- **Device Not Turning On:** Ensure the battery is charged. Connect the charger and wait a few minutes before attempting to power on again. If unresponsive, try holding the Power button for 10-15 seconds.
- **Network Connectivity Issues:** Check if your SIM card is properly inserted. Restart the phone. Verify that mobile data is enabled in settings. If issues persist, contact your carrier.
- **Camera Not Working:** Close and reopen the camera app. Restart the phone. Check app permissions for the camera. If the issue persists after these steps, it may indicate a hardware problem requiring professional service.
- **Apps Crashing/Freezing:** Clear the app's cache and data in Settings > Apps. If the problem

continues, uninstall and reinstall the app. Ensure your phone's software is up to date.

5.2. Factory Reset
