design that blends into various indoor environments. This manual provides detailed instructions for the proper setup, operation, maintenance, and troubleshooting of your FVOAI Fruit Fly Trap.

KEY FEATURES

- **Powerful Indoor Pest Control:** Effectively traps flies, fruit flies, gnats, and other flying insects using sticky glue boards.
- **Strong Suction:** Equipped with bug lights emitting 365-395NM wavelength light, strongly attractive to insects, combined with powerful suction to draw them onto the sticky board.
- **Time Setting Option:** Offers continuous operation or 6/12-hour timer functions for convenient daily use.
- **Widely Applicable and Low Noise:** Utilizes physical mosquito control, ensuring safe and quiet operation. Suitable for homes, kitchens, living rooms, restaurants, and other indoor areas.
- **Excellent and Stylish Design:** Compact design that integrates seamlessly with home decor without compromising aesthetics.
- **Easy to Clean:** Features a bottom tray for easy removal and replacement of sticky glue boards. Comes with 10 replacement boards.

SETUP INSTRUCTIONS

1. **Unboxing:** Carefully remove the FVOAI Fruit Fly Trap and all accessories from its packaging. Ensure you have the main unit, USB cable, power adapter, and sticky glue boards.
2. **Insert Sticky Board:** Locate the bottom tray of the trap. Gently open it by pressing the designated release button or sliding mechanism. Peel off the protective cover from one of the sticky glue boards and place it

securely into the bottom of the trap. Close the tray until it clicks into place.

3. **Connect Power:** Plug the USB cable into the trap and then into the provided power adapter. Plug the adapter into a standard electrical outlet.
4. **Placement:** Position the trap in an area where flying insects are most prevalent, such as near fruit bowls, trash cans, indoor plants, or in the kitchen. For optimal effectiveness, place the trap in a dark environment or run it at night, as the UV light is more attractive to insects in low light conditions.

Power Suction for Effectively Attract Insects

OPERATING INSTRUCTIONS

1. **Power On/Off:** Press the power button once to turn the device on for continuous operation.
2. **Set Timer:**
 - Press the power button a second time for the 6-hour timer mode.

- Press the power button a third time for the 12-hour timer mode.
- Press the power button a fourth time to turn the device off.

3. **Optimal Usage:** For best results, operate the trap in a dark room. The UV light is most effective at attracting insects when there are no competing light sources. Consider adding attractants like apple cider vinegar to a small dish near the trap to enhance its bug-catching power.

MAINTENANCE

1. **Replacing Sticky Glue Boards:** When the sticky board is full of insects, or after approximately 2-4 weeks of use, it's time to replace it. Open the bottom tray as described in the setup section. Carefully remove the used sticky board and dispose of it. Insert a new sticky board, ensuring the protective cover is removed, and close the tray.
2. **Cleaning:** Periodically clean the exterior of the trap with a soft, dry cloth. If dust accumulates in the suction area, gently wipe it away. The design allows for easy access to clean the fan area if necessary.

Capture Effectively

With fruit flies, mosquitoes, gnats,
and small bugs

TROUBLESHOOTING

- **Device Not Turning On:** Ensure the USB cable is securely connected to both the trap and the power adapter, and that the adapter is firmly plugged into a working electrical outlet.
- **Not Catching Enough Insects:**
 - Verify the trap is placed in a dark area, especially during peak insect activity times.
 - Relocate the trap to an area with higher insect presence (e.g., near fruit, plants, or trash).
 - Consider adding a small amount of apple cider vinegar or fruit juice in a separate, shallow dish near the trap to act as an additional attractant.
 - Check if the sticky board needs replacement.

- **Unusual Noise:** Ensure the device is placed on a flat, stable surface. Check for any obstructions around the fan or in the bottom tray.

SPECIFICATIONS

- **Brand:** FVOAI
- **Model Number:** 240117
- **Material:** ABS Plastic
- **Product Dimensions:** 5.3"L x 4.8"W x 5.8"H
- **Item Weight:** 1.3 Pounds
- **Power Source:** Electric (USB cable and adapter included)
- **Light Wavelength:** 365-395NM (UV light)
- **Timer Settings:** Continuous, 6 hours, 12 hours
- **Included Accessories:** 10 Sticky Glue Boards
- **Target Species:** Fruit flies, gnats, mosquitoes, small moths, bugs

SAFETY INFORMATION

- Keep out of reach of children and pets.
- Do not insert fingers or foreign objects into the device while it is operating.
- Do not expose the device to water or excessive moisture.
- Unplug the device before cleaning or replacing sticky boards.
- Use only the provided power adapter and USB cable.
