7. Troubleshooting

If you encounter any issues with your ZINUS Piper Upholstered Platform Bed, refer to the following common solutions:

Problem	Possible Cause	Solution
Bed frame is squeaking.	Loose bolts or connections.	Check and tighten all assembly bolts. Ensure the foam padded tape is correctly positioned.

Problem	Possible Cause	Solution
Headboard fabric appears wrinkled.	Headboard was folded for shipping.	Allow time for wrinkles to naturally relax. A light steam iron can be used carefully on the fabric if needed, avoiding direct contact with internal components.
Bed feels unstable or wobbly.	Incorrect assembly or loose connections.	Review assembly instructions to ensure all steps were followed correctly. Tighten all bolts securely.
Slats are moving or shifting.	Velcro not properly aligned or attached.	Ensure the wooden slats are firmly pressed onto the Velcro strips on the side rails.

If the issue persists after attempting these solutions, please contact ZINUS customer support.
