Problem	Possible Cause	Solution
Cat tree is wobbly/unstable.	Loose connections; uneven surface.	Ensure all screws are tightened. Place on a flat, level surface. Consider placing against a wall for added support.
Cat is not using the scratching posts.	Prefers other surfaces; unfamiliar with sisal.	Sprinkle catnip on the posts. Gently guide your cat's paws to the posts. Reward them when they use it.
Cat is not interested in the tree.	New environment; prefers other areas.	Place favorite toys or treats on different levels. Spend time playing with your cat near the tree.
Hanging toys are broken/detached.	Normal wear and tear; aggressive play.	Remove broken toys to prevent hazards. Replace with new cat-safe toys if desired.
