## SETUP AND ASSEMBLY

---

The POZEGA vanity unit requires self-assembly. Please ensure you have all components before beginning. Refer to the included assembly instructions for detailed, step-by-step guidance. It is recommended to have two people for assembly and installation due to the size and weight of the unit.

### Pre-Assembly Checklist:

- Verify all parts are present against the parts list in the assembly manual.
- Ensure you have the necessary tools (e.g., screwdriver, hammer, level, drill for wall mounting).
- Choose a suitable location in your bathroom, considering water and electrical connections.

### Wall Mounting:

This unit is designed for wall-mounting. Use appropriate wall anchors and screws for your wall type to ensure secure installation. Improper mounting can lead to injury or damage to the unit and wall.

## OPERATING INSTRUCTIONS

---

### LED Lighting:

The integrated LED lighting is controlled by a touch sensor located inside the cabinet. Simply touch the sensor to turn the lights on or off. Ensure the unit is connected to a mains power supply for the LEDs to function.

## Doors:

The two cabinet doors feature a "Push-to-open" mechanism. Gently press the door panel to release the latch and open the door. To close, push the door until it clicks into place.

## MAINTENANCE AND CARE

To ensure the longevity and appearance of your POZEGA vanity unit, follow these maintenance guidelines:

- **Cleaning:** Wipe surfaces with a soft, damp cloth. Avoid abrasive cleaners, solvents, or harsh chemicals, as these can damage the glossy finish and marble effect.
- **Moisture:** While designed for bathroom use, minimize prolonged exposure to excessive moisture. Wipe up spills immediately.
- **LEDs:** The LED lighting system is designed for durability. If issues arise, consult the troubleshooting section or contact support. Do not attempt to replace individual LEDs.
- **Doors & Hinges:** Periodically check the door hinges for tightness. If the push-to-open mechanism becomes stiff, ensure no debris is obstructing it.

## TROUBLESHOOTING

Problem	Possible Cause	Solution
LEDs not turning on	No power supply; Faulty touch sensor; Loose connection.	Ensure the unit is plugged into a working mains outlet. Check the touch sensor for responsiveness. Verify all internal electrical connections are secure.
Doors not opening/closing smoothly	Obstruction in push-to-open mechanism; Misaligned hinges; Debris.	Check for any objects blocking the mechanism. Adjust hinges if doors are misaligned. Clean any debris from the hinge area.
Unit appears unstable after mounting	Improper wall anchors; Insufficient number of mounting points; Wall material not suitable.	Re-evaluate wall anchors for suitability with your wall type. Ensure all mounting points are used and securely fastened. Consult a professional if unsure about wall integrity.
