OPERATING INSTRUCTIONS

The Zinus Rumi bed frame is designed to provide robust support for your mattress without the need for a traditional box spring. Its sturdy steel slats offer a reliable foundation for various mattress types, including memory foam, latex, and spring mattresses.

Mattress Placement:

Carefully place your mattress directly onto the assembled steel slat foundation. Ensure the mattress is centered and evenly distributed across the frame for optimal support and comfort.

MAINTENANCE

To ensure the continued stability and longevity of your Zinus Rumi bed frame, regular maintenance is recommended.

- **Regular Inspection:** Periodically check all bolts and connections to ensure they remain tight. Re-tighten any loose fasteners as needed to maintain structural integrity.
- **Cleaning:** Wipe down the metal frame with a soft, damp cloth to remove dust and debris. Avoid using harsh chemicals or abrasive cleaners, as these may damage the finish.
- **Stability Check:** Regularly check the frame for any signs of wear, bending, or instability. Address any issues promptly to prevent further damage or safety concerns.

TROUBLESHOOTING

If you encounter any issues with your Zinus Rumi bed frame, refer to the following common troubleshooting tips:

Problem	Possible Cause	Solution
Squeaking or Noise	Loose bolts or connections.	Inspect all assembly points and tighten any loose bolts using the provided ratchet tool. Ensure all parts are properly aligned.
Frame feels unstable or wobbly	Improper assembly or uneven floor surface.	Re-check all connections to ensure they are fully secured. Move the frame to a level surface. If the issue persists, disassemble and reassemble carefully following the instructions.
Mattress sliding	Smooth mattress bottom or lack of friction.	Consider placing a non-slip mat or rug gripper between the mattress and the bed frame slats to increase friction.
