6. TROUBLESHOOTING

If you encounter any issues with your folding stool, consider the following common solutions:

- **Stool feels unstable:** Ensure the stool is fully unfolded and all locking mechanisms (if any are present in the design) are engaged. Place the stool on a flat, level surface. Check if any of the plastic feet are missing or damaged.
- **Difficulty folding/unfolding:** Ensure no obstructions are preventing the movement of the stool's components. Apply gentle, even pressure. Do not force the mechanism.
- **Squeaking noises:** This may indicate loose connections. Inspect all joints and tighten any loose screws. A small amount of lubricant on pivot points may also help.
