LIVING ACCENTS Pathway Light (Model 3010859) Instruction Manual

INTRODUCTION

Thank you for choosing the LIVING ACCENTS Pathway Light. This manual provides essential information for the safe and efficient installation, operation, and maintenance of your solar-powered LED pathway lights. Please read these instructions thoroughly before use and retain them for future reference.

A single LIVING ACCENTS Pathway Light, featuring a clear crackle glass globe on top of a black stem and ground stake. A small white switch is visible below the globe.

SAFETY INFORMATION

- Always handle the lights with care to avoid damage to the glass globe or internal components.
- Ensure the solar panel is clean and free from obstructions to allow for optimal charging.
- While designed for outdoor use, the product specification indicates it is **Not Water Resistant**. Protect the lights from heavy rain, standing water, or submersion to prevent damage.
- Do not attempt to open or modify the light unit, as this may void the warranty and pose a safety risk.
- Keep out of reach of children.

PACKAGE CONTENTS

Your package should contain the following items:

- 12 x LIVING ACCENTS Solar Powered LED Pathway Lights
- Integrated solar panels

- Ground stakes

SETUP

1. **Unpack:** Carefully remove all components from the packaging.
2. **Activate:** Locate the small toggle switch, typically found near the base of the crackle glass globe.
 - Move the switch to the **left** for a steady white light.
 - Move the switch to the **right** to activate a rotating color mode (red/green/white).
3. **Initial Charge:** Place the lights in direct sunlight for at least 8-10 hours to allow the internal battery to fully charge before first use. Ensure the switch is in the 'ON' position during charging.
4. **Assembly:** Attach the ground stake firmly to the bottom of the light unit. No complex assembly is required.
5. **Placement:** Choose a location outdoors where the solar panel will receive maximum direct sunlight throughout the day. Ensure the ground is soft enough to insert the stake without excessive force, which could damage the light.

OPERATING INSTRUCTIONS

The LIVING ACCENTS Pathway Lights are designed for automatic operation:

- Once activated and fully charged, the lights will automatically turn on at dusk and turn off at dawn.
- The duration of illumination depends on the amount of sunlight received during the day.
- To change the light color mode (white or rotating colors), use the toggle switch as described in the Setup section.

MAINTENANCE

- **Cleaning:** Regularly wipe the solar panel with a soft, damp cloth to remove dust, dirt, or debris. A clean solar panel ensures optimal charging efficiency.
- **Protection:** As the product is specified as 'Not Water Resistant', consider bringing the lights indoors during periods of heavy rain, snow, or extreme weather conditions to prolong their lifespan.
- **Battery:** The lights contain an integrated rechargeable battery. This battery is not designed for user replacement. If the light stops functioning after prolonged use and proper charging, the unit may need to be replaced.

TROUBLESHOOTING

- **Light does not turn on at night:**
 - Ensure the switch is in the 'ON' position.
 - Verify the solar panel is receiving direct sunlight for at least 8-10 hours daily.
 - Clean the solar panel surface.
 - Ensure there are no external light sources (e.g., streetlights, porch lights) near the solar light that might trigger its light sensor to keep it off.
- **Light is dim or only stays on for a short period:**

- The battery may not be fully charged. Ensure the solar panel receives adequate sunlight.
- The battery's capacity may have diminished over time. Consider replacing the unit if it's significantly old.

SPECIFICATIONS

Brand	LIVING ACCENTS
Model Number	3010859
Color	Black
Material	Glass, Metal
Light Source Type	LED
Power Source	Solar Powered
Light Color Options	White, or Rotating Red/Green/White
Product Dimensions	10.91"L x 8.39"W x 3.9"H
Item Weight	9.04 Pounds (for the pack of 12)
Unit Count	12.0 Count
Water Resistance Level	Not Water Resistant
Assembly Required	No
