Okinos Aqua 7

Okinos Aqua 7 ATX Mid Tower PC Case User Manual

Model: Aqua 7 (OKICC-AQUA7-ATXW-H6WA)

INTRODUCTION

This manual provides comprehensive instructions for the installation, operation, and maintenance of your Okinos Aqua 7 ATX Mid Tower PC Case. Please read this manual thoroughly before proceeding with assembly or use to ensure proper functionality and safety.

SAFETY INFORMATION

- Always disconnect the power supply from the wall outlet before performing any installation, maintenance, or cleaning procedures.
- Handle tempered glass panels with care to prevent breakage.
- Ensure proper grounding of all components to prevent electrical hazards.
- Keep small parts and packaging materials away from children.
- Do not operate the PC case in excessively humid or dusty environments.

PACKAGE CONTENTS

- Okinos Aqua 7 ATX Mid Tower PC Case
- 6 x 120mm PWM ARGB Fans (pre-installed)
- Accessory Box (screws, cable ties, etc.)
- User Manual

PRODUCT OVERVIEW

The Okinos Aqua 7 is an ATX mid-tower PC case designed for optimal airflow and aesthetic appeal. It features a panoramic tempered glass design, pre-installed ARGB fans, and a multi-functional I/O zone.

Figure 1: Okinos Aqua 7 ATX Mid Tower PC Case (White)

Key Features:

- **Panoramic Design:** Features fully glass-covered front and side panels for a 270° wide-angle view of internal components.
- **Optimized Airflow:** Synchronized dual-channel airflow design with pre-installed H12R PWM ARGB reverse fans (3 at PSU chamber, 2 at side) and 1 H12 PWM ARGB fan at the rear.
- **Exquisite Steel Mesh:** 1.2mm fine mesh design optimizes heat dissipation and provides dust resistance.
- **Multi-Functional Zone:** Includes power switch, ARGB fan control buttons, two USB 3.0 ports, audio jacks, and a Type-C 3.2 Gen 2 (10Gbps) interface.
- **Advanced Quick-Release Panels:** Front and side glass panels can be easily removed without screws, utilizing a secure rivet-mounted mechanism.
- **7-Slot PCIe Configuration:** Features 7 independent PCIe brackets, each secured with 7 screws for firm stability.
- **Removable Drive Tray & PSU Shock Absorbing:** User-friendly hard drive bays and EVA shock pads for the power supply.

Figure 2: Panoramic Design and Dimensions

Massive Air Intake

Vertical airflow channel, with 1.2mm mesh openings and combined with 3*H12 Reversed Fan.

No Air Intake

Absence of mesh openings at the bottom led to no vertical air intake.

