# XYWHPGV Screw Thread Protector User Manual

Model: 24ad93c90ba6758c93db27a3b431d1

## 1. PRODUCT OVERVIEW

The XYWHPGV Screw Thread Protectors are flexible silicone end caps designed to provide protection for various items. They are ideal for preventing scuffs, covering exposed screw threads, nail heads, or acting as protective seals for furniture legs, pipes, and other round objects.

These caps are made from durable and insulated silicone rubber, ensuring a long service life and reliable protection.

Figure 1.1: A set of XYWHPGV Screw Thread Protector caps.

## 2. SETUP AND SIZE SELECTION

Proper size selection is crucial for effective protection. The silicone material is soft and elastic, allowing for a snug fit.

### 2.1. Measuring for Fit

To ensure a secure fit, it is recommended to choose a cap with an inner diameter that is slightly smaller than the outer diameter of the object you intend to protect. For example, if the outer diameter of your product is 9.8mm, select a cap with a 9.5mm inner diameter.

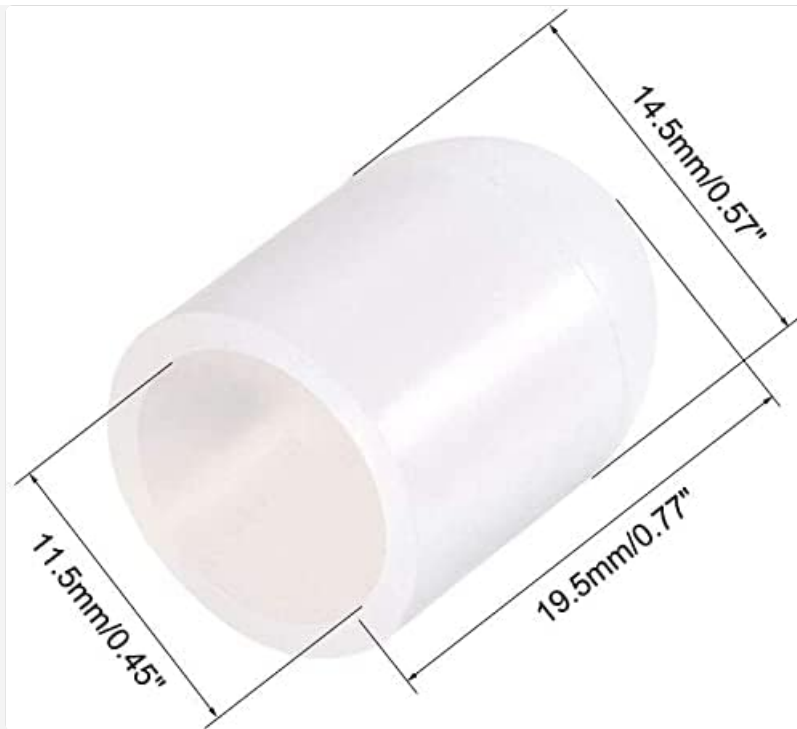

Figure 2.1: Dimensional specifications of a single XYWHPGV cap (11.5mm ID x 19.5mm H).

## 2.2. Application

Once the correct size is determined, simply slide the silicone cap over the end of the screw, pipe, furniture leg, or other object you wish to protect. The flexible nature of the silicone will allow it to conform and create a secure fit.

## 3. OPERATING INSTRUCTIONS

These caps are designed for passive protection. Once installed, they require no further operation. They will provide a protective barrier against scratches, impacts, and cover sharp edges or exposed threads.

- **Furniture Protection:** Place on chair legs, table legs, or bench feet to prevent floor scuffs.
- **Thread Protection:** Cover exposed screw threads or nail heads to prevent injury or damage to other surfaces.
- **Pipe/Tube End Protection:** Use on the ends of round pipes or tubes to seal or protect.

## 4. MAINTENANCE

The silicone material is highly durable and requires minimal maintenance.

- **Cleaning:** If the caps become dirty, they can be wiped clean with a damp cloth and mild soap. Rinse thoroughly and allow to air dry.
- **Inspection:** Periodically inspect the caps for any signs of wear or damage, especially if used in high-friction areas. Replace if significant wear is observed to maintain optimal protection.

## 5. TROUBLESHOOTING

### 5.1. Cap is Too Loose

If the cap slides off easily or does not provide a snug fit, it is likely that the selected cap's inner diameter is too large for the object. Refer to Section 2.1. "Measuring for Fit" and select a smaller size.

### 5.2. Cap is Too Difficult to Install or Does Not Fit

If the cap is extremely difficult to push on or does not fit at all, the selected cap's inner diameter is too small for the object. Select a slightly larger size. Remember that the silicone has some elasticity, but excessive force should not be required.

## 6. SPECIFICATIONS

Feature	Detail
Product Name	Screw Thread Protector
Brand	Generic
Model Number	24ad93c90ba6758c93db27a3b431d1
Material	Silicone Rubber
Color	White (Multiple Colors may be available for other variants)
Inner Diameter (ID)	11.5mm (0.45")
Height (H)	19.5mm (0.77")
Package Content	25 Pcs x High Temp Protective End Cap

## 7. SAFETY INFORMATION

While these caps are designed for protection, please observe the following general safety guidelines:
