## 4. SETUP AND ASSEMBLY

Assembly is required for the Battle Cave structure. Follow these steps to set up your playset:

1. **Unpack Components:** Carefully remove all pieces from the packaging. Ensure all 34 pieces are present by comparing them with the included parts list (if provided in physical packaging).
2. **Assemble Cave Structure:** Connect the various wall and floor panels of the Battle Cave. The pieces are designed to interlock. Refer to the visual guides below for proper placement.
3. **Attach Catapult:** Secure the ball-launching catapult weapon to the designated slot on top of the cave structure.
4. **Install Floor Traps:** Place the floor trap pieces within the cave as indicated in the diagrams.
5. **Position Hidden Crystal:** Insert the hidden crystal into its designated compartment, often behind a rotating door or panel.
6. **Place Chameleon Figurine:** The Stone Chameleon figurine can be placed inside or outside the cave, ready for play.

## 5. OPERATING THE PLAYSET FEATURES

The Stone Battle Cave features several interactive elements to enhance play:

- **Catapult Operation:**

- a. Place the green energy ball into the catapult's launching arm.
- b. Pull back the launching arm and release to fire the ball at opposing figures or targets.

- **Floor Trap Activation:**

The floor traps can be manually activated or triggered by placing figures on specific pressure points (if applicable to the design). These traps are designed to surprise and capture other creatures.

- **Hidden Crystal Mechanism:**

Locate the rotating door or panel on the side of the cave. Turn or open this panel to reveal the hidden crystal inside, which can be used as a play objective or power source.

- **Stone Chameleon Beast:**

The Stone Chameleon figurine is highly detailed and can be positioned in various action poses. Its massive watchful eyes and sharp claws make it a formidable defender of the cave.

## 6. CARE AND MAINTENANCE

- **Cleaning:** Wipe the playset and figurines with a damp cloth. Do not use harsh chemicals or abrasive cleaners, as these may damage the paint or material.
- **Storage:** Store the playset in a cool, dry place away from direct sunlight to prevent material degradation and color

fading.

- **Inspection:** Periodically check all connections and moving parts to ensure they are secure and functioning correctly.

## 7. TROUBLESHOOTING

---

Problem	Possible Cause	Solution
Catapult not launching ball effectively.	Ball improperly seated; launching arm not pulled back far enough.	Ensure the ball is securely placed in the catapult. Pull the launching arm back fully before releasing.
Cave pieces do not fit together.	Incorrect orientation of pieces; debris in connection points.	Refer to the assembly diagrams. Check for and remove any small debris from the interlocking tabs and slots.
Hidden crystal mechanism is stuck.	Mechanism obstructed; part misaligned.	Gently check for any obstructions. Ensure the rotating door/panel is correctly aligned. Do not force the mechanism.