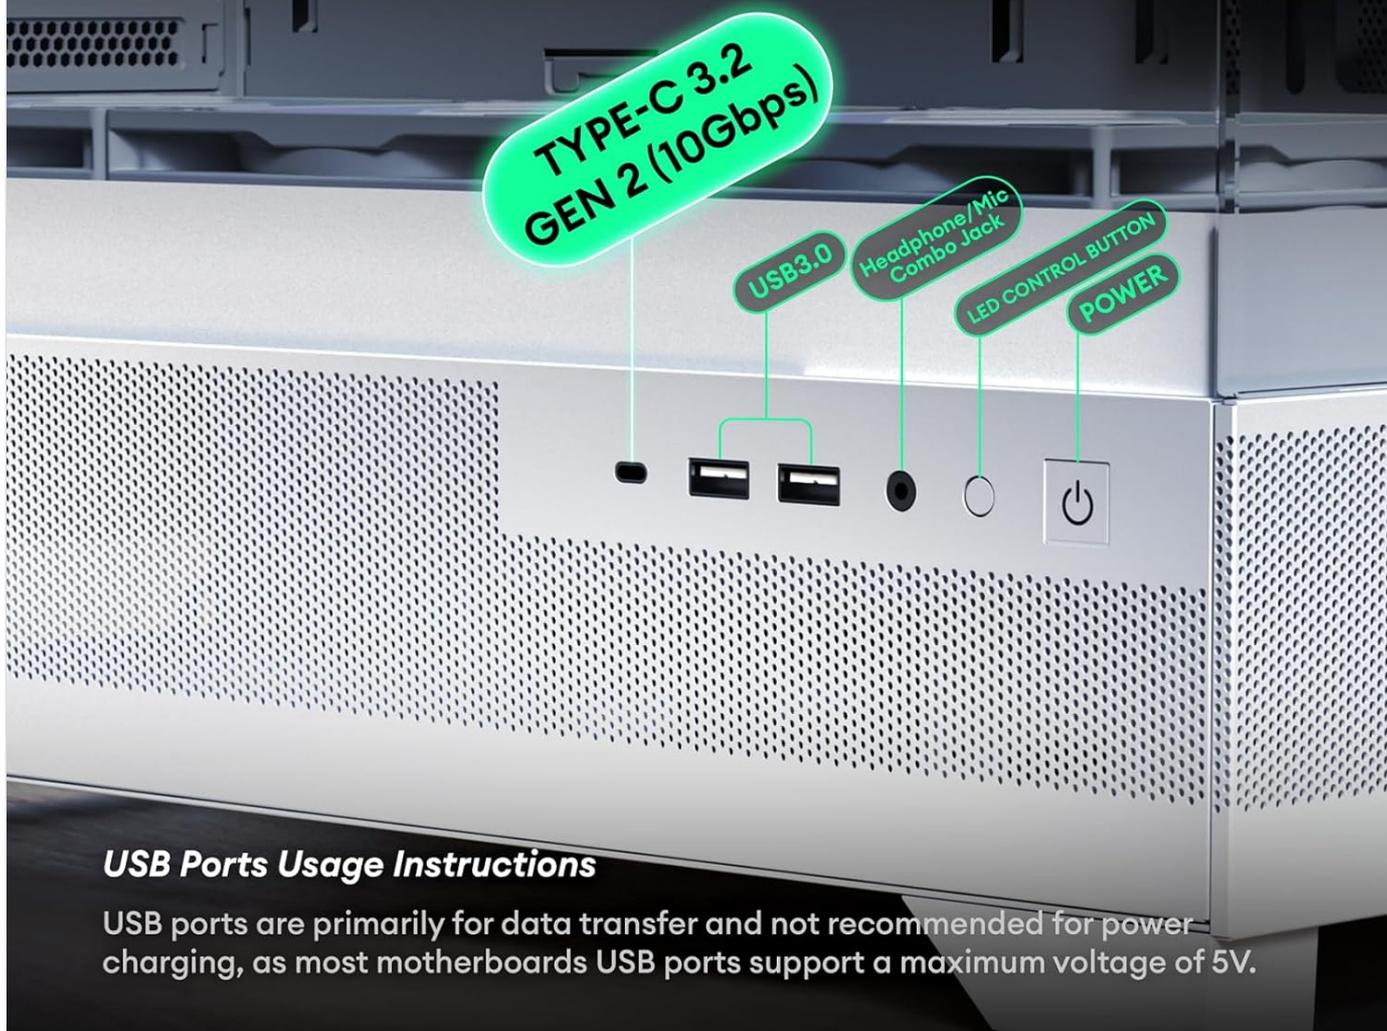

Figure 3: Airflow Design

Figure 4: Exquisite Steel Mesh

Mutli-Function Zone

Introducing Feature-Rich Multi-Functional Zone for Readily Accessible User-Computer Interaction.

USB Ports Usage Instructions

USB ports are primarily for data transfer and not recommended for power charging, as most motherboards USB ports support a maximum voltage of 5V.

Figure 5: Multi-Functional Zone

SETUP AND INSTALLATION

Follow these steps to install your components into the Okinos Aqua 7 PC case.

1. Preparing the Case

1. **Remove Side Panels:** Gently pull the quick-release tempered glass front and side panels to detach them from the case. This provides full access to the interior.
2. **Accessory Box:** Locate the accessory box inside the case, which contains all necessary screws and mounting hardware.

Advanced Quick-Release Panels

Facilitated Easy Removal of the Front and Side Glass Without the Need for Screws.

Figure 6: Quick-Release Panels

2. Motherboard Installation

3. **Install Standoffs:** Ensure the correct standoffs are installed for your motherboard size (ATX, MATX, or ITX).
4. **Mount Motherboard:** Carefully place your motherboard into the case, aligning it with the standoffs. Secure it with the provided screws.

