To maximize the lifespan and functionality of your bookshelf:

- **Load Evenly:** Distribute the weight of your items evenly across the shelves. Avoid placing heavy objects on only one side.
- **Respect Weight Limits:** Do not exceed the stated weight capacity of 3 kg per shelf. Overloading can compromise the structural integrity of the unit.
- **Drawer Use:** The bottom drawer is designed for discreet storage of smaller items. Avoid placing excessively heavy or bulky items that could impede its smooth operation. The semi-closed bottom compartment can also be used for storage if the drawer is removed.
- **Placement:** Position the bookshelf away from direct sunlight and excessive moisture to prevent material degradation.

- **Cleaning:** Wipe surfaces with a soft, damp cloth. Avoid using harsh chemicals, abrasive cleaners, or polishes that may damage the finish.
- **Spills:** Immediately wipe up any spills to prevent staining or water damage.
- **Dusting:** Regularly dust the shelves and frame with a dry, soft cloth.
- **Avoid Heat:** Do not place hot items directly on the surface without protection.

7. TROUBLESHOOTING

If you encounter any issues with your bookshelf, refer to the following common solutions:
