# KitchenAid Fully Automatic Espresso Machine KF6 User Manual

Model: KES8556SX | Brand: KitchenAid

## INTRODUCTION

This manual provides detailed instructions for the setup, operation, and maintenance of your KitchenAid Fully Automatic Espresso Machine KF6, model KES8556SX. Please read this manual thoroughly before using the appliance to ensure safe and efficient operation. Keep this manual for future reference.

## IMPORTANT SAFETY INSTRUCTIONS

When using electrical appliances, basic safety precautions should always be followed, including the following:

- Read all instructions before operating the espresso machine.
- Do not touch hot surfaces. Use handles or knobs.
- To protect against fire, electric shock, and injury to persons, do not immerse cord, plugs, or espresso machine in water or other liquid.
- Close supervision is necessary when any appliance is used by or near children.
- Unplug from outlet when not in use and before cleaning. Allow to cool before putting on or taking off parts, and before cleaning the appliance.
- Do not operate any appliance with a damaged cord or plug or after the appliance malfunctions, or has been damaged in any manner. Return appliance to the nearest authorized service facility for examination, repair, or adjustment.
- The use of accessory attachments not recommended by the appliance manufacturer may result in fire, electric shock, or injury to persons.
- Do not use outdoors.
- Do not let cord hang over edge of table or counter, or touch hot surfaces.
- Do not place on or near a hot gas or electric burner, or in a heated oven.
- Always attach plug to appliance first, then plug cord into the wall outlet. To disconnect, turn any control to "off", then remove plug from wall outlet.
- Do not use appliance for other than intended use.

## SETUP GUIDE

---

### 1. Unpacking

Carefully remove all packaging materials and accessories from the box. Retain packaging for future transport or storage.

### 2. Initial Cleaning

Before first use, wash the water tank, bean hopper, and milk tube with warm, soapy water. Rinse thoroughly and dry all parts. Wipe the exterior of the machine with a damp cloth.

### 3. Filling the Water Tank

Remove the 2.2 L water tank from the machine. Fill it with fresh, cold drinking water up to the MAX line. Replace the water tank securely into its position.

#### 4. Filling the Bean Hopper

Open the lid of the removable bean hopper. Pour whole coffee beans into the hopper. Do not overfill. Ensure the hopper is properly seated after filling.

Movable spout  
**fits glasses and mugs  
up to 5.4"**

Figure 3: The removable bean hopper for easy refilling.

#### 5. Power Connection

Plug the power cord into a grounded electrical outlet. The machine will perform an initial self-check.

### OPERATING INSTRUCTIONS

---

#### 1. Powering On/Off

Press the power button on the control panel to turn the machine on. The display will illuminate and guide you through the start-up process. To turn off, press and hold the power button until the machine powers down.

## 2. Selecting Beverages

Use the intuitive touchscreen display to navigate through the 15 available recipe options. Simply tap on your desired drink, such as Espresso, Americano, Latte, or Cappuccino.

### Easy Milk Rinsing

Automatic prompts make it easy to rinse your frother after every use, or whenever needed.

### Deep Milk Cleaning

Help keep your milk system performing at its best with a deep cleaning cycle in a few simple steps.

### Brew Unit Rinsing

Automatically rinses your brew unit whenever you need, or do it manually through settings.

Figure 4: Touchscreen display showing beverage selection and machine functions.

## 3. Customizing Your Drink

After selecting a beverage, the machine allows you to personalize settings such as coffee strength, beverage length (volume), and temperature. Follow the on-screen prompts to adjust these parameters to your preference. Your customized settings can often be saved for future use.

## 4. Using the Milk System

For milk-based beverages, place the milk hose into a separate container of milk. The single milk delivery system will automatically froth and heat the milk to the precise amount needed for your selected drink.

Removable bean hopper allows you to  
**easily change, exchange  
or refill beans**

Figure 5: The machine preparing a milk-based beverage.

## 5. Automatic Grinding

The integrated grinder utilizes automatic smart dosing technology to produce the ideal volume and consistency of ground coffee for each drink selection, eliminating guesswork.

## MAINTENANCE AND CLEANING

---

Regular cleaning and maintenance are crucial for the longevity and optimal performance of your espresso machine. The machine provides automatic clean alerts to assist you.

## 1. General Cleaning

- Wipe the exterior of the machine with a soft, damp cloth regularly.
- Clean the drip tray and coffee grounds container daily. Remove, empty, rinse with warm water, and dry before replacing.

## 2. Bean Hopper Cleaning

The removable bean hopper should be cleaned periodically to remove coffee oil residue. Twist and lift to remove, then wash with warm, soapy water, rinse, and dry thoroughly.

## 3. Milk System Cleaning

- **Easy Milk Rinsing:** The machine will prompt you to rinse the frother after every use. Follow the on-screen instructions.
- **Deep Milk Cleaning:** Perform a deep cleaning cycle for the milk system periodically to ensure optimal performance. The machine will guide you through the steps.

## 4. Brew Unit Rinsing

The brew unit can be rinsed automatically as prompted by the machine, or manually through the settings menu. This helps maintain the internal components.

## TROUBLESHOOTING

This section addresses common issues you might encounter with your espresso machine. For problems not listed here, please contact customer support.

Problem	Possible Cause	Solution
Machine does not turn on.	No power supply.	Check if the power cord is securely plugged into the machine and the wall outlet. Ensure the outlet is functional.
Coffee is not brewing.	Water tank empty; Bean hopper empty; Brew unit clogged.	Refill water tank. Refill bean hopper. Perform a brew unit rinsing cycle.
Milk is not frothing properly.	Milk hose clogged; Milk type unsuitable; Milk too warm.	Perform Easy Milk Rinsing or Deep Milk Cleaning. Use cold, fresh milk (dairy or plant-based suitable for frothing).
Error message on display.	Specific machine issue.	Refer to the specific error code on the display and consult the machine's internal help system or contact customer support.