3. Power Supply Unit (PSU) Installation

5. **Install PSU:** Slide the PSU into its designated compartment at the rear bottom of the case. Secure it with screws from the rear.
6. **EVA Shock Pads:** The PSU area is equipped with EVA shock pads to reduce vibrations.

Easily Removable Drive Tray And PSU EVA Shock Absorbing

Easily Removable Drive Tray
EVA Shock Pads, Effectively Reducing Vibrations During Operation Thus Protecting PSU

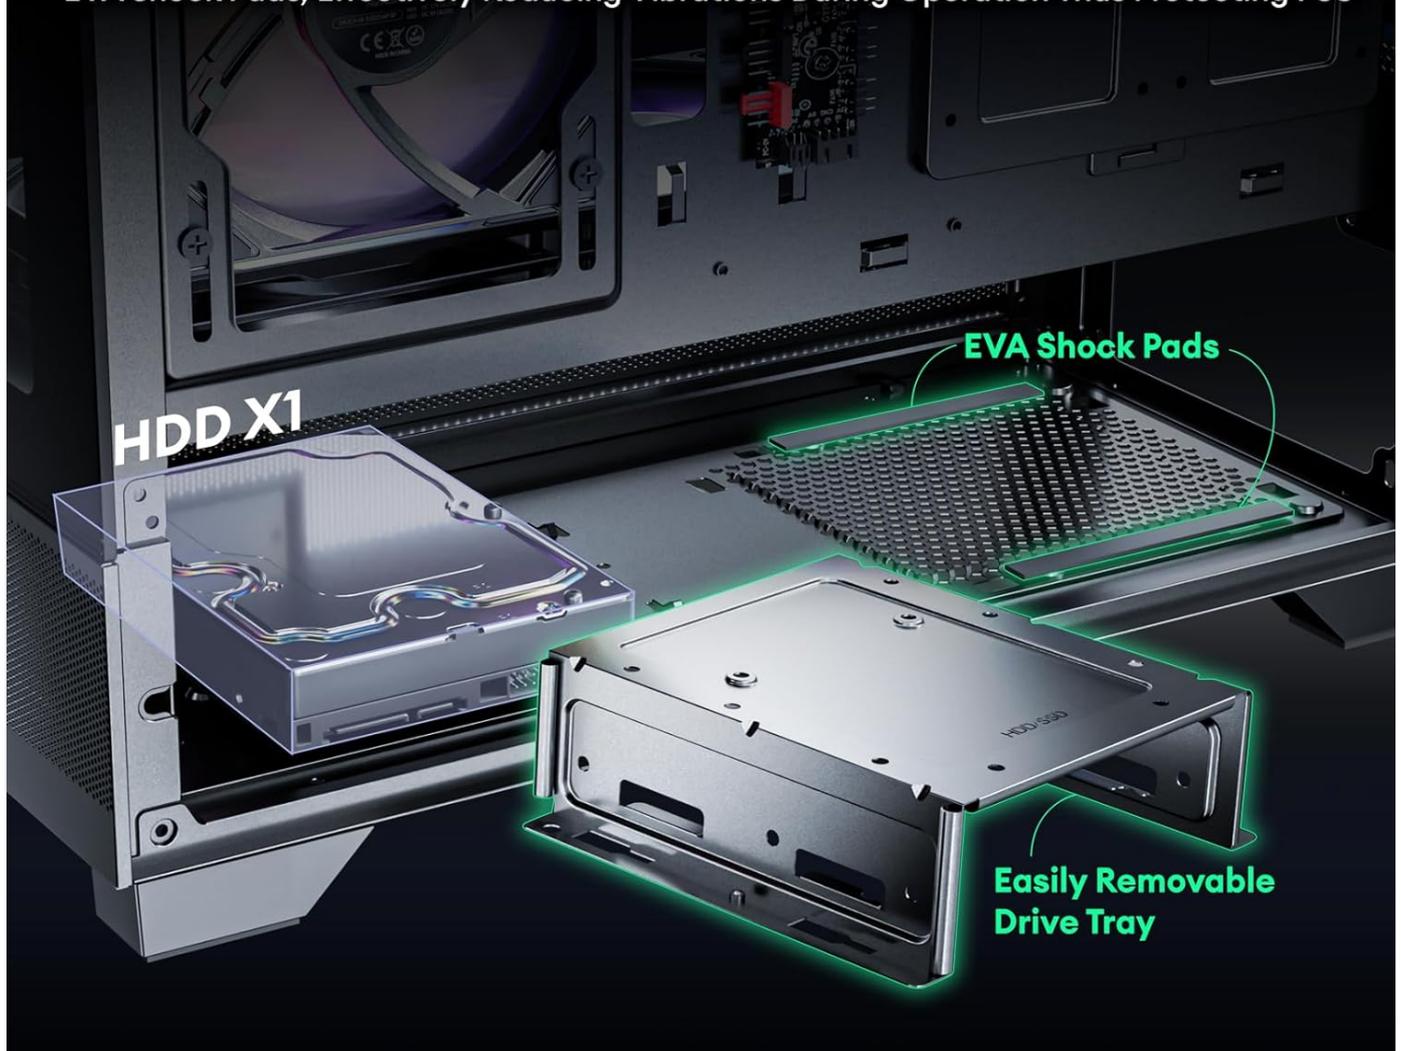

Figure 7: Drive Tray and PSU Shock Absorbing

4. Drive Installation (HDD/SSD)

7. **HDD:** Utilize the easily removable drive tray located near the PSU chamber for 3.5-inch HDDs.
8. **SSD:** Mount 2.5-inch SSDs in the designated slots on the back of the motherboard tray.

5. Graphics Card (GPU) Installation

9. **Remove PCIe Brackets:** Unscrew and remove the necessary PCIe brackets for your graphics card. The case features 7 independent PCIe brackets.
10. **Install GPU:** Insert your graphics card into the appropriate PCIe slot on the motherboard and secure it with screws. The case supports GPUs up to 410mm in length (270mm if an AIO is installed on the side panel).

Perfect Graphics Card Compatibility And Ample Cooling Space

Graphics Card Support Up to **RTX 4090** in length Even when side H12R x2 were installed
(Graphics Card Length will be Reduced to 270mm when AIO is Installed at Side Panel)

