EasyKeys Y043

EasyKeys Replacement Key for Snap-On Toolbox, Model Y043

Instruction Manual

INTRODUCTION

This manual provides essential information for identifying and ordering a replacement key for your Snap-On toolbox. The EasyKeys Y043 replacement key is designed for Snap-On Key Series Y001 - Y500. Following these instructions will help ensure you receive the correct key for your lock.

IDENTIFYING YOUR LOCK CODE

To order the correct replacement key, you must first locate your lock code. This code is crucial as it determines the specific key cut required. The lock code can typically be found in one of the following locations:

Image: Various locations where you can find your lock code.

- **On the Key:** The lock code is often stamped directly onto the original key. For example, "FR322".
- **On the Lock Face:** If you have lost your key, the code might be visible on the face of the lock cylinder itself. Look for a series of letters and numbers.
- **On a Label Inside/Behind the Lock:** For some toolboxes, the code may be on a sticker or label located inside the drawer, on the back of the lock mechanism, or within the toolbox structure. This might require

opening a drawer or panel. For example, "CODE: G38".

- **On the Cabinet/Door Label:** In certain installations, the lock code could be on a label affixed to the cabinet or door near the lock. For example, "HF321".

⚠ Important Notes:

- **Order by Manufacturer:** Lock codes are specific to the manufacturer. Ensure you select the correct manufacturer (Snap-On) when ordering.
- **Key Cuts Differ:** Even if lock codes appear similar across different brands, the actual key cuts vary significantly by brand. Always verify the manufacturer.

ORDERING YOUR REPLACEMENT KEY

Once you have identified your lock code, you can proceed with ordering your replacement key. Follow these steps:

1. **Verify Manufacturer:** Confirm that your toolbox is a Snap-On brand. This key is specifically for Snap-On toolboxes.
2. **Select Lock Code:** Choose the exact lock code you found (e.g., Y043) from the available options. The EasyKeys Y001 - Y500 series is compatible with Snap-On toolboxes.
3. **Place Order:** Complete your order, ensuring all details are accurate.

Note: This key series is not compatible with Craftsman locks.

KEY COMPATIBILITY AND SPECIFICATIONS

The EasyKeys Y043 replacement key is designed for specific applications and features:

- **Compatible Manufacturers:** Snap-On, Bluepoint Toolbox.
- **Key Series:** Snap-On Y001 - Y500 series.
- **Key Type:** National Double-Sided Cut Key.
- **Key Blank:** Cut on a 1527 key blank.
- **Features:** Custom Cut Key, Durable.
- **Material:** Brass.

MAINTENANCE

To ensure the longevity and proper function of your replacement key and lock:

- **Keep Clean:** Periodically wipe the key with a dry cloth to remove dirt or debris.
- **Avoid Force:** Do not force the key into the lock or turn it with excessive force, as this can damage both the key and the lock mechanism.
- **Proper Storage:** Store spare keys in a safe, dry place to prevent loss or damage.

TROUBLESHOOTING

If your new key does not operate the lock correctly:

- **Re-verify Lock Code:** Double-check the lock code on your toolbox or original key against the code you ordered. A small error can lead to an incorrect key cut.

- **Check for Obstructions:** Ensure there are no foreign objects or debris inside the lock cylinder that might prevent the key from fully inserting or turning.
- **Contact Support:** If the issue persists after verifying the code and checking for obstructions, please contact EasyKeys customer support for assistance.

SPECIFICATIONS

Attribute	Detail
Brand	EasyKeys
Model Number	Y043-snapon-key-869592 (Corresponds to Y043 lock code)
Compatible Manufacturers	Snap-On, Bluepoint Toolbox
Lock Type	Cam
