## INTRODUCTION

---

Thank you for choosing the Agilestic Electric Standing Desk. This manual provides essential information for the proper assembly, operation, maintenance, and troubleshooting of your new height-adjustable desk. Please read this manual thoroughly before beginning assembly or use to ensure safe and efficient operation.

## IMPORTANT SAFETY INFORMATION

---

Please observe the following safety precautions to prevent injury or damage to the product:

- **Proper Assembly:** Improper use or assembly may result in product instability or failure to support intended weight. Always follow included assembly instructions carefully.
- **Weight Capacity:** Do not exceed the maximum weight recommendation of 154 pounds (70 kg). Overloading the desk can cause damage to the motor and frame.
- **Obstacle Detection:** The desk is equipped with anti-collision technology. If the lifting table encounters an obstacle during height adjustment, it will move approximately 1 inch in the opposite direction to avoid potential damage or injury. However, always ensure the path is clear during operation.

- **Anchoring:** Ensure the desk is properly anchored if necessary, especially on uneven surfaces or if there is a risk of tipping.
- **Children and Pets:** Keep children and pets away from the desk during operation to prevent accidents.
- **Power Supply:** Use only the provided power adapter and ensure it is connected to a grounded outlet. Do not operate the desk with a damaged power cord or plug.
- **Liquid Spills:** Avoid spilling liquids on the control panel or motor components. The tabletop is scratch-resistant and waterproof, but electronic components are not.

## SETUP AND ASSEMBLY

---

The Agilestic Electric Standing Desk is designed for straightforward assembly. It is recommended that 1 person assemble the desk. All necessary assembly tools are included in the package.

### Package Contents:

- **Up/Down Buttons (▲/▼):** Press and hold these buttons to manually adjust the desk height. The desk will move smoothly and quietly (under 55 dB). Release the button to stop at the desired height.
- **LED Screen:** Displays the current height of the desk in inches.
- **Memory Preset Buttons (1/2):**
  - **To Save a Preset:** Adjust the desk to your desired height. Press and hold one of the memory buttons (1 or 2) until the LED screen flashes or beeps, indicating the height has been saved.
  - **To Use a Preset:** Simply press the corresponding memory button (1 or 2). The desk will automatically move to the saved height.

## Height Adjustment Range:

The desk supports height adjustment between 28.3 inches (sitting height) and 45.7 inches (standing height).

upwards, and an arrow indicates it will reverse if it detects an obstacle, preventing damage.

## MAINTENANCE

Regular maintenance ensures the longevity and optimal performance of your Agilestic Electric Standing Desk.

- **Cleaning:**

- The tabletop is scratch-resistant and waterproof. For general cleaning, wipe the surface with a soft, damp cloth.
- For stubborn stains, use a mild, non-abrasive cleaner. Avoid harsh chemicals that could damage the finish.
- Do not spray cleaning solutions directly onto the control panel or motor components. Apply cleaner to a cloth first.

- **Inspections:** Periodically check all screws and bolts to ensure they are tight. Loose connections can affect stability and operation.
- **Cable Management:** Ensure power cables and any device cables are managed properly to avoid entanglement during height adjustments.

- **Motor Care:** The durable motor is designed for long-term reliability, having passed 50,000 international lift tests. No specific user maintenance is required for the motor itself.

## TROUBLESHOOTING

---

If you encounter issues with your Agilestic Electric Standing Desk, refer to the following common problems and solutions:

Problem	Possible Cause	Solution
Desk does not move.	Power cable disconnected; motor overload; control box error.	Check if the power cable is securely plugged into the wall outlet and the control box. Unplug the desk for 10 minutes, then plug it back in to reset the system. Reduce the weight on the desk if it exceeds 154 lbs.
Desk moves unevenly or makes unusual noises.	Loose connections; uneven weight distribution; obstruction.	Ensure all assembly screws are tightened. Redistribute items on the desk evenly. Check for any obstructions under or around the desk legs. The motor operates under 55 dB, so loud noises indicate an issue.
Anti-collision feature triggers too often.	Obstruction in the path; sensitive setting.	Ensure the area around the desk is completely clear during height adjustment. Refer to the full instruction manual for information on adjusting sensor sensitivity if available.
Memory presets not working.	Presets not saved correctly; system reset needed.	Re-save your desired heights by adjusting the desk to the position and then pressing and holding the memory button until confirmed. If issues persist, perform a full system reset by unplugging the desk for 10 minutes.

If the problem persists after attempting these solutions, please contact Agilestic customer support for further assistance.
