TROUBLESHOOTING

If you encounter issues with your side table, refer to the following common solutions.

- **Table is Wobbly:**
 - Ensure all screws are fully tightened.
 - Verify the table is on a flat, even surface.
- **Drawers Do Not Slide Smoothly:**
 - Check that the drawer slides are correctly installed and aligned.
 - Ensure drawers are not overloaded beyond their maximum capacity (2.3 kg per drawer).
- **Power Strip Not Working:**
 - Confirm the power strip's main cable is securely plugged into a functional wall outlet.
 - Check if the wall outlet itself is receiving power (test with another device).
