- **Dusting:** Regularly dust the cabinet with a dry, soft cloth to prevent dust buildup.
- **Spills:** Immediately wipe up any spills to prevent staining or water damage.
- **Sunlight Exposure:** Avoid prolonged direct sunlight exposure, which can cause fading or discoloration of the wood and linen.
- **Humidity:** Maintain a stable room temperature and humidity level to prevent warping or cracking of the wood.
- **Hardware:** Periodically check and tighten all screws and fasteners to ensure the cabinet remains stable and secure.

7. TROUBLESHOOTING

This section addresses common issues you might encounter with your shoe cabinet.

Problem	Possible Cause	Solution
Drawers do not close smoothly.	Misalignment during assembly or obstruction.	Check that all assembly screws are properly tightened. Ensure no shoes or debris are blocking the drawer mechanism. Re-align the drawer if necessary.
Cabinet feels wobbly.	Loose fasteners or uneven floor.	Tighten all assembly screws. If the floor is uneven, use furniture pads or shims under the metal legs to level the cabinet. Consider wall anchoring for added stability.
Shoes do not fit in drawers.	Interior shelf height is incorrect for shoe type.	Adjust or remove the interior shelves within the flip drawers to accommodate taller footwear. Refer to Section 5.1 for instructions on adjusting shelves.

If you encounter issues not listed here or if the problem persists, please contact LEVNARY customer support for assistance.
