UMIDIGI A15T

UMIDIGI A15T Smartphone User Manual

Model: A15T | Brand: UMIDIGI

1. PRODUCT OVERVIEW

The UMIDIGI A15T is an unlocked Android smartphone designed for a versatile mobile experience. It features a large 6.7-inch HD+ display, a powerful Octa-Core MediaTek Helio G95 processor, and up to 16GB of RAM (8GB physical + 8GB virtual) for smooth performance. With a 5000mAh battery and 18W fast charging, it offers extended usage. The phone includes a 64MP AI camera system, NFC for convenient payments, and a side-mounted fingerprint sensor for security. It supports dual SIM 4G global bands, ensuring wide network compatibility.

3. SETUP

3.1 Inserting SIM/TF Card

1. Locate the SIM card tray on the side of the phone.
2. Insert the provided SIM tray ejector tool into the small hole next to the tray and press gently until the tray pops out.
3. Place your Nano SIM card(s) and/or TF card into the designated slots on the tray. Ensure they are correctly oriented.
4. Carefully push the tray back into the phone until it is flush with the side.

3.2 Initial Power On and Configuration

1. Press and hold the Power button (located on the side) until the UMIDIGI logo appears.
2. Follow the on-screen prompts to complete the initial setup, including language selection, Wi-Fi connection, Google account sign-in, and security settings (fingerprint/face unlock).
3. The phone comes with a pre-applied screen protector film for immediate use.

4. OPERATING INSTRUCTIONS

4.1 Display Features

The UMIDIGI A15T features a large 6.7-inch HD+ capacitive touch screen with a resolution of 1650x720 pixels and a 20.6:9 aspect ratio. It offers a brightness of 500 nits (typical) and a contrast ratio of 1500:1, providing clear visuals. The display has an 87% screen-to-body ratio for an immersive viewing experience.

4.2 Performance and Storage

Powered by an Octa-Core MediaTek Helio G95 processor clocked at up to 2.05 GHz, the A15T delivers efficient performance for daily tasks and gaming. It comes with 8GB of physical RAM, expandable up to 16GB with 8GB of virtual RAM, and 128GB of internal storage, which can be expanded up to 1TB using a TF card.

Figure 4: Illustration of the MediaTek Helio G95 Octa-Core Processor and memory configuration (8GB RAM + 128GB ROM, expandable).

4.3 Camera System

The phone is equipped with a professional photo system, including a 64MP ultra-clear main camera for capturing stunning images with vibrant colors. The 16MP front camera features an 'AI Beautify' mode for enhanced selfies. Supported camera modes include time-lapse, slow motion, panorama, portrait, and night mode.

5. MAINTENANCE

5.1 General Care

- Keep the device dry. Avoid exposure to moisture or liquids.
- Do not expose the device to extreme temperatures (hot or cold).
- Clean the screen and body with a soft, lint-free cloth. Avoid abrasive materials or harsh chemicals.
- Protect the screen from scratches by using the provided screen protector and phone case.

5.2 Battery Care

- Use only the original or certified compatible charger and cable.
- Avoid fully discharging the battery frequently. Charge the phone before it completely runs out of power.
- Do not leave the phone charging for extended periods after it reaches 100% to prolong battery lifespan.

6. TROUBLESHOOTING

This section addresses common issues you might encounter with your UMIDIGI A15T Smartphone.

Issue	Possible Solution
-------	-------------------

Issue	Possible Solution
Phone does not power on	Ensure the battery is charged. Connect the phone to the charger for at least 10 minutes before attempting to power on again.
Poor network signal or no service	Check if the SIM card is correctly inserted. Verify that your carrier supports the phone's 4G global bands. Try restarting the phone.
Apps are slow or crashing	Close background applications. Clear app cache or data. Ensure sufficient storage space is available. Restart the device.
Battery drains quickly	Reduce screen brightness. Disable unnecessary features like Wi-Fi, Bluetooth, or GPS when not in use. Limit background app activity.
GPS signal issues	Ensure GPS is enabled in settings. Move to an open area with a clear view of the sky. Restart the device.
Phone gets warm during use	It is normal for the phone to warm up during intensive tasks like gaming or prolonged video playback. If it becomes excessively hot, close demanding applications and allow it to cool down.
