2. SAFETY INFORMATION

Please read and understand all safety instructions before assembly and use. Failure to follow these instructions may result in injury or damage to the product.

- Ensure the headboard is securely mounted to the wall or attached to the bed frame to prevent tipping.
- Do not exceed the weight limit of 150 lbs on the storage shelves.
- Keep fingers and other body parts away from the edges and moving parts during assembly and adjustment to avoid pinches.
- Do not overload the electrical outlets or USB ports. Use only with compatible devices.
- Keep all electrical components away from water or damp environments.

3. PACKAGE CONTENTS

Verify that all components are present before beginning assembly. If any parts are missing or damaged, please contact customer support.

5.3. Utilizing Storage Shelves

The 3-tier storage shelves provide convenient space for books, phones, alarm clocks, and other personal items, helping to keep your bedside area tidy and organized.

6. MAINTENANCE

To ensure the longevity and appearance of your Aheaplus Headboard, follow these simple maintenance guidelines:

- **Cleaning:** Wipe the surfaces with a dry cloth. Avoid using harsh chemicals or abrasive cleaners, which can damage the finish.
- **Dusting:** Regularly dust the shelves and frame to prevent buildup.
- **Hardware Check:** Periodically check all screws and bolts to ensure they remain tight. Retighten if necessary to maintain stability and prevent noise.

7. TROUBLESHOOTING

This section addresses common issues you might encounter with your headboard.

Problem	Possible Cause	Solution
Headboard is wobbly or noisy.	Loose connections; improper attachment to bed frame.	Ensure all screws and bolts are tightened. Verify the headboard is securely attached to the bed frame using the provided adapters. If necessary, place a soft material between the headboard and the wall to reduce friction.
Charging station not working.	Power cord not plugged in; overloaded circuit; faulty device.	Check if the headboard's power cord is securely plugged into a working wall outlet. Ensure the total power draw of connected devices does not exceed the charging station's capacity. Test with different devices.
LED lights not functioning.	Power issue; loose connection; app/remote control issue.	Verify the headboard is powered on. Check the connection of the LED light strip. Ensure the control app is updated and connected, or that the remote control has working batteries.
Difficulty with assembly.	Misinterpretation of instructions; missing parts.	Carefully re-read the assembly manual, paying close attention to diagrams and part labels. Ensure all parts are accounted for before starting. Contact customer support for assistance if needed.
