## EasyKeys A4360

# EasyKeys CompX National A4360 Replacement Key Instruction Manual

Brand: EasyKeys | Model: A4360

## INTRODUCTION

This manual provides essential information for the identification and proper use of your EasyKeys replacement key for CompX National A4360 locks. This key is specifically designed for use with file cabinets, desks, and cubicles that utilize the CompX National A4360 lock code.

## KEY IDENTIFICATION AND LOCK CODE VERIFICATION

To ensure you have the correct replacement key, it is crucial to verify the lock code. The lock code determines the specific cut of your key.

### Locating Your Lock Code

Your lock code can typically be found in one of the following locations:

- **On the Original Key:** The code is often stamped directly onto the key blade or head.
- **On the Lock Face:** For many locks, the code is engraved on the visible face of the lock cylinder.
- **On a Label Inside/Behind the Lock:** Some locks have a label with the code placed inside the cabinet or behind the lock mechanism.
- **On the Cabinet/Door Label:** Occasionally, the code may be on a label affixed to the cabinet or door itself.

### Important Note:

Lock codes are manufacturer-specific. Even if codes appear similar, key cuts vary by brand. Always confirm that the manufacturer (CompX National) and the code (A4360) match your lock.

# Where to Find Your Lock Code

On the Key

On the Lock Face

On a Label Inside/  
Behind the Lock

On the  
Cabinet/Door Label

## Important Notes

- Order by Manufacturer → Lock codes are manufacturer-specific.
- Key Cuts Differ → Even if codes look similar, they vary by brand.

Figure 1: Common locations to find your lock code.

Figure 2: Example of a replacement key with a stamped code.

## KEY USAGE

To operate your lock, insert the key fully into the lock cylinder. Turn the key clockwise or counter-clockwise (depending on the specific lock mechanism) to engage or disengage the locking mechanism. Remove the key once the lock is secured or opened.

**Compatibility:** This key is compatible with CompX National A0100 - A7003 series locks, specifically for the A4360 code. It is also compatible with manufacturers such as Corry Jamestown, Steel-Age, and Brown-Morris for file cabinet locks.

## MAINTENANCE

This replacement key requires minimal maintenance. Keep the key clean and dry. Avoid using excessive force when inserting or turning the key, as this can damage both the key and the lock mechanism. If the lock mechanism becomes stiff, a small amount of graphite lubricant can be applied to the keyway. Avoid oil-based lubricants, as they can attract dirt and debris.

## TROUBLESHOOTING

### Key Does Not Turn

- **Incorrect Key:** Double-check that the lock code on your key matches the code on your lock.
- **Obstruction:** Ensure there are no foreign objects or debris in the keyway.
- **Lock Mechanism Issues:** If the key is correct and the keyway is clear, the lock mechanism itself may be damaged or jammed. Professional assistance may be required.

### Key Is Difficult to Insert

- **Alignment:** Ensure the key is aligned correctly with the keyway.
- **Debris:** Check for any debris in the keyway that might be obstructing insertion.
- **Bent Key:** Inspect the key for any signs of bending or damage. A bent key should not be forced into the lock.

## PRODUCT SPECIFICATIONS

Feature	Detail
Brand	EasyKeys

Feature	Detail
Model Name	A4360
Lock Type	Cam
Material	Brass
Special Features	Custom Cut Key, Durable
Item Dimensions (L x W x H)	0.5 x 0.5 x 1 inches
Item Weight	4 ounces
Compatible Manufacturers	CompX National, Corry Jamestown, Steel-Age, Brown-Morris

**Note:** This key is cut on a NA14 D4291 key blank.
