Follow these steps carefully for proper assembly. All parts are labeled for easy identification. A Phillips head screwdriver (not included) may be required in addition to the provided Allen wrench.

#### Step 1: Unpack and Organize

Carefully unpack all components and lay them out on a clean, soft surface (e.g., a blanket or carpet) to prevent scratches. Identify each part using the labels and the parts list in your separate assembly guide.

#### Step 2: Assemble the Main Frame

Begin by assembling the metal frame components. Attach the vertical support legs to the horizontal bars using the provided screws. Ensure all connections are finger-tight initially.

#### Step 3: Attach Desk Panels and Shelves

Secure the main L-shaped desk panels to the assembled frame. Note that the L-shape is reversible; you can configure the longer side to either the left or right during this step to suit your space. Attach the monitor stand and the open storage shelves as indicated in the assembly guide.

## 4. OPERATING INSTRUCTIONS

### 4.1. Power Outlets and USB Charging Ports

The integrated power strip provides convenient access to power for your electronic devices. Simply plug the desk's main power cord into a wall outlet. You can then use the two AC outlets for devices like monitors or laptops, and the two USB ports for charging smartphones, tablets, or other USB-powered accessories.

- **AC Outlets:** 110V-240V/6A
- **USB Ports:** 5V/2A

Avoid plugging in high-power appliances that exceed the specified current rating to prevent electrical overload.

### 4.2. LED Lighting System

The desk features an LED light strip to enhance your workspace ambience. The LED strip is controlled via a small controller (usually inline with the power cable or a separate remote, refer to your specific LED kit instructions). It offers:

- **7 Colors:** Choose from a variety of static colors.
- **20 Lighting Modes:** Includes various dynamic effects and brightness adjustments.
- **Memory Function:** The LED lights will recall the last used color and mode when turned on again.

To operate, ensure the LED strip is connected to its power source (often a USB port or a dedicated adapter). Use the controller to cycle through colors, modes, and adjust brightness.
