REPLACEMENT STIRRING CUP & BLADE COMPONENT

For Bear Baby Food Maker Model SJJ-R03B5

Brand: Bar | Model: BL04-240126

1. PRODUCT OVERVIEW

This component is a direct replacement for the stirring cup and blade assembly of the Bear Baby Food Maker, model SJJ-R03B5. It is designed to restore the blending functionality of your appliance, ensuring continued safe and efficient preparation of baby food.

Figure 1.1: The complete replacement stirring cup and blade component.

Key Features:

- **100% Food-Grade Materials:** The blending cup is constructed from PCTG material, and all accessories are made from BPA-Free food-grade materials, ensuring the safety and purity of your baby's food.
- **Safety Design:** Equipped with security locks, the unit will only power on when the blender cup lid is correctly installed onto the blender cup, and the blender cup is properly seated on the base. This prevents accidental operation and enhances user safety.

Figure 1.2: Icons indicating food-grade, BPA-free materials, and UL certification.

Figure 1.3: Detail of the safety lock mechanism on the stirring cup, showing alignment indicators.

2. SETUP AND INSTALLATION

Follow these steps to correctly install the replacement stirring cup and blade component onto your Bear Baby Food Maker SJJ-R03B5.

- 1. Ensure Power is Off:** Before beginning installation, unplug the Bear Baby Food Maker from the power outlet to prevent any electrical hazards.
- 2. Remove Old Component (if applicable):** If replacing an existing component, carefully remove the old stirring cup and blade assembly from the main unit. Dispose of it responsibly.
- 3. Inspect New Component:** Unpack the new stirring cup and blade component. Verify that all parts are present and undamaged: the blending cup, blade component, blade holder, driving head, and seal ring.
- 4. Assemble Blade and Seal Ring:** Ensure the blade component is securely attached to the blade holder and the seal ring is properly seated around the base of the blade assembly. This seal is crucial for preventing leaks.
- 5. Insert into Blending Cup:** Place the assembled blade and blade holder into the bottom of the blending cup. Twist or push until it clicks securely into place.
- 6. Attach Blending Cup to Base:** Align the blending cup with the main unit's base. Gently push down and twist the cup clockwise until it locks into position. You should feel a click, and the safety lock indicators (refer to Figure 1.3) should align.
- 7. Secure the Lid:** Place the lid onto the blending cup. Align the lid's tabs with the slots on the cup and twist clockwise until it is firmly locked. The safety mechanism requires the lid to be properly secured for operation.
- 8. Verify Installation:** Double-check that both the cup and the lid are securely locked in place. The unit will not power on if any part of the safety mechanism is not engaged.

3. OPERATING INSTRUCTIONS

Once the stirring cup and blade component are correctly installed, you can proceed with preparing baby food using your Bear Baby Food Maker SJJ-R03B5.

- 1. Prepare Ingredients:** Cut food into small, manageable pieces suitable for blending.
- 2. Add Ingredients to Cup:** Place the prepared ingredients into the blending cup. Do not exceed the maximum fill line indicated on the cup.

- Secure Lid:** Ensure the lid is firmly twisted and locked onto the blending cup.
- Place Cup on Base:** Confirm the blending cup is securely twisted and locked onto the main unit's base.
- Plug In and Operate:** Plug the main unit into a power outlet. The safety design ensures the machine will only power on when both the cup and lid are correctly installed. Refer to your main Bear Baby Food Maker manual for specific blending and steaming instructions.
- Monitor Blending:** Observe the blending process. If the food is too thick, you may need to add a small amount of water or breast milk/formula to achieve the desired consistency.
- Unplug and Remove:** Once blending is complete, unplug the appliance. Carefully twist and remove the blending cup from the base, then twist and remove the lid to access the prepared food.

4. MAINTENANCE AND CARE

Proper cleaning and maintenance will extend the lifespan of your stirring cup and blade component.

- **Cleaning:**
 - **Hand Wash Only:** All components of the stirring cup and blade assembly should be hand washed. Do not place them in a dishwasher, as this may cause damage to the materials or seals.
 - Use warm, soapy water and a soft sponge or brush to clean all parts thoroughly after each use.
 - Pay special attention to the blade area and any crevices to remove all food residue.
 - Rinse thoroughly with clean water to remove all soap residue.
- **Drying:** Allow all components to air dry completely before reassembling or storing. This prevents mold and mildew growth.
- **Storage:** Store the clean and dry component in a clean, dry place, away from direct sunlight and extreme temperatures.
- **Inspection:** Periodically inspect the blade for sharpness and any signs of wear or damage. Check the seal ring for cracks or deformation, as a damaged seal can lead to leaks. Replace components if significant wear or damage is observed.

5. TROUBLESHOOTING

If you encounter issues with your replacement stirring cup and blade component, refer to the following common troubleshooting tips:

Problem	Possible Cause	Solution
---------	----------------	----------

Problem	Possible Cause	Solution
Unit does not power on.	Blending cup or lid not properly installed. Safety lock not engaged. Main unit not plugged in.	Ensure the blending cup is twisted securely onto the base until it clicks. Ensure the lid is twisted securely onto the blending cup until it clicks. Verify the power cord is fully inserted into a working outlet.
Leaking from the bottom of the cup.	Seal ring is not properly seated or is damaged. Blade assembly not securely attached. Overfilling the cup.	Remove the blade assembly and ensure the seal ring is correctly positioned and free from damage. Replace if necessary. Ensure the blade assembly is securely twisted or pushed into the bottom of the blending cup. Do not fill ingredients past the maximum fill line.
Food not blending smoothly.	Ingredients are too large or too dry. Blade is dull or damaged.	Cut ingredients into smaller pieces. Add a small amount of liquid (water, breast milk, formula) to aid blending. Inspect the blade for any damage or dullness. If damaged, the component may need replacement.
