EasyKeys Replacement Key for Yale Lock JF715 Instruction Manual

Model: JF715

1. INTRODUCTION

This document provides instructions for the EasyKeys JF715 replacement key, designed for Yale locks commonly found in file cabinets, desks, and cubicles. This key is custom-cut to match the JF715 code and is compatible with specific manufacturers such as Art Metal and Art Steel.

It is essential to verify your lock's code and manufacturer to ensure proper functionality of this replacement key.

2. KEY IDENTIFICATION AND SETUP

Before using your new replacement key, confirm that the lock code on your existing lock or key matches "JF715". This key is specifically cut for the JF715 code.

2.1 Verifying Your Lock Code

The lock code can typically be found in several locations:

- **On the original key:** The code is often stamped directly on the key blade or head.
- **On the lock face:** The code may be engraved on the visible part of the lock cylinder.
- **Inside/Behind the lock:** For some locks, the code is on a label or stamped directly on the lock mechanism, accessible when the drawer or door is open.
- **On the cabinet/door label:** Some furniture manufacturers place a label with lock information on the inside of the cabinet or door.

Important Notes

- Order by Manufacturer → Lock codes are manufacturer-specific.
- Key Cuts Differ → Even if codes look similar, they vary by brand.

2.2 Compatibility

This JF715 replacement key is compatible with Yale locks and specifically designed for use with products from manufacturers such as Art Metal and Art Steel. Always confirm your lock's manufacturer to ensure compatibility.

3. OPERATING INSTRUCTIONS

Using your EasyKeys JF715 replacement key is straightforward:

1. **Insert the Key:** Gently insert the JF715 key into the lock cylinder. Do not force the key.
2. **Turn to Unlock/Lock:** Once fully inserted, turn the key clockwise or counter-clockwise (depending on the lock mechanism) to engage or disengage the lock.
3. **Remove the Key:** After locking or unlocking, return the key to its original insertion position before removing it.

4. MAINTENANCE

To ensure the longevity and smooth operation of your key and lock:

- **Keep Clean:** Periodically wipe the key with a soft, dry cloth to remove dirt or debris.
- **Avoid Bending:** Do not apply excessive force or attempt to bend the key, as this can damage it and render it unusable.
- **Lubrication (for lock):** If the lock mechanism becomes stiff, apply a small amount of graphite-based lubricant (not oil) into the keyway. Consult your lock's manufacturer guidelines for specific lubrication recommendations.

5. TROUBLESHOOTING

If you encounter issues with your replacement key, consider the following:

- **Key Does Not Insert Fully:**
 - Check for obstructions in the lock keyway.
 - Ensure the key is oriented correctly.
 - Verify that the lock code on your lock matches JF715.
- **Key Inserts but Does Not Turn:**
 - Confirm the lock code on your lock matches JF715.
 - Ensure the lock mechanism is not jammed or seized. Try applying a small amount of graphite lubricant.
 - Verify the lock's manufacturer is compatible (e.g., Art Metal, Art Steel).

- **Key Feels Loose or Wobbly:**

- This may indicate wear on the lock cylinder or an incorrect key cut. Double-check the lock code.

If problems persist after troubleshooting, contact EasyKeys customer support for assistance.
