Some 3DS players have reported errors when inserting cards, which are related to the cracking of the machine system. DS series machines do not require cracking, so you will not encounter this problem. If you encounter this problem, please contact me and I will give you the solution immediately. Or you can fix it on your own with the file shared at the link below.

7. TROUBLESHOOTING

7.1. Game Cartridge Not Recognized or Errors on 3DS Consoles

Some 3DS console users may encounter errors when inserting game cards. These issues are often related to system modifications or "cracking" of the console. DS series machines (NDS, NDSL, NDSi) do not require such modifications, so these problems are typically not encountered on those systems.

If you experience recognition issues or errors on a 3DS console, it is recommended to:

- Ensure your 3DS system software is up to date.
- Clean the cartridge contacts and the console's game card slot.
- Consult the console's manufacturer support for issues related to system modifications.

For further assistance, please contact MOCINNA customer support.
