## TROUBLESHOOTING

This section addresses common issues you might encounter with your vanity. For problems not listed here, please contact customer support.

Problem	Possible Cause	Solution
Drawers do not close completely.	Obstruction in the drawer slide or behind the drawer; misalignment.	Check for any items blocking the drawer. Ensure the drawer is properly seated on its slides. If the back of the drawer hits the sink, minor adjustments may be needed (consult a professional if unsure).
Cabinet doors squeak or are hard to open/close.	Hinges may need lubrication or adjustment.	Apply a small amount of silicone lubricant to the hinges. Check hinge screws for tightness and adjust if necessary to ensure proper alignment.
Water spots or stains on countertop/sink.	Hard water deposits or residue from products.	Clean regularly with a mild, non-abrasive cleaner. For stubborn spots, use a cleaner specifically designed for marble or ceramic, following product instructions. Dry surfaces thoroughly after use.
Vanity appears unstable or wobbly.	Not properly leveled or secured to the wall.	Ensure the vanity is level using a spirit level. Verify that the vanity is securely fastened to the wall studs or appropriate anchors.

## SAFETY INFORMATION

Please observe the following safety precautions:

- Keep fingers away from door and drawer closures to prevent pinching.
- Always secure the cabinet to the wall to prevent tipping, especially in households with children or pets.
- Do not climb or sit on the vanity.
- Avoid overloading drawers and shelves to maintain stability and prevent damage.
