JSAUX HB1201S

JSAUX HB1201S 12-in-1 RGB Docking Station User Manual

Model: HB1201S

1. INTRODUCTION

The JSAUX HB1201S 12-in-1 RGB Docking Station is designed to expand the connectivity and enhance the gaming experience for handheld consoles such as the Steam Deck (OLED), ROG Ally, and Legion Go. This manual provides detailed instructions for setting up, operating, and maintaining your docking station.

The JSAUX HB1201S RGB Docking Station connected to a Steam Deck, illustrating its compact design and multiple ports for peripheral connections.

2. PACKAGE CONTENTS

- JSAUX HB1201S 12-in-1 RGB Docking Station
- USB-C to USB-C Host Cable
- User Manual / Documentation

3. PRODUCT FEATURES OVERVIEW

The JSAUX HB1201S offers a comprehensive set of ports and features to enhance your handheld gaming experience:

12-IN-1 RGB DOCKING STATION

An exploded view diagram highlighting all 12 ports of the docking station, including HDMI, DisplayPort, USB-C PD, USB-A, USB-C data, Gigabit Ethernet, 3.5mm audio, SD, and TF card slots.

Port Specifications:

- 1x HDMI 2.1:** Supports 4K@120Hz output with VRR, ALLM, and HDR.
- 1x DisplayPort 1.4:** Supports 4K@120Hz output.
- 2x USB A 3.2:** Provides 10Gbps data transfer speed.
- 1x USB C 3.2:** Provides 10Gbps data transfer speed (no video output).

- **1x Gigabit Ethernet:** Offers 1Gbps wired network connectivity.
- **1x USB C PD 3.0:** Supports up to 100W power delivery for charging.
- **1x 3.5mm Audio Jack:** For audio output to headphones or speakers.
- **1x TF Card Slot:** Supports 480Mbps data transfer.
- **1x SD Card Slot:** Supports 480Mbps data transfer.
- **1x USB A 2.0:** Provides 480Mbps data transfer speed.

Additional Features:

- **6 RGB Lighting Modes:** Customizable lighting effects with a top-mounted touch switch and OpenRGB software compatibility.
- **Retractable Stand:** Integrated stand for holding your handheld device.

4. SETUP INSTRUCTIONS

1. **Connect Power:** Plug a compatible USB-C Power Delivery (PD) adapter (not included) into the USB C PD port on the docking station. Ensure the power adapter provides sufficient wattage (up to 100W supported) for your handheld device and connected peripherals.
2. **Connect Host Device:** Use the provided USB-C to USB-C host cable to connect your handheld gaming device (e.g., Steam Deck, ROG Ally, Legion Go) to the 'HOST' USB-C port on the docking station.
3. **Connect External Display(s):**
 - For single display: Connect an HDMI cable from the docking station's HDMI port to your monitor or TV, or a DisplayPort cable from the docking station's DisplayPort to your monitor.
 - For dual displays: Connect one monitor via HDMI and another via DisplayPort. Note that dual-screen support maxes out at 4K@60Hz or 2K@120Hz.
4. **Connect Peripherals:** Plug in your USB devices such as keyboards, mice, game controllers, or external storage drives into the available USB A 3.2, USB C 3.2, or USB A 2.0 ports.
5. **Connect Network (Optional):** For a stable wired internet connection, connect an Ethernet cable from your router or modem to the Gigabit Ethernet port on the docking station.
6. **Insert Memory Cards (Optional):** If using, insert SD or TF cards into their respective slots. It is recommended to insert memory cards before gaming and avoid unplugging them during active use. Simultaneous reading of SD and TF cards is not supported.
7. **Audio Connection (Optional):** Connect headphones or speakers to the 3.5mm audio jack for audio output.

5. OPERATING INSTRUCTIONS

5.1 Display Output

The docking station supports high-resolution video output to external displays. Connect your monitor or TV using either the HDMI or DisplayPort. The upgraded HDMI technology supports Variable Refresh Rate (VRR), Auto Low Latency Mode (ALLM), and HDR for an optimized visual experience.

Immersion Experience

Upgraded HDMI technology for optimal gaming experience

VRR Variable Refresh Rate

ALLM Auto Low Latency Mode

HDR High Dynamic Range

QFT Quick Frame Transport

A user playing a game on a large television, with their Steam Deck connected to the docking station, demonstrating the enhanced visual experience provided by VRR, ALLM, and HDR technologies.

Dual Screen Display:

- **Windows:** Supports both mirror (A-AA, A-BB) and extend (A-BC) modes.
- **MAC OS:** Supports mirror mode (A-AA, A-BB).

The maximum resolution for dual-screen output is 4K@60Hz or 2K@120Hz.

HDMI Output 4K@120Hz HDR

HDMI and DisplayPort for Seamless Dual-Monitor Setup

DisplayPort Output
4K@120Hz

HDMI Output
4K@120Hz HDR

(i) NOTE: The availability of dual video output depends on the compatibility of the device you are using.

