TROUBLESHOOTING

If you encounter any issues with your bookshelf, please refer to the following common problems and solutions:

Problem	Possible Cause	Solution
Bookshelf is wobbly or unstable.	Uneven floor; loose connections; uneven weight distribution.	Ensure the bookshelf is on a level surface. Check and tighten all screws and bolts. Redistribute items on shelves for balanced weight.
Rotation is stiff or difficult.	Obstruction in the rotating mechanism; excessive weight; uneven loading.	Clear any debris from around the base. Reduce weight if overloaded. Ensure items are loaded evenly.
Scratches or damage to surfaces.	Rough handling; sharp objects.	While surfaces are anti-scratch, avoid dragging heavy or sharp objects. Use protective pads if necessary.
