Lehwey B0CSP5KL67

Lehwey Portable Car Stereo User Manual

Model: B0CSP5KL67

1. PRODUCT OVERVIEW

The Lehwey Portable Car Stereo is a versatile 7-inch IPS touch screen device designed to bring modern connectivity to any vehicle. It supports wireless Apple CarPlay and Android Auto, allowing seamless integration with your smartphone for navigation, communication, and entertainment. With Bluetooth 5.2, hands-free calling, and multiple audio output options, this stereo enhances your driving experience safely and conveniently.

2. WHAT'S IN THE BOX

Please check the package contents to ensure all items are present:

- Car Screen (with 7-inch touch screen)
- Car Charging Cable
- Suction Cup Mount
- Adhesive Mount
- User Manual

Fit For All 12-24V Vehicles

Car

Camper

Truck

SUV

Caravan

Van

3. SETUP AND INSTALLATION

The Lehwey Portable Car Stereo is designed for simple and quick installation, typically taking less than 10 minutes without requiring complex vehicle modifications.

Mounting Options:

The device offers two primary mounting methods to suit your vehicle's dashboard or windshield:

1. **Suction Cup Mount:** Attach the suction cup mount to a clean, smooth surface on your windshield or dashboard. Ensure the surface is free of dust and grease for optimal adhesion. Press firmly and engage the locking mechanism.
2. **Adhesive Mount:** For a more permanent fixture, use the self-adhesive bracket. Clean the desired dashboard area thoroughly. Peel off the protective film from the adhesive pad and firmly press the mount onto the surface for several seconds. Allow sufficient time for the adhesive to bond before attaching the stereo.

Once the mount is secured, attach the car stereo screen to the mount. Adjust the viewing angle for optimal visibility and minimal obstruction of your driving view.

Power Connection:

Connect the provided car charging cable to the DC 12V input port on the stereo and plug the other end into your vehicle's cigarette lighter socket. The device is compatible with 12-24V vehicle power systems.

Image: Demonstrates two common mounting positions for the portable car stereo: one using a suction cup on the windshield and another using an adhesive base on the dashboard, showing how the screen can be positioned to avoid glare.

4. OPERATING INSTRUCTIONS

4.1 Wireless Apple CarPlay / Android Auto

This stereo provides wireless connectivity for both Apple CarPlay and Android Auto, allowing you to access your smartphone's features directly on the 7-inch touch screen.

1. Ensure Bluetooth is enabled on your smartphone.

2. On the car stereo, navigate to the 'CarPlay' or 'Android Auto' option.
3. Search for and select the stereo's Bluetooth name on your phone.
4. Confirm the pairing request on both devices.
5. Once paired, your phone's CarPlay or Android Auto interface will appear on the stereo screen, enabling wireless navigation, messaging, calls, and music streaming.

Image: A graphic illustrating the simplicity of setting up wireless CarPlay, emphasizing that it takes only 3 minutes without special installation skills, contrasting with complex traditional car stereo wiring.

4.2 Bluetooth 5.2 Connectivity

The integrated Bluetooth 5.2 chip ensures stable and reliable wireless connections for hands-free communication and audio streaming.

- **Hands-Free Calling:** Make and receive calls directly through the stereo using the built-in microphone. Your phone's contact list can be accessed on the screen.
- **Music Streaming:** Play audio from your smartphone or other Bluetooth-enabled devices through the car stereo.
- **Voice Assistant:** Utilize your device's voice assistant (Siri or Google Assistant) for commands, navigation, and more, keeping your hands on the wheel.

4.3 Audio Output Options

The stereo offers multiple ways to transfer audio to your vehicle's sound system:

- **Built-in Speaker:** For direct audio playback from the unit.
- **AUX Connection:** Use the included AUX cable to connect the stereo to your car's auxiliary audio input for a wired, high-quality audio transmission.
- **FM Transmitter:** Tune the stereo to an unused FM frequency, then tune your car's radio to the same frequency to wirelessly transmit audio to your car's speakers. This allows for louder audio output through your vehicle's existing sound system.

THREE WAYS OF AUDIO

Build-in Speaker

Play sound directly

AUX Connect to Car Audio

Wired Transmission,
AUX cable included

FM Transmit to Car Audio

Wireless Transmission

Image: A visual guide demonstrating the three audio output methods: playing sound directly from the built-in speaker, wired transmission via AUX cable, and wireless transmission using the FM transmitter function.

4.4 Mirror Link Functionality

The Mirror Link feature allows you to display your smartphone's screen directly onto the car stereo. This supports both iOS (wireless & wired) and Android (wired only) devices.

- Connect your smartphone to the stereo via USB for wired Mirror Link (Android).
- For iOS, wireless Mirror Link (AirPlay) is also supported.
- Once connected, your phone's display will be mirrored on the 7-inch screen, allowing you to view apps, videos, and photos.

IOS/ Android MirrorLink

 Apple Airplay(Wireless& Wired)

 Android Autolink(Only Wired)

Image: The car stereo screen mirroring a smartphone's display, illustrating the iOS/Android MirrorLink capability for viewing content from your phone on the larger screen.

4.5 Voice Control

Enhance driving safety by using voice commands through Siri or Google Voice Assistant. This allows you to control various functions without taking your hands off the wheel.

- Activate your phone's voice assistant (e.g., "Hey Siri" or "Hey Google").
- Issue commands for navigation, playing music, making calls, sending messages, and more.

Image: A visual representation of the voice control feature, showing a microphone icon and speech bubbles with example commands like "Hey Siri, Play music." and "Hey Google, send message to Tom," indicating hands-free operation.

5. TROUBLESHOOTING

If you encounter issues with your Lehwey Portable Car Stereo, refer to the following common problems and solutions:

Problem	Possible Cause / Solution
Device does not power on.	Ensure the car charging cable is securely plugged into both the stereo and the vehicle's cigarette lighter socket. Check if the vehicle's power outlet is functioning. Test with another 12-24V power source if available.
Cannot connect to Wireless CarPlay/Android Auto.	Ensure Bluetooth is enabled on your phone and the stereo. Forget the device from your phone's Bluetooth settings and re-pair. Make sure the stereo is in the correct CarPlay/Android Auto mode.
Poor Bluetooth call quality / Static during calls.	Ensure the built-in microphone is not obstructed. Reduce background noise in the vehicle. If using FM transmission, try a different, clearer FM frequency. Consider using the AUX connection for better audio fidelity if available.
FM Transmitter has static or interference.	Select a different FM frequency that is completely clear and not used by any local radio stations. Avoid areas with strong radio signals or electrical interference. Ensure the FM antenna is not obstructed.
Touch screen is unresponsive.	Restart the device by unplugging and re-plugging the power cable. Ensure the screen is clean and free of debris.

6. SPECIFICATIONS

Feature	Detail
Model	B0CSP5KL67
Display Size	7 Inches
Product Dimensions	6.97 x 4.3 x 0.75 inches
Item Weight	1.72 pounds
Connectivity Technology	Wireless Bluetooth, Wired USB
Controller Type	Touch Screen
Special Features	Touchscreen, Bluetooth, Wireless Apple CarPlay, Wireless Android Auto, Mirror Link, FM/AUX/USB/TF support
