Operating Instructions

Using the Retractable Desk:

The bunk bed includes a retractable desk for flexible use. To use the desk, gently pull it out from its stored position. To store it, push it back into the unit until it is flush with the frame. Ensure the area around the desk is clear before extending or retracting.

Utilizing Storage:

- **Staircase Drawers/Shelves:** Use the drawers and open shelves within the staircase for storing books, toys, or clothing. Ensure items are placed securely to prevent them from falling.
- **Wardrobe:** The integrated wardrobe provides hanging space for clothes using the internal pole. The small shelf at

the head of the bed is suitable for small personal items.
- **Under-Bed Drawers:** The drawers located under the full bed can be used for additional storage of bedding or other items.

Maintenance

Proper maintenance will extend the life of your RORIGAT bunk bed.

- **Cleaning:** Wipe surfaces with a soft, damp cloth. Avoid harsh chemicals or abrasive cleaners, which can damage the finish.
- **Fastener Checks:** Periodically (e.g., every 3-6 months) inspect all bolts, screws, and connections. Tighten any that have become loose. Loose fasteners can compromise the structural integrity and safety of the bed.
- **Wood Care:** Protect the wood from excessive moisture and direct sunlight to prevent warping or fading.
- **Mattress Rotation:** Rotate mattresses regularly according to mattress manufacturer guidelines to ensure even wear and prolong their lifespan.

Troubleshooting

If you encounter issues with your bunk bed, refer to the following common solutions:

- **Squeaking Noises:**

  Cause: Loose fasteners or friction between wood components.

  Solution: Inspect all bolts and screws and tighten them securely. If squeaking persists, apply a small amount of paraffin wax or silicone spray to contact points between wooden parts (e.g., where slats rest on side rails).
- **Instability/Wobbling:**

  Cause: Uneven assembly or loose connections.

  Solution: Ensure the bed is on a level surface. Re-check all assembly connections and tighten any loose bolts. Verify that all components are correctly aligned as per the assembly instructions.
- **Drawers Sticking:**

  Cause: Misalignment, debris in tracks, or humidity.

  Solution: Check if the drawer is properly seated in its runners. Clear any dust or debris from the drawer tracks. If the issue is due to humidity, a dehumidifier in the room may help.

If problems persist, please contact customer support.
