

FOHERE 1158

FOHERE Manual Citrus Juicer Squeezer (Model 1158)

User Instruction Manual

1. INTRODUCTION

Thank you for choosing the FOHERE Manual Citrus Juicer Squeezer, Model 1158. This robust and efficient hand press juicer is designed to extract juice from a variety of fruits, including oranges, lemons, grapefruits, pomegranates, and grapes. Constructed from heavy-duty cast iron and food-grade stainless steel, it offers durability and ease of use. The detachable components ensure simple cleaning and maintenance.

This manual provides essential information for the safe and effective operation of your juicer. Please read it thoroughly before first use and retain it for future reference.

2. SAFETY INSTRUCTIONS

To ensure safe operation and prevent injury or damage, please observe the following precautions:

- Always place the juicer on a stable, flat, and non-slip surface before use. The thickened cast iron base with anti-slip feet is designed for stability.
- Keep hands and fingers clear of the pressing mechanism during operation to avoid pinching.
- This is a manual juicer and does not use electricity or contain sharp blades, making it inherently safer than electric alternatives.
- Ensure all detachable parts (pressure cap, strainer, funnel) are correctly assembled before juicing.
- Supervise children when the juicer is in use or accessible.
- Do not attempt to juice fruits that are too large for the strainer or excessively hard, as this may damage the unit.

3. PARTS OVERVIEW

Familiarize yourself with the main components of your FOHERE Manual Citrus Juicer:

- **Cast Iron Lever:** The handle used to apply pressure for juicing.

- **Pressure Cap:** The top component that presses down on the fruit. Made of 304 stainless steel.
- **Strainer:** The perforated component that holds the fruit and separates pulp from juice. Made of 304 stainless steel.
- **Funnel:** Collects the juice and directs it into the cup. Made of 304 stainless steel.
- **Cast Iron Base:** Provides stability and support for the entire unit.
- **Anti-Slip Feet:** Located on the base to prevent movement during use.
- **Stainless Steel Cup:** A 400ml (13.5oz) cup included for collecting juice.

This image illustrates the main detachable parts of the juicer, highlighting the 304 food-grade stainless steel construction of the pressure cap, strainer, and funnel, which are designed for durability and hygiene.

4. SETUP

Your FOHERE Manual Citrus Juicer comes largely pre-assembled. Follow these steps for initial setup:

1. Unpack all components from the packaging.
2. Place the cast iron base on a clean, stable countertop. Ensure the anti-slip feet are firmly gripping the surface.
3. Insert the stainless steel funnel into the designated slot on the base.
4. Place the stainless steel strainer securely on top of the funnel.
5. Ensure the pressure cap is attached to the lever mechanism. It should align directly above the strainer.
6. Before first use, wash all detachable stainless steel parts (pressure cap, strainer, funnel, and included cup) with warm, soapy water. Rinse thoroughly and dry.

This image displays the complete juicer unit, demonstrating its compact and sturdy design once assembled.

5. OPERATING INSTRUCTIONS

Follow these steps to effectively juice your fruits:

- 1. Prepare the Fruit:** Cut the fruit (e.g., orange, lemon, grapefruit) in half. For pomegranates, it is recommended to cut them into quarters for easier juicing.
- 2. Position the Cup:** Place the included 400ml stainless steel cup, or another suitable container, directly under the funnel to collect the juice.
- 3. Lift the Lever:** Raise the juicer's lever to its highest position. This ensures maximum clearance for placing the fruit and prevents the lever from falling unexpectedly.
- 4. Place the Fruit:** Position one half of the cut fruit onto the strainer, cut-side down.
- 5. Begin Juicing:** Hold the back of the juicer's base firmly with one hand for stability. With the other hand, slowly and steadily press the lever down. Apply consistent pressure until all the juice is extracted.
- 6. Repeat:** Lift the lever, remove the squeezed fruit half, and repeat the process with the next fruit piece.

Squeeze out Every Drop of Juice

Rich in vitamins and nutrients

Higher juice yield, less waste

This image shows a hand pressing down the lever to extract juice from an orange, illustrating the ergonomic design and ease of use.

Share Juice with Family and Friends

Comes with a 13.5oz stainless steel cup

This image demonstrates the effectiveness of the juicer in extracting a high volume of juice, leaving behind only the pulp and rind.

6. MAINTENANCE AND CLEANING

Regular cleaning and maintenance will ensure the longevity and hygienic operation of your juicer:

- 1. Disassembly:** After each use, lift the lever and carefully remove the pressure cap, strainer, and funnel

from the main unit.

2. **Rinsing:** Rinse all detachable stainless steel parts under running water to remove any pulp or juice residue.
3. **Washing:** The pressure cap, strainer, funnel, and stainless steel cup are dishwasher safe. Alternatively, wash them by hand with warm, soapy water and a soft brush or sponge.
4. **Drying:** Ensure all parts are thoroughly dried before reassembly or storage to prevent water spots or corrosion.
5. **Base Cleaning:** Wipe down the cast iron base with a damp cloth. Do not immerse the base in water.
6. **Storage:** Store the juicer in a clean, dry place.

Upgraded Thickened Base

This image illustrates the ease of cleaning the juicer's removable parts, showing both manual rinsing and placement in a dishwasher.

7. TROUBLESHOOTING

If you encounter any issues with your FOHERE Manual Citrus Juicer, please refer to the following common solutions:

Problem	Possible Cause	Solution
Low juice yield	Insufficient pressure applied; fruit not ripe enough; fruit too large for strainer.	Apply more consistent pressure; use ripe fruit; cut larger fruits into smaller pieces (e.g., pomegranates into quarters).
Juicer slides on countertop	Surface is wet or slippery; anti-slip feet are dirty.	Ensure countertop is dry and clean; clean the anti-slip feet.
Lever feels stiff or difficult to press	Fruit is too hard or too large; mechanism needs lubrication.	Use softer, ripe fruit or cut into smaller pieces. If stiffness persists, apply a small amount of food-grade lubricant to the pivot points of the lever mechanism.
Pulp or seeds in juice	Strainer not properly seated; fruit placed incorrectly.	Ensure the strainer is securely placed on the funnel. Position the fruit cut-side down directly on the strainer.

8. SPECIFICATIONS

Feature	Detail
Brand	FOHERE
Model Number	1158 (WM-1158)
Color	Black and Silver
Material	Cast Iron (Base, Lever), 304 Stainless Steel (Pressure Cap, Strainer, Funnel, Cup)
Product Dimensions (L x W x H)	7.1"D x 8.7"W x 15.4"H
Item Weight	14 pounds
Capacity (Included Cup)	400 Milliliters (13.5 oz)
Power Source	Manual
Dishwasher Safe	Yes (Removable stainless steel parts)
Recommended Uses	Orange, Lemon, Grapefruit, Pomegranate, Grape
UPC	762765693728

9. WARRANTY AND SUPPORT

FOHERE is committed to providing high-quality products. For specific warranty information, please refer to the documentation included with your purchase or contact FOHERE customer support directly. If you have any

questions, require assistance, or need to report an issue, please reach out to our customer service team.

Customer Support: Please visit the FOHERE official website or refer to your purchase receipt for contact details.
