SETUP GUIDE

Follow these steps to set up your Prolink DL-7202 Mobile Wi-Fi device:
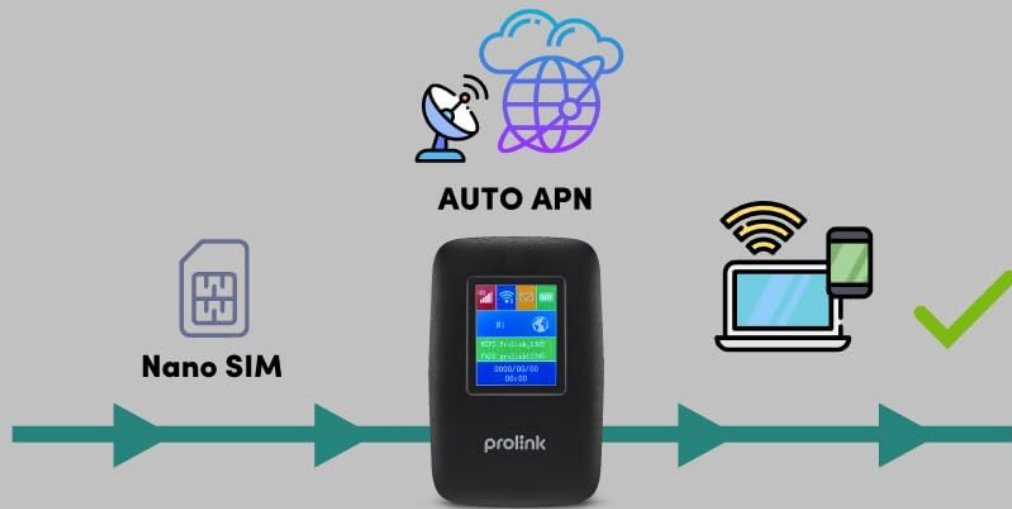

1. **Insert SIM Card:** Open the back cover of the device. Insert a Nano SIM card into the designated SIM card slot. Ensure it is correctly oriented.

2. **Insert Battery:** Place the detachable battery into its compartment.

3. **Power On:** Close the back cover. Press and hold the power button until the device powers on and the display lights up.

4. **Automatic APN:** The device features Auto APN, which automatically determines and selects the correct APN info based on the inserted SIM card, supporting up to 185 countries worldwide.

5. **Connect Devices:** Once powered on, the device will create a Wi-Fi hotspot. Look for the Wi-Fi network name (SSID) and password displayed on the device's screen or on a label inside the battery compartment. Connect your Wi-Fi enabled devices (smartphones, tablets, laptops) to this network.

OPERATION

Operating your Prolink DL-7202 Mobile Wi-Fi device is straightforward:

- **Wi-Fi Hotspot:** The device functions as a portable Wi-Fi hotspot, allowing up to 16 devices to connect simultaneously. The Wi-Fi network name (SSID) and password are displayed on the device's screen.

- **Web-GUI Functionality:** For advanced settings and management, access the device's web-based Graphical User Interface (Web-GUI). This allows for network configuration, file sharing from an inserted microSD card (not included), and sending/receiving SMS messages. Refer to the device's display for the IP address to access the Web-GUI.

- **Battery Life:** The 3000mAh battery provides up to 12 hours of continuous usage. Monitor the battery level on the device's display.

- **App Support:** For compatible models (P/N: LTE-DL7202-D, S/N starting from "230801"), download the mProMifi app from the App Store or Google Play for convenient management and monitoring of your device.

MAINTENANCE

To ensure the longevity and optimal performance of your Prolink DL-7202 Mobile Wi-Fi device, follow these maintenance guidelines:

- **Cleaning:** Use a soft, dry cloth to clean the exterior of the device. Avoid using liquid cleaners or abrasive materials.
- **Storage:** Store the device in a cool, dry place away from direct sunlight, extreme temperatures, and high humidity.
- **Battery Care:** For optimal battery life, avoid fully discharging the battery frequently. If storing for extended periods, charge the battery to about 50% and recharge every few months.
- **Avoid Drops and Impacts:** Handle the device with care to prevent physical damage.

TROUBLESHOOTING

If you encounter issues with your Prolink DL-7202, try the following troubleshooting steps:

- **No Network Signal:**

    - Ensure the SIM card is correctly inserted.
    - Check if your SIM card has an active data plan.
    - Move to an area with better network coverage.
    - Restart the device.

- **Cannot Connect to Wi-Fi:**

    - Verify the Wi-Fi password (SSID and password are on the device screen or under the battery).
    - Ensure Wi-Fi is enabled on your connecting device.
    - Restart both the DL-7202 and your connecting device.
    - Check if the maximum number of connected users (16) has been reached.

- **Slow Internet Speed:**

    - Check network signal strength on the device display.
    - Reduce the number of connected devices.
    - Ensure no background applications are consuming excessive bandwidth on connected devices.

- **Device Not Powering On:**

    - Ensure the battery is charged. Connect the device to a power source using the provided USB Type-C cable.
    - Check if the battery is properly inserted.
