Please read this manual thoroughly to ensure safe and efficient use of your device.

2. GETTING STARTED: SETUP

2.1 Unboxing and Initial Charge

Upon unboxing your Samsung Galaxy A05 or A05S, ensure all components are present: the device, USB-C cable, and SIM ejector tool. Before first use, it is recommended to fully charge your device. Connect the USB-C cable to the phone's charging port and the other end to a compatible power adapter.

2.2 SIM Card and microSD Card Installation

Locate the SIM card tray on the side of your device. Use the provided SIM ejector tool to open the tray. Carefully place your Nano-SIM card(s) and an optional microSD card (for expanded storage) into the designated slots. Ensure the cards are correctly oriented as indicated on the tray. Gently push the tray back into the device until it clicks into place.

2.3 Powering On and Initial Setup

Press and hold the Power button (located on the side) until the Samsung logo appears. Follow the on-screen prompts to complete the initial setup. This includes selecting your language, connecting to a Wi-Fi network, accepting terms and conditions, and signing in to or creating a Google account. You will also be guided through setting up security features like a PIN, pattern, or fingerprint.

4. MAINTENANCE AND CARE

4.1 Battery Care

To maximize battery life, avoid extreme temperatures, use the original charger, and enable power-saving modes when needed. Avoid letting the battery drain completely or stay at 100% for extended periods.

4.2 Software Updates

Regularly check for software updates to ensure your device has the latest features, security patches, and performance improvements. Go to 'Settings' > 'Software update' > 'Download and install'.

4.3 Cleaning Your Device

Use a soft, lint-free cloth to clean the screen and body of your phone. For stubborn smudges, slightly dampen the cloth with water or a screen cleaner. Avoid using harsh chemicals or abrasive materials.

4.4 Storage Management and Backup

Periodically review your device's storage ('Settings' > 'Battery and device care' > 'Storage') and delete unnecessary files or apps. Regularly back up your important data to a cloud service (like Google Drive or Samsung Cloud) or a computer to prevent data loss.

5. TROUBLESHOOTING COMMON ISSUES

5.1 Device Not Turning On

Ensure the battery is charged. If the device still doesn't turn on, try a forced restart by pressing and holding the Volume Down button and the Power button simultaneously for about 7-10 seconds.

5.2 Apps Crashing or Freezing

Close and reopen the app. If the issue persists, clear the app's cache and data via 'Settings' > 'Apps' > [App Name] > 'Storage'. As a last resort, uninstall and reinstall the app.

5.3 Connectivity Problems (Wi-Fi/Bluetooth/Mobile Data)

Toggle the respective connection off and on. Restart your device. For Wi-Fi, try forgetting the network and reconnecting. For mobile data, ensure your SIM card is properly inserted and your data plan is active.
