- Canbus Box
- Antenna Adapter
- AHD Rear Camera
- Microphone
- Reverse Line
- User Manual (this document)

SETUP & INSTALLATION

General Installation Notes

- This unit is designed for plug-and-play installation in compatible FIAT 500 models (2007-2015).
- Professional installation is recommended if you are unfamiliar with car audio wiring.
- Disconnect the vehicle's battery before starting installation to prevent electrical damage.

Wiring Connections

Refer to the wiring diagram provided in the 'Package Contents' image for specific connections. Key connections include:

- **Power Cable:** Connect to the vehicle's power harness. Ensure correct positive, negative, and accessory wire connections.
- **RCA Cables:** For external amplifiers, subwoofers, or video output to headrests.
- **USB Cables:** For connecting USB devices or for wired CarPlay/Android Auto.
- **GPS Antenna:** Mount in a location with a clear view of the sky for optimal signal reception.
- **Radio Antenna:** Connect to the vehicle's existing radio antenna.
- **Canbus Box:** Connect as per the vehicle's wiring to enable steering wheel controls and other vehicle data integration.

Rear Camera Installation

The included AHD rear camera provides a clear view for parking. Connect the camera to the 'Rear Camera Input Cable' on the head unit. Ensure the camera's power is connected to the vehicle's reverse light circuit so it activates automatically when shifting into reverse.

AHD Reversing Input

When the Car is in the reverse gear ,it automatically switches to the reverse image which is easier and safer to reverse

Image: This image demonstrates the AHD reversing input, which automatically displays the rear camera feed when the car is in reverse. It highlights features like night vision, waterproofing, guidelines, and a wide-angle view, comparing the clarity of an AHD camera to a standard HD camera.

OPERATING INSTRUCTIONS

Power On/Off

The unit powers on automatically with the vehicle's ignition. To manually power off or on, press and hold the 'POWER' button on the unit's front panel.

Touchscreen Operation

The 7-inch HD 1080P touchscreen (1024*600 resolution) supports multi-touch gestures. Navigate through menus, select applications, and control functions by tapping, swiping, and pinching.

Gorgeous UI, colorful car life

Image: This image emphasizes the screen's quality, including its 1024x600 resolution, 2.5D scratch-resistant glass, anti-knock durability, and accurate color reproduction. It also showcases different customizable user interface themes.

Wireless CarPlay / Android Auto

Connect your smartphone wirelessly for CarPlay or Android Auto functionality. This allows access to navigation, calls, messages, and music through the car's display, supporting voice assistance for safe driving.

- Ensure Bluetooth and Wi-Fi are enabled on your smartphone.
- On the head unit, select the CarPlay or Android Auto application.
- Follow the on-screen prompts to pair your device.

Wireless Carplay & Android Auto

Voice Control

With voice Assistant, help you focus on the road and have fun along the way.

Image: This visual illustrates the seamless integration of wireless CarPlay and Android Auto, displaying common applications and emphasizing the convenience of voice control for hands-free operation while driving.

GPS Navigation & WiFi

The unit features integrated GPS for both online and offline navigation. Connect to a Wi-Fi hotspot to download maps, access real-time traffic information, and use online applications.

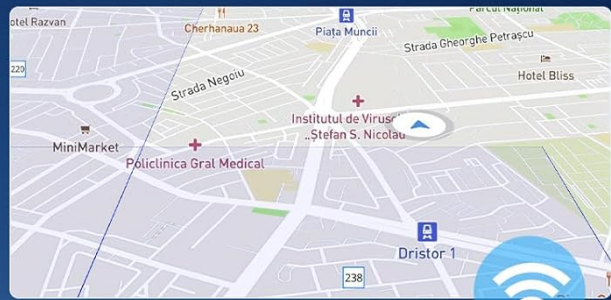

- **GPS:** Open the navigation app. Ensure the GPS antenna is properly installed.
- **WiFi:** Go to Settings > Network & Internet > Wi-Fi. Select your desired network and enter the password.

GPS Navigation

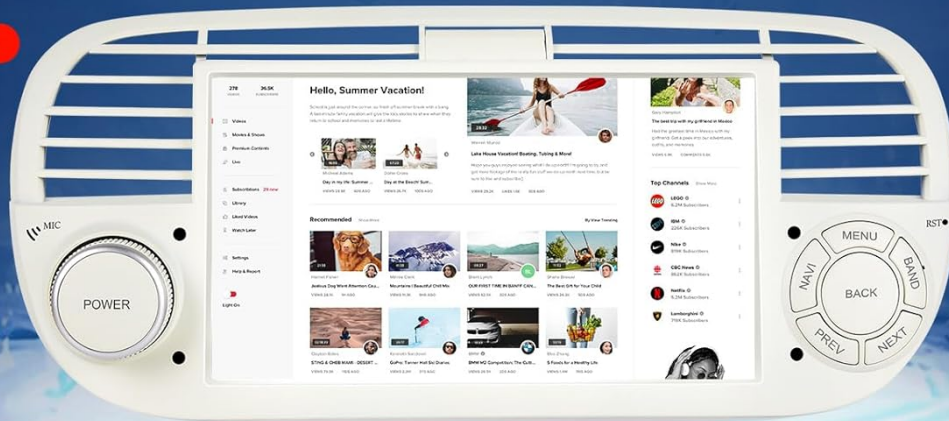

Navigation when you need even without internet.

Offline

Online

WiFi Connection

Download App/On-line Surfing. Connected to WiFi or hotspot,download more APPs: Instagram/TikTok Waze and more.

Image: This image displays the GPS navigation interface, indicating both offline and online map functionality. It also highlights the WiFi connection feature, enabling users to download applications and access internet content.

Bluetooth Connectivity

Pair your smartphone via Bluetooth for wireless music streaming, hands-free calling, and contact synchronization.

- On the head unit, open the Bluetooth application.
- Enable Bluetooth on your smartphone and search for available devices.
- Select the head unit from the list and confirm pairing.

FM/RDS Radio

Access FM radio stations with RDS (Radio Data System) functionality, which displays station information, traffic updates, and other data.

Image: This image illustrates the FM RDS radio interface, showing a tuned station with its frequency and RDS data. It highlights the feature's ability to provide real-time traffic, news broadcasts, and weather forecasts.

Audio Features (EQ)

Customize your audio experience with the integrated Equalizer (EQ). Adjust frequency bands to match your musical preferences. The unit also supports subwoofer output.

Super Sound System

RDS Experience personalized audio excellence on the go with our integrated EQ and FM/RDS Radio system. Fine-tune your drive's sound track using the intuitive Equalizer to match your musical preferences.

Image: This image displays the graphical equalizer interface, allowing users to fine-tune audio output with various presets like Pop, Rock, Jazz, and custom settings. It also shows the RDS radio interface in the background.

Steering Wheel Control

The unit supports integration with your vehicle's existing steering wheel controls, allowing you to manage essential functions (e.g., volume, track change) without taking your hands off the wheel. Configuration may be required in the unit's settings menu.

MAINTENANCE

- **Cleaning:** Use a soft, dry cloth to clean the screen and unit. Avoid abrasive cleaners or solvents.
- **Software Updates:** Periodically check the manufacturer's website or the unit's settings for available software updates to ensure optimal performance and access to new features.
- **Temperature:** Avoid exposing the unit to extreme temperatures, which can affect its performance and lifespan.

TROUBLESHOOTING

Problem	Possible Cause	Solution
Unit does not power on	Incorrect wiring; Blown fuse; Vehicle battery low	Check power connections; Inspect vehicle fuses; Charge vehicle battery
No sound	Volume muted/low; Speaker wiring incorrect; Amplifier issues	Adjust volume; Check speaker connections; Verify amplifier power
GPS signal lost/weak	GPS antenna obstructed/disconnected	Ensure GPS antenna has clear sky view; Check antenna connection
Bluetooth not connecting	Bluetooth off on phone/unit; Device not in pairing mode	Enable Bluetooth; Put device in pairing mode; Forget and re-pair device
Rear camera not displaying	Camera wiring incorrect; Reverse trigger not connected	Check camera power and video input; Verify reverse trigger wire connection
