

Vandlion V15Pro

Vandlion V15Pro 128GB Dictaphone User Manual

Model: V15Pro | Brand: Vandlion

1. PRODUCT OVERVIEW

The Vandlion V15Pro is a compact and powerful digital voice recorder designed for high-quality audio capture in various settings, including meetings, classes, and interviews. Featuring a durable metal casing and a large 128GB internal memory, it offers extended recording capabilities and ease of use.

Key features include one-touch recording, long battery life for up to 35 hours of continuous recording, and Voice Activated Recording (VOR) for efficient memory and battery usage. Its lightweight and portable design makes it an ideal tool for professionals and students alike.

Image: A detailed diagram of the Vandlion V15Pro Dictaphone, illustrating its compact dimensions (approximately 5.33 cm length, 3.18 cm width, 0.58 cm thickness) and highlighting its metal body, noise reduction chip, Voice Activated Recording (VOR) capability, and lightweight design (21g).

The device features a simple ON/OFF slide switch for recording, a USB-C port for charging and data transfer, and a small indicator light. The microphone is integrated into the device's body.

4. INITIAL SETUP

4.1 Charging the Device

Before first use, fully charge the dictaphone. A full charge takes approximately 2 hours.

1. Connect the provided USB-C cable to the dictaphone's USB-C port.
2. Connect the other end of the cable to a USB power adapter (not included) or a computer's USB port.
3. During charging, the red indicator light will flash. Once fully charged, the blue light will illuminate.
4. If recording while charging, the indicator light may not illuminate, which is normal.

4.2 Setting Date and Time

To ensure accurate timestamps for your recordings, set the device's date and time:

1. Connect the dictaphone to a computer using the USB-C cable.
2. Locate the 'SetTime' application or a text file (e.g., 'time.txt') on the device's storage.
3. Follow the instructions within the application or edit the text file to synchronize the device's time with your computer's system time.
4. **Important:** It is recommended to back up the original 'SetTime' file or text file on your computer before making any changes.

5. OPERATING INSTRUCTIONS

5.1 Basic Recording

The Vandlion V15Pro features simple one-touch recording:

1. To start recording, slide the ON/OFF switch to the **ON** position. The indicator light will briefly illuminate and then turn off, indicating that recording has begun discreetly.
2. To save the recording and stop, slide the ON/OFF switch to the **OFF** position. The device will automatically save the current recording file.

5.2 Playback

You can listen to your recordings directly from the device or by transferring them to a computer.

1. **Direct Playback:** Connect the provided headphones to the device via the remote control. Use the remote control to navigate and play back recordings.
2. **Computer Playback:** Connect the dictaphone to your computer. The device will appear as a removable drive. Navigate to the 'RECORD' folder to access and play your MP3 audio files.

5.3 Voice Activated Recording (VOR)

The V15Pro supports Voice Activated Recording, which automatically starts recording when sound is detected and pauses when there is silence. This feature helps conserve memory and battery life.

1. The VOR function can be configured via the device's settings file when connected to a computer. Refer to the 'SetTime' or configuration text file for detailed instructions on adjusting VOR sensitivity.
2. When VOR is active, the device will enter standby mode when no sound is detected, resuming recording

automatically when sound returns.

音声感知VOR録音

ボイスレコーダーが自動的に録音を行い、音声を感じできない時は、待機状態となります。

VOR録音機能はメモリとバッテリーを節約します。

Image: An illustration depicting the Voice Activated Recording (VOR) feature, showing the dictaphone on a table during a meeting with two individuals. Sound waves emanate from the device, indicating active recording when voices are present, and silence when they are not, demonstrating how VOR saves memory and battery.

5.4 Connecting to a Computer

To transfer files or configure settings, connect your dictaphone to a computer:

1. Ensure the dictaphone is turned **OFF** before connecting.
2. Connect the dictaphone to your computer using the provided USB-C cable.
3. Wait 20-30 seconds for the computer to recognize the device, especially with large memory capacities.
4. The dictaphone will appear as a removable disk drive. You can then drag and drop files to and from the device.
5. **For Mac Users:** You may need to use a USB-C adapter for proper connection.
6. **Driver Issues:** If the computer does not recognize the device, it may lack necessary drivers. Search online for "download computer drivers" or contact support.

5.5 Connecting to an Android Phone (with OTG)

You can connect the dictaphone to an Android phone that supports OTG (On-The-Go) functionality:

1. Ensure the dictaphone is turned **OFF** before connecting.
2. Verify that OTG function is enabled on your Android phone (usually found in Settings by searching for "OTG" or "USB").
3. Use an appropriate OTG adapter or cable to connect the dictaphone to your phone.
4. The phone should recognize the dictaphone as external storage, allowing you to manage files.

6. MAINTENANCE

Proper care will extend the life of your dictaphone:

- **Cleaning:** Wipe the device with a soft, dry cloth. Do not use liquid cleaners or solvents.
- **Storage:** Store the device in a cool, dry place away from direct sunlight, extreme temperatures, and humidity.
- **Battery Care:** To maintain battery health, avoid fully discharging the battery frequently. Charge the device regularly, even if not in use for extended periods.
- **Avoid Physical Damage:** The metal casing provides durability, but avoid dropping the device or exposing it to strong impacts.

7. TROUBLESHOOTING

If you encounter issues with your Vandlion V15Pro dictaphone, refer to the following common problems and solutions:

Problem	Solution
Cannot record or recording breaks.	<ul style="list-style-type: none">• Do not connect headphones, phones, computers, or other devices to the recorder during the recording process, as this will interrupt recording.• Do not format the dictaphone on a computer, as the memory format only supports FAT32. Incorrect formatting can cause issues.• If the device freezes or does not stop correctly, insert a needle into the reset hole to restart it.
SetTime software displays errors or viruses.	<ul style="list-style-type: none">• This is often a false alarm triggered by security software. It is not a real virus.• Ensure you have the latest version of the SetTime software. If issues persist, contact customer support for an updated version.

Problem	Solution
Indicator light does not turn on during charging.	<ul style="list-style-type: none"> • If you are recording while charging, it is normal for the indicator light not to illuminate. • When charging without recording, the red light should flash. The blue light will turn on when fully charged.
Digital dictaphone cannot connect to a computer or Android phone.	<ul style="list-style-type: none"> • Ensure the dictaphone is turned OFF before connecting to a computer or phone. • Wait 20-30 seconds for the system to recognize the large memory. • Try inserting a needle into the reset hole to restart the device. • For Android: Ensure OTG function is enabled in your phone's settings. • For Mac: You may need to use a USB-C adapter. • Check if your computer has the necessary drivers. Search online for "download computer drivers" if needed.
How to reduce recording noise.	<ul style="list-style-type: none"> • Place the dictaphone on a stable surface and avoid friction with other objects (e.g., bags, hands, clothing). • Keep the device away from noise sources like air conditioning units, keyboard typing, or running computers. • Avoid placing the dictaphone too close to your mouth, as this can lead to sound distortion. • For best results, record in a quiet environment.

8. TECHNICAL SPECIFICATIONS

Brand	Vandlion
Model Number	Vandlion-V15Pro
Memory Storage Capacity	128 GB
Recording Format	MP3 audio
Battery Type	1 Lithium-ion (included), Rechargeable
Continuous Recording Time	Up to 35 hours (after 2-hour charge)
Charging Interface	USB Type C

Headphone Jack	3.5 mm
Microphone Form Factor	Integrated
Item Weight	19 Grams
Color	Black
Compatible Devices	Computers, Android Phones (with OTG)
