Vacbird W8-8T-VAC

Vacbird Travel Vacuum Storage Bag Set with Electric USB Pump

Model: W8-8T-VAC

INTRODUCTION

This manual provides instructions for the Vacbird Travel Vacuum Storage Bag Set with Electric USB Pump. This set is designed to maximize luggage space and protect your belongings during travel or storage. Please read this manual carefully before use to ensure proper operation and longevity of your product.

PRODUCT OVERVIEW

The Vacbird Travel Vacuum Storage Bag Set includes a variety of vacuum bags and a portable electric USB pump for convenient compression.

Included Components:

- 3 x Small Vacuum Bags (15.8 x 15.8 inches / 40 x 40 cm)
- 3 x Medium Vacuum Bags (15.8 x 19.7 inches / 40 x 50 cm)
- 2 x Large Vacuum Bags (15.8 x 23.6 inches / 40 x 60 cm)
- 1 x Electric USB Travel Pump

Key Features:

- **Space-Saving Design:** Compresses clothing and other items by up to 80% to maximize luggage and storage space.
- **Portable Electric USB Pump:** Powered by USB, allowing for easy use with mobile phones, laptops, or power banks.
- **Superior Sealing:** Features a triple-seal turbo valve and a double zipper seal for airtight storage.
- **Durable Material:** Made from PA+PE material to protect contents from water, air, dirt, dust, and other damages.
- **Reusable:** Designed for multiple uses, offering an eco-friendly storage solution.
- **Transparent Design:** Allows for easy identification of contents without opening the bag.

Effective Protection

SETUP

Before using your Vacbird vacuum storage bags, ensure all components are present and in good condition.

1. **Unpack Components:** Remove all vacuum bags and the electric USB pump from their packaging.
2. **Inspect Bags:** Check each vacuum bag for any tears or damage that could compromise the seal.
3. **Prepare Pump:** Ensure the electric USB pump is clean and the USB cable is ready for connection to a power source.

OPERATING INSTRUCTIONS

Follow these steps to effectively use your Vacbird vacuum storage bags and electric pump:

1. **Open the Bag:** Unzip the double zipper seal completely.
2. **Place Items:** Fold your clothes or other soft items neatly and place them inside the vacuum bag. Do not overfill the bag; leave enough space for the zipper to close easily.

3. **Seal the Bag:** Use the provided blue slider to firmly close the double zipper seal. Run the slider across the zipper multiple times to ensure a complete and airtight seal.
4. **Open the Valve:** Unscrew the blue cap from the air valve on the bag.
5. **Connect the Pump:** Connect the electric USB pump to a USB power source (e.g., power bank, laptop, wall adapter). Place the pump directly over the air valve, ensuring a snug fit.
6. **Start Vacuuming:** Turn on the electric pump. The pump will begin to extract air from the bag. Allow the pump to run until the bag is fully compressed and all air has been removed. This typically takes about 1 minute per bag.
7. **Remove Pump and Close Valve:** Once compressed, turn off the pump and carefully remove it from the valve. Immediately screw the blue cap back onto the valve tightly to prevent air from re-entering.

MAINTENANCE

Proper care and maintenance will extend the life of your Vacbird vacuum storage bags and pump.

- **Cleaning Bags:** Wipe the bags with a damp cloth and mild soap if necessary. Ensure they are completely dry before storing or reusing. Do not machine wash.
- **Cleaning Pump:** Wipe the electric pump with a dry cloth. Do not immerse the pump in water.
- **Storage:** Store the bags and pump in a cool, dry place away from direct sunlight and sharp objects.
- **Avoid Overfilling:** Do not overfill the bags, as this can strain the zipper and material, leading to damage.
- **Check Seals:** Before each use, inspect the zipper and valve for any debris or damage that could prevent an airtight seal.

TROUBLESHOOTING

If you encounter issues with your Vacbird vacuum storage bags, refer to the following common problems

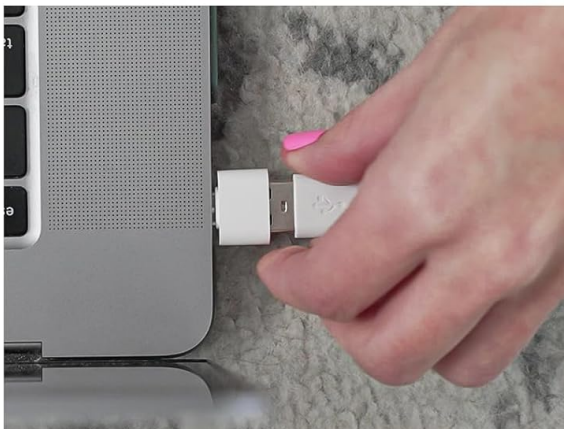

and solutions:

Problem	Possible Cause	Solution
Bag does not compress or re-inflates	Zipper not fully sealed, valve cap loose, bag damage, or pump not properly placed.	Ensure the double zipper is completely sealed using the slider. Tighten the blue valve cap. Check the bag for punctures or tears. Ensure the pump is firmly seated over the valve.
Electric pump not turning on	No power, loose USB connection, or pump malfunction.	Verify the USB power source is active. Check the USB cable connection to both the pump and the power source. Try a different USB port or power source.
Slow compression	Bag overfilled, small leak, or pump not fully aligned.	Reduce the amount of items in the bag. Re-check the zipper seal and valve cap. Ensure the pump is centered and flush with the valve.

SPECIFICATIONS

- **Model Number:** W8-8T-VAC
- **Material:** Polyethylene (PE) Nylon
- **Color:** Transparent
- **Bag Sizes Included:**
 - Small: 15.8 x 15.8 inches (40 x 40 cm) - 3 bags
 - Medium: 15.8 x 19.7 inches (40 x 50 cm) - 3 bags
 - Large: 15.8 x 23.6 inches (40 x 60 cm) - 2 bags
- **Pump Power:** USB-powered
- **Special Feature:** Vacuum Sealed
- **Item Weight:** Approximately 549 g (total package)
- **Manufacturer:** Vacbird