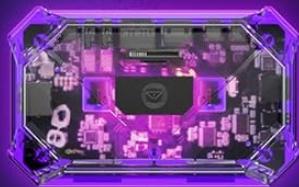

A Steam Deck connected to two external monitors, illustrating the dual-screen display capability of the docking station using both HDMI and DisplayPort outputs at 4K@120Hz.

5.2 RGB Lighting Control

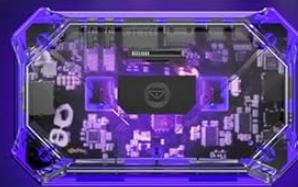

The docking station features six dynamic RGB lighting modes. Use the top-mounted touch switch to cycle through the modes or turn the lighting on/off. For custom lighting control, the dock is compatible with OpenRGB software when connected via the USB-C upstream port.

6. COMPATIBILITY

The JSAUX HB1201S RGB Docking Station is compatible with a wide range of handheld gaming consoles and other devices, including:

- Valve Steam Deck

- Steam Deck OLED
- ASUS ROG Ally
- ASUS ROG Ally X
- Lenovo Legion Go
- MSI Claw
- OneXPlayer
- AYANEO Slide
- iPad, iPad Pro, iPhone
- Razer Edge
- Logitech G Cloud
- Other USB-C enabled phones and tablets

Note: Not compatible with Nintendo Switch.

Perfectly Compatible

30W Turbo

Supports 30W Turbo Mode
for ROG Ally

ⓘ NOTE: Not compatible with Nintendo Switch

7. MAINTENANCE

To ensure the longevity and optimal performance of your JSAUX HB1201S Docking Station, follow these maintenance guidelines:

- Keep the device clean by wiping it with a soft, dry cloth. Avoid abrasive cleaners or solvents.

- Protect the docking station from extreme temperatures, direct sunlight, and moisture.
- Avoid dropping or subjecting the device to strong impacts.
- Ensure proper ventilation around the device during operation.

8. TROUBLESHOOTING

If you encounter issues with your docking station, refer to the following common solutions:

- **No Display Output:**

- Ensure all cables (USB-C host, HDMI/DisplayPort) are securely connected.
- Verify that the external display is set to the correct input source.
- Check if your handheld device's display settings are configured for external output.
- Ensure the docking station is receiving adequate power from a compatible PD charger.

- **Slow Data Transfer:**

- Confirm that you are using the USB 3.2 ports for high-speed devices.
- Ensure your connected device and cable support USB 3.2 speeds.

- **Charging Issues:**

- Verify that your USB-C PD power adapter meets the wattage requirements of your handheld device.
- Ensure the power cable is securely connected to both the adapter and the docking station.

- **RGB Lighting Not Working:**

- Press the top-mounted touch switch to activate or cycle through lighting modes.
- Ensure the docking station is powered on.

- **Network Connectivity Problems:**

- Check the Ethernet cable connection to both the dock and your router/modem.
- Verify network settings on your handheld device.

[JSAUX SP0213/SP0214 Phone Stands for Tesla - User Guide and Specifications](#)

Detailed information on JSAUX Magnetic Phone Stand for Car (SP0213) and Electric Phone Stand for Tesla (SP0214), including features, usage instructions, product parameters, and packing lists.

Q1: Does the magnetic holder fit most car models on the market?
It's a magnetic holder, so it can be used on most car models.
Q2: Which Tesla car models are compatible?
The magnetic holder is compatible with most Tesla models, such as Model 3, Model Y, Model S, Model X, Model 3, and Model Y.
Q3: Does the car need to be turned on?
No, the magnetic holder can be used on the car even with it turned off, as long as the car has a metal body.
Q4: Why is the magnetic holder not working?
If the magnetic holder is not working, please check the car's body and the metal parts of the holder. If the car's body is not magnetic, the holder will not work. If the metal parts of the holder are not magnetic, the holder will not work.
Q5: Is it possible to use the magnetic holder on a Tesla Model 3?
Yes, the magnetic holder is compatible with most Tesla models, including the Model 3.
Q6: How do I clean the magnetic holder?
Clean the magnetic holder with a soft cloth and a mild detergent. Avoid using abrasive materials or harsh chemicals.
Q7: Can the magnetic holder be used on an iPhone 15 Pro Max using a USB-C to USB-A cable?
Yes, the magnetic holder is compatible with most iPhone models.
Q8: Can the magnetic holder be used on an iPhone 15 Pro Max using a USB-C to USB-C cable?
Yes, the magnetic holder is compatible with most iPhone models.
Q9: Can the magnetic holder be used on an iPhone 15 Pro Max using a USB-C to USB-B cable?
Yes, the magnetic holder is compatible with most iPhone models.
Q10: Can the magnetic holder be used on an iPhone 15 Pro Max using a USB-C to USB-C cable?
Yes, the magnetic holder is compatible with most iPhone models.
