Setup and Connection

The GuliKit KK3 controller supports both wired and wireless connections across various platforms. Specific pairing instructions may vary slightly depending on your device.

General Wireless Pairing

1. Ensure the controller is sufficiently charged.
2. Turn on the controller by pressing the Home button.
3. Activate pairing mode on the controller (refer to specific platform instructions below for button combinations).
4. On your device (PC, Switch, Android, iOS), navigate to Bluetooth settings and select the GuliKit KK3 controller from the list of available devices.
5. Confirm the connection. The controller's indicator lights will show a solid connection.

Wired Connection

Connect the controller to your device using the provided USB-C cable. The controller should be automatically recognized and ready for use.

Maintenance

To ensure the longevity and optimal performance of your GuliKit KK3 controller, follow these maintenance guidelines:

- **Cleaning:** Use a soft, dry cloth to wipe the controller. Avoid abrasive cleaners or solvents.
- **Storage:** Store the controller in a cool, dry place away from direct sunlight and extreme temperatures.
- **Charging:** Use only the provided USB-C cable or a certified equivalent for charging. Avoid overcharging.
- **Handling:** Avoid dropping the controller or subjecting it to strong impacts.

Troubleshooting

If you encounter issues with your GuliKit KK3 controller, consider the following common solutions:

- **Connection Issues:** Ensure the controller is charged. Re-attempt pairing with your device. For wireless connections, ensure no strong interference sources are nearby. For wired connections, try a different USB port or cable.
- **Unresponsive Buttons/Joysticks:** Check for any physical obstructions. Ensure the controller's firmware is up to date (check GuliKit's official website for updates).
- **Vibration Not Working:** Verify that vibration is enabled in your game settings and on the controller (if adjustable). Check the vibration level settings.
- **Controller Not Charging:** Ensure the USB-C cable is securely connected to both the controller and a power source. Try a different charging cable or power adapter.

If problems persist, please contact GuliKit customer support for further assistance.
