Bestway B0CSTDVFCK

Bestway SaluSpa AirJet Inflatable Square Hot Tub User Manual

Model: B0CSTDVFCK

1. INTRODUCTION

This manual provides essential information for the safe and efficient use of your Bestway SaluSpa AirJet Inflatable Square Hot Tub. Please read all instructions carefully before setup, operation, and maintenance. Retain this manual for future reference.

The SaluSpa AirJet Hot Tub is designed to provide a relaxing spa experience with its built-in AirJet system, comfortable seating, and advanced features like FreezeShield Technology.

2. PRODUCT OVERVIEW

The Bestway SaluSpa AirJet Inflatable Square Hot Tub offers a comfortable and durable spa experience. It features 140 soothing AirJets, seating for 4 to 6 people, and includes 4 underwater non-slip seats and 2 padded headrest pillows.

Key Features:

- **AirJet System:** 140 jets release warm air for a soothing massage.
- **FreezeShield Technology:** Automatic heating function prevents internal components from freezing in cold temperatures.
- **DuraPlus Material:** Durable, puncture-resistant material with internal beam construction for structural stability.
- **Spa Seats:** Four adjustable seats (3.15 to 4.72 inches height) for customized comfort.
- **Headrest Pillows:** Two padded headrests with adjustable straps and washable mesh fabric.
- **Digital Control Panel:** Easy-to-reach panel to control heating up to 104°F.
- **ChemConnect Dispenser:** Evenly disperses a stable level of chlorine.
- **Smart Hub App:** Control heating, timer, massage settings, and more remotely.

Product Dimensions:

- **Overall Dimensions:** 71"L x 71"W x 28"H
- **Capacity:** 210 Gallons
- **Seating Capacity:** 6 people

3. SETUP

Installation Location:

For outdoor setup, ensure the hot tub is placed on level ground that:

- Supports the combined weight of the hot tub, water, and users.
- Has adequate drainage to prevent property damage.
- Is within 12 ft. of a grounded receptacle (3-prong outlet).

Special Indoor Installation Requirements:

If setting up indoors, please note:

- Humidity can cause property damage.
- Adequate ventilation around the area is required (consult an expert to confirm).

Important Electrical Safety Information:

- Use of an extension cord or multi-plug adaptor is strictly prohibited.
- Connect to a grounded 110-120 V AC, 60Hz, Single Phase 12A receptacle (corresponding voltage of hot tub).
- Grounded receptacle must be resistant to humidity and capable of high-power loading. If unsure of quality, consult an electrician before use.
- Regularly inspect the plug and socket for signs of damage. If signs of damage exist, do NOT plug back into socket.

SALUSPA®

IMPORTANT ELECTRICAL SAFETY INFORMATION

1. Use of an extension cord or multi-plug adaptor is strictly prohibited
2. Connect to a grounded 110-120 V AC, 60Hz, Single Phase 12A receptable (corresponding voltage of hot tub)
3. Grounded receptable must be resistant to humidity and capable of high-power loading
 - If unsure of quality, consult an electrician before use
4. Regularly inspect the plug and socket for signs of damage
 - If signs of damage exist, do NOT plug back into socket

INSTALLATION LOCATION

Outdoor setup on level ground that:

- Supports the weight of the hot tub, water and users
- Has adequate drainage to avoid property damage
- Is within 12 ft. of a grounded receptable (3-prong outlet)

SPECIAL INDOOR INSTALLATION REQUIREMENTS

If setting up indoors, please note:

- Humidity could cause property damage
- Adequate ventilation around the area is required (consult an expert to confirm)

4. OPERATING INSTRUCTIONS

Control Panel:

The easy-to-reach digital control panel allows you to manage all functions of your hot tub, including activating the AirJet system and setting the water temperature up to 104°F (40°C).

AirJet System:

Activate the AirJet system via the control panel to release 140 warm air jets, providing a full-body massage experience. The HydroJet™ Spa offers 2 intensity levels for customizable relaxation.

FreezeShield Technology:

This feature automatically monitors water temperature and activates the heating function when necessary to prevent internal components from freezing, protecting your pump and liner during colder weather.

Smart Hub App:

For convenient remote control, download the Bestway Smart Hub App. This app allows you to manage heating, set timers, adjust massage settings, and more directly from your mobile device.

ChemConnect Dispenser:

Utilize the included ChemConnect dispenser to maintain optimal water chemistry. It ensures an even and stable dispersion of chlorine throughout the hot tub water.

5. MAINTENANCE

Water Filtration:

The hot tub includes an integrated water filtration system. Regularly clean or replace the filter cartridge to ensure optimal water quality and system performance.

Reinforced Cover:

Always use the reinforced cover when the spa is not in use. This helps to hold in heat, reduce energy consumption, and keep dust and debris out of the water.

Headrest Pillows:

The headrest pillows feature a washable mesh fabric. Remove and clean them regularly according to the care instructions to maintain hygiene and extend their lifespan.

General Cleaning:

Periodically clean the interior and exterior surfaces of the hot tub with a mild, non-abrasive cleaner. Ensure the hot tub is drained and dry before long-term storage.

6. TROUBLESHOOTING

If you encounter issues with your SaluSpa hot tub, refer to the following common solutions:

- **No Power:** Ensure the power cord is securely plugged into a grounded outlet. Check the circuit breaker. Verify the outlet meets electrical safety requirements.
- **Water Not Heating:** Confirm the heater function is activated on the control panel or via the Smart Hub App. Check if the filter is clean and water flow is unobstructed. Ensure the cover is properly secured to prevent heat loss.
- **Jets Not Working:** Verify the AirJet system is activated. Check for any blockages in the jet nozzles.
- **Water Quality Issues:** Test the water chemistry regularly using appropriate test strips. Adjust chemical levels (e.g., chlorine via ChemConnect) as needed. Clean or replace the filter cartridge.
- **Leakage:** Inspect the hot tub liner for any visible punctures or tears. For minor leaks, repair kits are often included or can be purchased separately.

For persistent issues, contact Bestway customer support.

7. SPECIFICATIONS

| Specification | Detail |