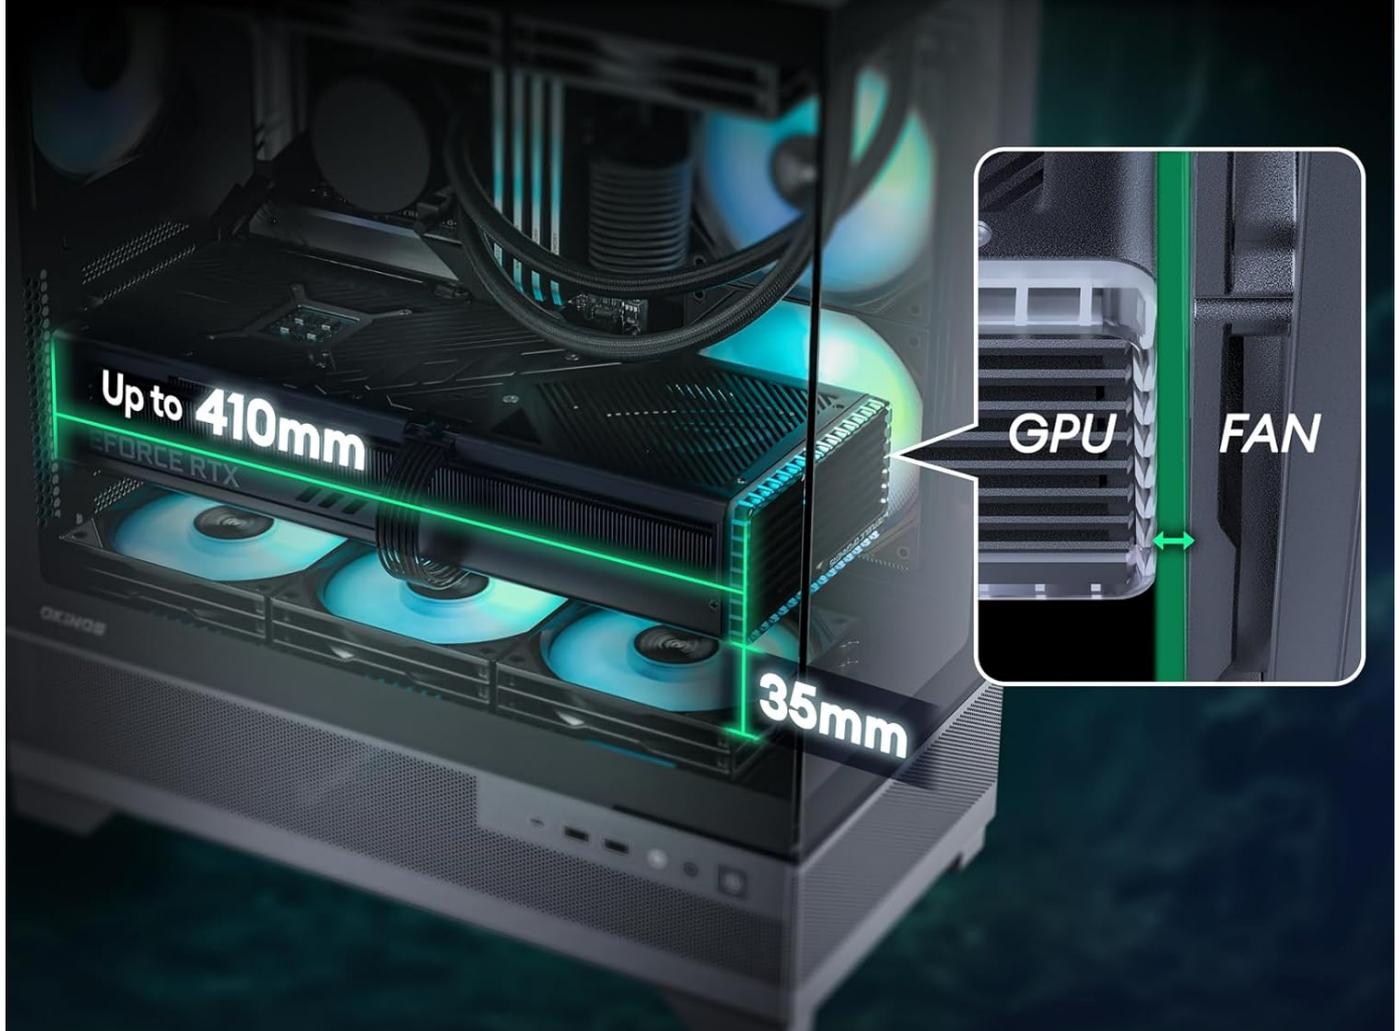

Figure 8: Graphics Card Compatibility

7-Slot PCIe Configuration

Aqua7 PCIe Brackets Feature 7 Independent PCIe Brackets, Each Secured with 7 Screws, Ensuring Firm Stability and Eliminating the Common Issue of Unevenness.

