EasyKeys CL727

EasyKeys Toolbox Replacement Key for Lista CL727 Instruction Manual

Model: CL727

1. PRODUCT OVERVIEW

This document provides essential information for the proper identification and use of your EasyKeys Toolbox Replacement Key, specifically designed for Lista CL727 lock codes. This key is custom-cut to match the CL727 code within the Lista CL501 - CL750 series, ensuring compatibility with Lista brand toolboxes and cabinets.

Where to Find Your Lock Code

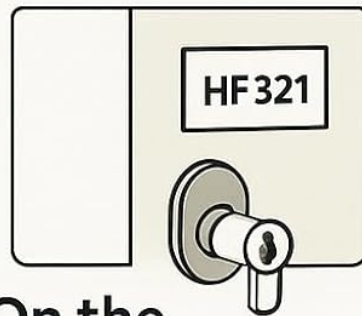

On the Key

On the Lock Face

**On a Label Inside/
Behind the Lock**

**On the
Cabinet/Door Label**

Important Notes

- Order by Manufacturer → Lock codes are manufacturer-specific.
- Key Cuts Differ → Even if codes look similar, they vary by brand.

Image: An EasyKeys Toolbox Replacement Key, cut to specification for Lista CL727 locks. The key is made of brass and features a standard key head with a precisely cut blade.

2. KEY IDENTIFICATION AND SETUP

Before using your replacement key, it is crucial to verify that your lock code and manufacturer match the product title. This key is specifically for Lista brand locks with the code CL727.

2.1 How to Find Your Lock Code

Identifying the correct lock code is essential for ensuring your replacement key functions properly. Lock codes can typically be found in several locations:

- **On the Original Key:** The code (e.g., FR322) is often stamped or engraved directly on the head or blade of the original key.
- **On the Lock Face:** For some locks, the code (e.g., FR322) may be visible on the face of the lock cylinder itself.
- **On a Label Inside/Behind the Lock:** Check for a sticker or label (e.g., CODE: G38) located inside the toolbox drawer, on the back of the lock mechanism, or within the cabinet structure.
- **On the Cabinet/Door Label:** Some manufacturers place a label (e.g., HF321) on the cabinet or door itself, often near the lock assembly.

Important Notes:

Order by Manufacturer: Lock codes are manufacturer-specific. A code like CL727 for Lista is unique to Lista products.

Key Cuts Differ: Even if codes appear similar across different brands, the actual key cuts vary significantly by manufacturer. Always confirm the brand.

3. OPERATING INSTRUCTIONS

To use your EasyKeys Toolbox Replacement Key:

1. Gently insert the key into the lock cylinder, ensuring the keyway aligns correctly.
2. Apply slight forward pressure while rotating the key clockwise or counter-clockwise (depending on the lock mechanism) to engage the tumblers and unlock the mechanism.
3. Once unlocked, remove the key. Do not force the key if it does not turn smoothly.

4. MAINTENANCE

To ensure the longevity and smooth operation of your replacement key and lock:

- Keep the key clean and free from dirt or debris.
- Avoid using the key for purposes other than operating the lock, such as prying or scraping.
- If the lock mechanism becomes stiff, a small amount of graphite lubricant can be applied to the key or directly into the keyway.

5. TROUBLESHOOTING

If your replacement key does not operate the lock:

- **Verify Lock Code and Manufacturer:** Double-check the lock code on your toolbox or cabinet and confirm it is indeed CL727 and manufactured by Lista. Incorrect codes or manufacturers are the most common reasons for keys not working.

- **Inspect Key for Damage:** Examine the key for any visible bends, breaks, or manufacturing defects.
- **Inspect Lock for Obstructions:** Ensure the lock keyway is clear of any foreign objects or debris.
- **Contact Support:** If the issue persists after verification, contact EasyKeys customer support for assistance.

6. SPECIFICATIONS

Brand	EasyKeys
Model Name	CL727
Compatible Manufacturer	Lista
Lock Type	Cam
Material	Brass
Special Feature	Custom Cut Key, Durable
Item Dimensions (L x W x H)	0.5 x 0.5 x 1 inches
Item Weight	4 ounces
