1. SETUP AND ASSEMBLY

This section provides instructions for the proper assembly of your Flieks Wooden Daybed. Please ensure all components are present before beginning assembly. Two individuals are recommended for efficient and safe assembly.

1.1 Unpacking and Component Check

Carefully unpack all parts from the packaging. Lay them out on a clean, soft surface to prevent scratches. Verify that all hardware and wooden components are accounted for by comparing them against the included parts list in your product parcel.

If any parts are missing or damaged, do not proceed with assembly. Contact customer support immediately.

1.2 Assembly Steps

- 1. Prepare the Frame:** Begin by assembling the main frame components, including the headboard, footboard, and side rails. Ensure all connections are secure but do not fully tighten screws until the entire frame is loosely assembled.
- 2. Install Slat Support:** Position the wooden slats across the bed frame. These slats provide direct support for your mattress, eliminating the need for a box spring. Ensure slats are evenly spaced and securely fastened according to the instructions in your product parcel.
- 3. Assemble Drawers:** Construct the two storage drawers. Attach the drawer fronts, sides, and bottoms. Install the wheels or glides as specified.
- 4. Insert Drawers:** Once the main frame and drawers are assembled, slide the drawers into their

designated positions under the daybed.

5. **Final Tightening:** Once all components are in place and aligned, systematically tighten all screws and fasteners. Avoid over-tightening.

Refer to the detailed installation instructions included in your product packaging for specific diagrams and hardware identification.

2. OPERATING INSTRUCTIONS

The Flieks Wooden Daybed is designed for versatile use as both a comfortable bed and a functional seating area. Its integrated drawers provide convenient storage.

2.1 Using as a Bed

Place a full-size mattress directly onto the wooden slat support system. No box spring is required. Ensure the mattress fits securely within the frame dimensions.

2.2 Using as a Sofa/Seating Area

The three-sided rail design allows the daybed to function as a sofa. Arrange pillows and cushions against the back and side rails for comfortable seating in a living room or guest room setting.

2.3 Utilizing Storage Drawers

The two integrated drawers are designed for easy access and storage. Gently pull the drawers out from under the daybed to access their contents. Push them back in until they are flush with the bed frame for a tidy appearance.

- Avoid overloading the drawers to ensure smooth operation and prevent damage to the drawer mechanism.
- Distribute weight evenly within the drawers.

3. MAINTENANCE AND CARE

Proper care will extend the life and maintain the appearance of your Flieks Wooden Daybed.

3.1 Cleaning

- **Dusting:** Regularly dust the wooden surfaces with a soft, dry cloth.
- **Spot Cleaning:** For spills, immediately wipe with a slightly damp cloth. Avoid abrasive cleaners or harsh chemicals, which can damage the finish.
- **Avoid Excessive Moisture:** Do not use excessive water or allow liquids to sit on the wood surface.

3.2 Structural Integrity

- **Check Fasteners:** Periodically check all screws and bolts to ensure they remain tight. Re-tighten as necessary to maintain stability.
- **Avoid Jumping:** Do not jump on the daybed, as this can stress the frame and slat system.
- **Weight Capacity:** Adhere to the recommended weight capacity of 350 lbs to prevent structural damage.

4. TROUBLESHOOTING

This section addresses common issues you might encounter with your daybed.

4.1 Instability or Squeaking

- **Loose Connections:** Check all assembly bolts and screws. Tighten any that are loose.
- **Uneven Surface:** Ensure the daybed is placed on a flat, level surface. Adjust furniture glides if necessary.

- **Slat Placement:** Verify that all wooden slats are correctly positioned and secured.

4.2 Drawers Not Sliding Smoothly

- **Obstructions:** Check for any objects blocking the drawer's path or wheels.
- **Overloading:** Reduce the weight in the drawers if they are overloaded.
- **Wheel/Glide Damage:** Inspect the drawer wheels or glides for any damage or debris. Clean if necessary.

4.3 Damaged Components Upon Arrival

If you discover any damaged parts during unpacking or assembly, do not proceed with assembly. Contact Flieks customer support immediately with details and images of the damaged components for assistance with replacements.
