## MAINTENANCE AND CARE

---

Proper care will extend the life and appearance of your upholstered bed.

- **Cleaning Code WS:** The upholstery fabric has a cleaning code of 'WS'. This means you can use a water-based cleaning agent or a solvent-based cleaning agent. Test any cleaning solution on an inconspicuous area first.
- **Regular Dusting:** Dust the upholstered surfaces regularly with a soft brush or vacuum with an upholstery attachment to prevent dirt buildup.
- **Spot Cleaning:** For spills, blot immediately with a clean, dry cloth. Avoid rubbing, which can spread the stain.
- **Avoid Direct Sunlight:** Prolonged exposure to direct sunlight can cause fading of the fabric.
- **Avoid Harsh Chemicals:** Do not use abrasive cleaners, bleach, or strong detergents, as these can damage the fabric and finish.

## TROUBLESHOOTING

---

If you encounter issues with your bed, refer to the following common solutions:

- **Squeaking Noises:** Squeaking often indicates loose connections. Re-tighten all bolts and screws on the frame, headboard, and footboard. Ensure slats are properly seated.
- **Instability/Wobbling:** Check that all support legs are firmly on the floor and adjusted correctly using their levelers. Verify all frame connections are tight.

- **Damaged Parts:** If any part is damaged during shipping or assembly, do not attempt to force it. Contact customer support for replacement parts.
