YESIDO SF17

Yesido SF17 Multifunctional Selfie Stick Tripod User Manual

Model: SF17

INTRODUCTION

This manual provides detailed instructions for the safe and effective use of your Yesido SF17 Multifunctional Selfie Stick Tripod. Please read this manual thoroughly before operating the device and retain it for future reference.

PRODUCT OVERVIEW

The Yesido SF17 is a versatile device designed to function as both a selfie stick and a tripod stand. It features an extendable pole, a 360-degree rotating phone holder, and a detachable Bluetooth remote control for convenient photo and video capture.

Image: The Yesido SF17 Selfie Stick Tripod shown both fully extended as a tripod with a phone attached, and folded into a compact stick for portability.

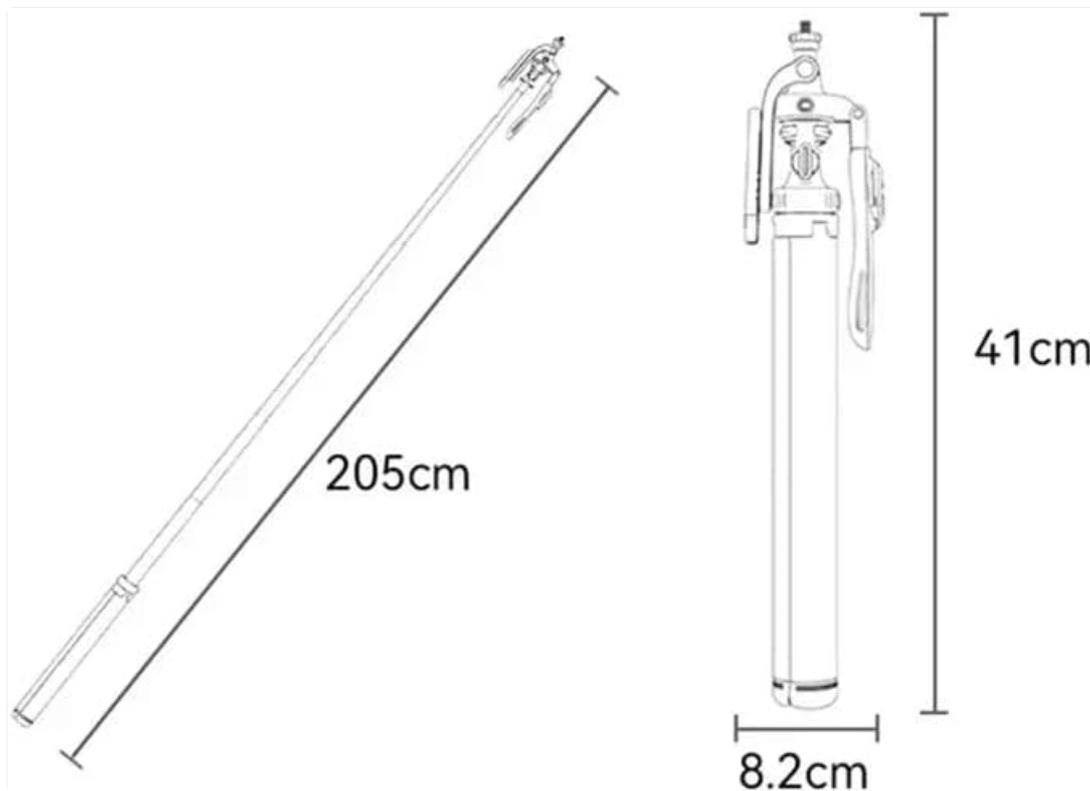

Image: A diagram illustrating the dimensions of the Yesido SF17. When folded, it measures approximately 41cm in length and 8.2cm in width. When fully extended, the pole reaches 205cm.

Key Components:

- **Extendable Pole:** Allows for adjustable height up to 200cm.
- **Tripod Legs:** Provides stable support when used as a tripod.
- **Phone Holder:** Adjustable clamp to secure smartphones.
- **Bluetooth Remote Control:** Detachable remote for wireless photo/video capture.
- **1/4" Screw Mount:** For attaching professional cameras or other accessories.
- **Cold Shoe Seat:** For mounting supplementary lighting or microphones.

Image: Close-up views of the Yesido SF17 tripod head, highlighting the 1/4 inch screw for professional camera installation, a 1/4 inch nut for microphone attachment, and a cold shoe seat for supplementary lighting.

SETUP INSTRUCTIONS

- 1. Unfold the Tripod:** Gently pull the three legs outwards from the base of the stick until they are fully extended and stable.
- 2. Extend the Pole:** Pull the telescopic sections of the stick upwards to achieve the desired height. Ensure all sections are securely locked in place.
- 3. Attach Your Device:**
 - **For Smartphones:** Open the adjustable phone holder clamp and carefully insert your smartphone. Ensure it is securely gripped. The holder supports phones between 4.7 and 7.1 inches.
 - **For Cameras:** If using a camera, screw it onto the 1/4" screw mount located at the top of the tripod head.
- 4. Pair the Bluetooth Remote:**
 - Ensure the remote control is charged (if applicable) and powered on.
 - Activate Bluetooth on your smartphone.
 - Search for available devices and select "YESIDO" or a similar identifier.
 - Once paired, the remote can be used to trigger your phone's camera shutter from up to 10 meters away.

10m distance, Bluetooth remote shooting

Image: The Yesido SF17 tripod stand with a smartphone mounted, demonstrating the use of the detachable Bluetooth remote control for capturing photos from a distance of up to 10 meters.

OPERATING INSTRUCTIONS

- 1. Adjusting Phone Holder Orientation:** The phone holder can be rotated horizontally or vertically to suit your shooting needs.
- 2. Adjusting Shooting Angles:**
 - The tripod head allows for 360-degree pan tilt rotation for panoramic shots.
 - The holder can be adjusted up and down by 260 degrees to meet various shooting angles.
 - Further adjustments of 180 degrees are available for diverse photo styles.
- 3. Using as a Selfie Stick:**
 - Fold the tripod legs back into the handle.
 - Extend the pole to your desired length.
 - Use the Bluetooth remote to capture photos or videos.
- 4. Attaching External Accessories:**
 - **Microphone:** Utilize the 1/4" nut for attaching external microphones.

- **Supplementary Lighting:** Mount LED lights or other lighting accessories onto the cold shoe seat.

MAINTENANCE

- Clean the device with a soft, dry cloth. Avoid using abrasive cleaners or solvents.
- Store the tripod in a cool, dry place away from direct sunlight and extreme temperatures.
- Ensure the telescopic pole sections are free from dust and debris to maintain smooth extension and retraction.
- Periodically check all screws and connections to ensure they are secure.

TROUBLESHOOTING

Problem: Bluetooth remote does not pair.

Solution: Ensure the remote is charged and powered on. Turn off and on your phone's Bluetooth. If the issue persists, try restarting both your phone and the remote.

Problem: Tripod feels unstable.

Solution: Ensure the tripod legs are fully extended and placed on a flat, stable surface. Do not overload the tripod beyond its weight capacity.

Problem: Pole does not extend or retract smoothly.

Solution: Check for any obstructions or debris in the telescopic sections. Clean the pole with a dry cloth. Avoid

forcing the pole if it resists movement.

SPECIFICATIONS