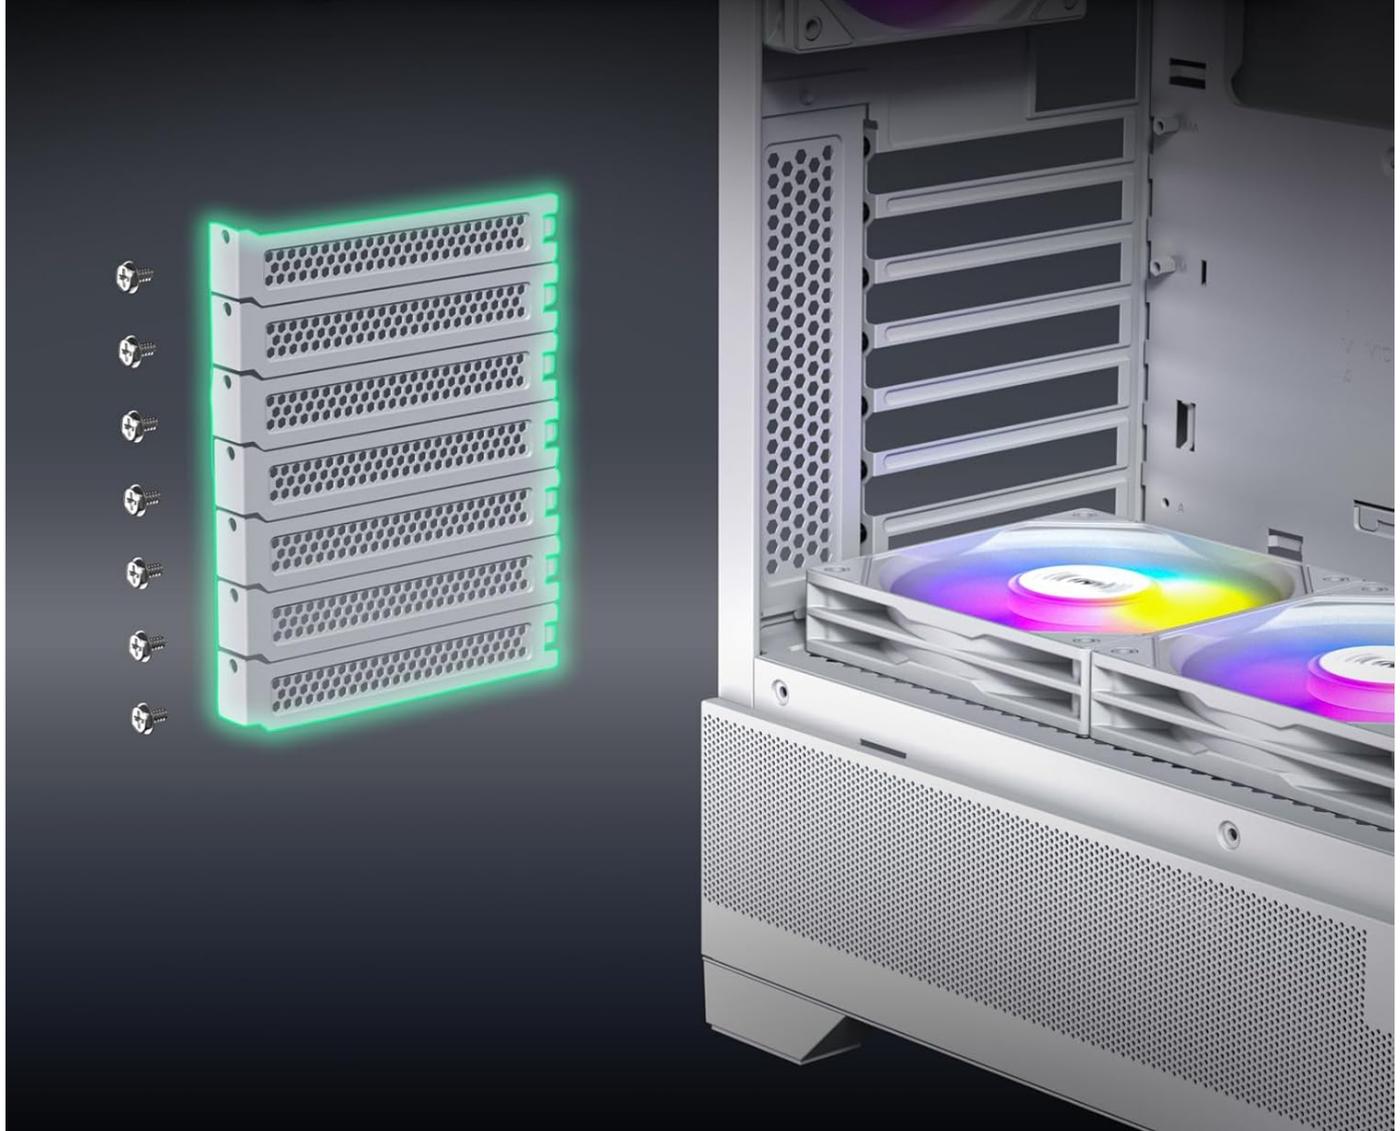

Figure 9: 7-Slot PCIe Configuration

6. Fan and Radiator Installation

11. **Pre-installed Fans:** The case comes with 6 x 120mm PWM ARGB fans pre-installed for optimal cooling.
12. **Additional Cooling:** The case can accommodate a 360mm radiator at the top and a 240mm radiator on the side simultaneously.
13. **PWM Header Connection:** To enable the PWM function for fan speed control, the controller's PWM connector **must** be plugged into the PWM header on the motherboard. Connecting it to the PUMP header will cause the fan to run at full speed.

