The cloud-shaped headboard features an embedded light stripe for ambient lighting.

- **Power Connection:** Locate the power cable for the light stripe, usually extending from the back of the headboard. Plug it into a standard electrical outlet.
- **Activation:** The light stripe is typically controlled by a small switch or a touch sensor located on the headboard or along the power cable. Refer to the specific switch type for activation.
- **Brightness/Modes:** Some light stripes may offer adjustable brightness or different lighting modes. Consult the small instruction leaflet included with the light stripe components for detailed controls.
- **Safety:** Ensure the power cable is not pinched or damaged. Unplug the light stripe when not in use for extended periods or during cleaning.

- **Frame Care:** Wipe the wooden and MDF components with a soft, damp cloth. Avoid harsh chemicals or abrasive cleaners.
- **Hardware:** Periodically check all bolts and screws to ensure they remain tight. Re-tighten as needed to maintain stability.
