

Nuby NU-81141

Nuby Silicone Wrist Teething Mitten - Brown Bear

MODEL: NU-81141

Introduction

The Nuby Silicone Wrist Teething Mitten is designed to provide relief for tender gums and emerging teeth in infants aged 3 months and above. This mitten-style teether is crafted from 100% silicone, ensuring safety and durability. It is particularly beneficial for babies who are developing their gripping skills, offering a secure and comfortable way to self-soothe.

Product Features

- **100% Silicone Construction:** Made entirely from silicone, ensuring a safe and soft chewing surface.
- **Mitten Design:** Features an opening for the baby's hand and an internal silicone bar for easy gripping, preventing the teether from being dropped frequently.
- **Nipple-Mimicking Arms:** The teether includes 'arms' that resemble a nipple shape, offering additional comfort and a familiar soothing sensation.
- **Textured Surfaces:** Various textures on the teether stimulate the baby's senses and provide effective gum massage.
- **BPA-Free:** Manufactured without BPA, adhering to safety standards.
- **Dishwasher Safe:** Designed for easy cleaning and hygiene maintenance.

Setup and Usage

To use the Nuby Silicone Wrist Teething Mitten, gently slide your baby's hand into the opening. The internal bar is designed for small hands to grasp naturally, allowing the baby to hold the teether securely and bring it to their mouth for chewing. The mitten can be worn on either hand.

Features

- 1 The character's "arms" mimic mother's nipple
- 2 Fun and exciting characters keep little ones engaged
- 3 The mittens are flexible and can be worn on either hand
- 4 100 % soft silicone is gentle on tender gums
- 5 Designed for little hands still learning to grip

Nuby

Silicone Teething Mitten

Nuby's Teething Mittens soothe. Soft silicone calms those tender gums and helps with emerging teeth.

The Silicone Teething Mittens are worn over the hand, making them ideal for little ones who haven't developed a strong grip yet.

Everyone knows teething is messy business. Our teething mittens are dishwasher safe so you can enjoy the perks of easy cleaning!

Cleaning and Maintenance

Proper cleaning is essential for maintaining hygiene. Follow these instructions:

- Wash before initial use and after each subsequent use.
- The teether is dishwasher safe (top rack only).
- Alternatively, hand wash with warm, soapy water.
- Rinse thoroughly and dry completely.

- The teether can be boiled or steam sterilized for deeper cleaning.

Safety Information

The Nuby Silicone Wrist Teething Mitten is manufactured with materials that meet or exceed all government safety regulations and standards. Always inspect the teether before each use. Discard and replace the teether at the first sign of damage or weakness. Do not leave a baby unattended with the teether.
