5. SETUP AND ASSEMBLY

Assembly of the GAZHOME Twin Bed Frame is designed to be straightforward and can typically be completed within 30 minutes by one person. Follow these steps carefully:

1. **Unpack and Identify Parts:** Lay out all components on a clean, soft surface (e.g., a rug or blanket) to prevent scratches. Compare all parts with the provided parts list in your physical manual to ensure nothing is missing.
2. **Assemble Headboard:** Attach the headboard panels to the headboard frame using the designated hardware. Ensure the 2-tier storage shelves are correctly oriented.
3. **Connect Side Rails:** Attach the side rails to the headboard and footboard using the provided bolts. *Important:* Hand-tighten all bolts initially. Do not fully tighten until the entire frame is assembled and aligned. This allows for minor adjustments.
4. **Install Center Support:** Secure any center support legs or beams as indicated in your physical manual.
5. **Place Slats:** Position the metal slats across the side rails. The slats are designed to provide robust mattress support without a box spring. Ensure the rubber strips are correctly placed to prevent noise.
6. **Final Tightening:** Once all parts are correctly aligned and in place, fully tighten all bolts using the Allen wrench. Double-check all connections for security.

7. MAINTENANCE

- **Cleaning:** Wipe the metal frame and headboard surfaces with a soft, damp cloth. Avoid harsh chemicals or abrasive cleaners that could damage the finish.
- **Regular Checks:** Periodically check all bolts and connections to ensure they remain tight. Re-tighten if necessary to maintain stability and prevent noise.
- **Weight Distribution:** Distribute weight evenly across the bed frame to prevent undue stress on any single point.

8. TROUBLESHOOTING

Issue: Bed frame is noisy or squeaks.

Solution: Ensure all bolts are fully tightened. The bed frame includes rubber strips on the slats to minimize noise; verify these are correctly in place. Uneven floor surfaces can also cause noise; try repositioning the bed or using floor protectors.

Issue: Bed frame feels unstable or wobbly.

Solution: Re-check all connections and ensure every bolt is securely tightened. Verify that all legs are making firm contact with the floor. If the issue persists, disassemble and reassemble, paying close attention to the alignment of parts before final tightening.

Issue: Missing parts or damaged components.

Solution: Refer to the 'Warranty and Support' section to contact GAZHOME customer service for assistance with replacement parts.
