surmen 68 Miami

SURMEN 65% Mechanical Gaming Keyboard User Manual

Model: 68 Miami

PRODUCT OVERVIEW

The SURMEN 65% Mechanical Gaming Keyboard (Model: 68 Miami) is a compact, high-performance keyboard designed for gaming and typing. It features a 68-key layout, linear red switches for smooth keystrokes, and vibrant LED backlighting with shine-through PBT keycaps. Its anti-ghosting capabilities ensure precise input during intense gaming sessions, and adjustable tilt legs provide ergonomic comfort.

PACKAGE CONTENTS

- SURMEN 65% Mechanical Gaming Keyboard (68 Miami)
- USB Cable
- Keycap Puller
- User Manual (this document)

SETUP INSTRUCTIONS

Connecting the Keyboard

1. Locate the USB-C port on the back of the keyboard.
2. Connect the provided USB cable to the keyboard's USB-C port.

Figure 2: Connecting the USB-C Cable

3. Plug the other end of the USB cable (USB-A) into an available USB port on your computer (Laptop or PC).
4. The keyboard will be automatically recognized by your operating system (Windows 2000/Vista/Win7/Win8/Win10/MAC/Linux) and ready for use.

Adjusting Tilt Legs

For improved ergonomics and typing comfort, the keyboard features two-stage adjustable tilt legs located on the underside. Gently pull out the desired stage of the legs to elevate the keyboard to your preferred angle.

OPERATING INSTRUCTIONS

Keyboard Layout and Features

This 65% mechanical gaming keyboard features a compact 68-key layout, optimizing desk space while retaining essential keys. It is equipped with linear red switches, known for their smooth, quiet, and responsive keystrokes, making them ideal for both fast-paced gaming and comfortable typing.

Linear Red Switches

The keyboard utilizes linear red mechanical switches. These switches provide a consistent, smooth keystroke without a tactile bump or audible click, allowing for rapid and quiet key presses. This makes them a popular choice for gamers and typists who prefer a light and fluid feel.

Quiet Linear Red Switch

Video 1: Demonstration of the quiet linear red switches during typing.

Backlit PBT Keycaps

The keyboard features durable PBT keycaps with a shine-through design, allowing the LED backlighting to illuminate the characters clearly. PBT material is known for its resistance to wear and shine, ensuring the keycaps maintain their appearance over time.

PBT Material Shine-through

Video 2: Demonstration of the shine-through letters on the keycaps, highlighting the LED backlighting.

LED Lighting Control

The keyboard features single LED backlighting with various effects. To cycle through different lighting modes, press the **Fn** key combined with the designated lighting control key (refer to your keyboard's specific key legends, often indicated by an icon or secondary function). You can also turn the backlight off if desired.

Video 3: Guide on how to switch between different LED light modes on the keyboard.

Anti-Ghosting

All 68 keys on this keyboard feature full anti-ghosting, meaning multiple keys can be pressed simultaneously without conflict. This ensures that every keystroke is registered accurately, which is crucial for fast-paced gaming and efficient

typing.

MAINTENANCE

Cleaning the Keyboard

- Disconnect the keyboard from your computer before cleaning.
- Use a can of compressed air to blow away dust and debris from between the keycaps.
- For stubborn dirt, use the provided keycap puller to carefully remove keycaps. Clean the switches and keycaps with a soft brush or a slightly damp cloth. Ensure all parts are completely dry before reattaching keycaps and reconnecting the keyboard.
- Wipe the surface of the keyboard with a soft, lint-free cloth. Avoid using harsh chemicals or abrasive materials.

TROUBLESHOOTING

Keyboard Not Responding

- Ensure the USB cable is securely connected to both the keyboard and the computer.
- Try plugging the keyboard into a different USB port on your computer.
- Restart your computer.
- Test the keyboard on another computer to determine if the issue is with the keyboard or your system.

Backlighting Not Working

- Ensure the keyboard is properly connected and powered.
- Press the **Fn** key combined with the lighting control key to cycle through modes or turn the backlight on.
- Check if any software drivers or settings are interfering with the lighting (though this keyboard is plug-and-play).

Keys Not Registering or Double-Typing

- Clean the affected key switch as described in the Maintenance section. Debris under the keycap can cause issues.
- Ensure the keycap is properly seated on the switch.
- If the issue persists, it may indicate a faulty switch.