Powerful Cooling And Easy Management

Rear
X1 H12
PWM ARGB Fan

PSU Chamber
X3 H12R
PWM ARGB Reverse Fans

Right Side
X2 H12R
PWM ARGB Reverse Fans

Fan Hub
6+6 PWM ARGB Fan Hub is included.

 To enable the PWM function, the controller's PWM connector must be **PLUGGED INTO THE PWM HEADER** on the motherboard. If wrongfully connected to the PUMP header, the fan will run at full speed. Do not connect it to the PUMP header!!

Figure 10: Powerful Cooling and Fan Hub

Experience Ultimate Cooling Solution

Accommodate 360mm Radiator at the Top and 240mm Radiator on the Side Simultaneously

Hurricane 120mm Reversed PWM ARGB Fan

Developed only for Aesthetics Panoramic 270° Wide Angle View Case

Provide **53.38 CFM** Through 9 Extended Arc Blade and Trio-Segmented Frame Design. Maintain 27.5 dbA.

Figure 12: Hurricane 120mm Reversed PWM ARGB Fan

7. Cable Management

13. **Route Cables:** Utilize the cable routing cutouts and tie-down points behind the motherboard tray to manage cables neatly.
14. **Connect Front Panel Cables:** Connect the front panel connectors (USB, audio, power, reset, LED control) to the corresponding headers on your motherboard.

OPERATING INSTRUCTIONS

Once all components are installed and the case is closed, you can begin operating your PC.

Front Panel Controls:

- **Power Button:** Press to power on or off your system.
- **LED Control Button:** Press to cycle through various ARGB lighting modes for the pre-installed fans. Hold to turn off the lighting.

- **USB 3.0 Ports:** For high-speed data transfer. Note: USB ports are primarily for data transfer and not recommended for power-charging, as most motherboards USB ports support a maximum voltage of 5V.
- **Type-C 3.2 Gen 2 (10Gbps) Port:** For fast data transfer with compatible devices.
- **Audio Jacks:** For connecting headphones and microphones.

MAINTENANCE

Regular maintenance helps ensure optimal performance and longevity of your PC case.

- **Dust Filters:** The case features a 1.2mm fine steel mesh design for dust resistance. Periodically clean the mesh panels to maintain optimal airflow.
- **Fan Cleaning:** Use compressed air to clean dust from the fan blades and heatsinks.
- **Exterior Cleaning:** Wipe the exterior surfaces, including the tempered glass panels, with a soft, damp cloth. Avoid abrasive cleaners.

TROUBLESHOOTING

If you encounter issues with your Okinos Aqua 7 PC case, refer to the following common problems and solutions.

- **Fans running at full speed:** Ensure the fan controller's PWM connector is plugged into the **PWM header** on your motherboard, not the PUMP header.
- **ARGB lighting not working:** Check all ARGB connections to the fan hub and ensure the hub is properly connected to the motherboard's ARGB header (if applicable) or powered correctly. Use the LED control button on the front panel to cycle modes.
- **USB ports not functioning:** Verify that the USB 3.0 and Type-C cables from the front panel are securely connected to the corresponding headers on your motherboard.
- **No power:** Confirm that the power supply is correctly installed and connected, and that the front panel power switch cable is properly connected to the motherboard.

SPECIFICATIONS

Feature	Specification
Model Name	Aqua 7
Item Model Number	OKICC-AQUA7-ATXW-H6WA
Dimensions (L x W x H)	17.17 x 8.27 x 19.13 inches (436mm x 210mm x 486mm)
Motherboard Compatibility	ATX / MATX / ITX
Case Type	Mid Tower
Material	Tempered Glass, Steel Mesh
Pre-installed Fans	6 x 120mm PWM ARGB Fans
Front I/O Ports	2 x USB 3.0, Audio Jacks, 1 x Type-C 3.2 Gen 2 (10Gbps), Power Button, LED Control Button
GPU Max Length	410mm (270mm with side AIO)

CPU Cooler Max Height	160mm
Radiator Support	Top: 360mm, Side: 240mm
Drive Bays	1 x 3.5" HDD, 2 x 2.5" SSD

WARRANTY AND SUPPORT

For warranty information and technical support, please refer to the official Okinos website or contact their customer service department. Keep your proof of purchase for warranty claims.
