

SISESOL ALP-SDSAWJG

SISESOL 36-inch Metal Storage Cabinet Instruction Manual

Model: ALP-SDSAWJG

1. INTRODUCTION

Thank you for choosing the SISESOL 36-inch Metal Storage Cabinet. This manual provides essential information for the safe and efficient assembly, operation, and maintenance of your new storage cabinet. Please read these instructions carefully before beginning assembly and retain them for future reference. This cabinet is designed to provide secure and organized storage for various items in home, office, garage, or utility room environments. It features a durable all-steel structure, adjustable shelves, and a secure locking system.

2. SAFETY INFORMATION

WARNING: Failure to follow these safety instructions may result in injury or damage to the product.

- For safe use, it is strongly recommended to attach this cabinet to the wall using the provided wall attachment device to prevent tip-over.
- The maximum load capacity of the entire cabinet is **440 lbs (200 kg)**.
- Each individual shelf has a maximum bearing capacity of **180 lbs (81.65 kg)**. Do not exceed these weight limits.
- Always handle and assemble the cabinet with care. Metal edges can be sharp.
- Keep children and pets away from the assembly area.
- Ensure all parts are correctly aligned and securely fastened before use.
- Do not climb on or hang from the cabinet doors or shelves.

3. PACKAGE CONTENTS

Before beginning assembly, verify that all components are present and undamaged. If any parts are missing or damaged, please contact SISESOL customer service immediately.

- Cabinet Panels (various, including top, bottom, sides, back, doors)
- 2 Adjustable Shelves
- 2 Keys for the locking mechanism
- Assembly Hardware (screws, nuts, bolts, etc.)
- Wall Attachment Device
- Phillips Head Screwdriver (may be included)
- Extra Hardware (for spares)

The shipping box for this product is heavy. It is recommended to have assistance when moving the package to your desired assembly location.

4. SETUP AND ASSEMBLY

Assembly of the SISESOL Metal Storage Cabinet is designed to be straightforward with clear, numbered instructions. While it can be assembled by one person, having two people for the initial steps will significantly ease the process.

4.1 Preparation

- Choose a clean, flat, and spacious area for assembly. A large table (over 6 feet long and 3 feet wide) is ideal.
- Unpack all components and lay them out. Verify against the parts list in your included manual.
- Separate and organize all hardware. Using a divider plate or small containers for different screw types can streamline the process.
- Consider using a headlamp to better see small pre-drilled holes during assembly.

4.2 Assembly Steps

Follow the step-by-step instructions provided in the physical manual included with your cabinet. Pay close attention to the diagrams and ensure correct orientation of all panels.

- **Important:** Do not lean your full weight on any part of the product during assembly, especially on flat panels, as this can cause dents.
- The first 3-4 steps are best accomplished with two people to hold parts vertically while securing them.
- The doors are designed for simple installation. Ensure the clear O-rings are properly placed for cushioning and leveling.

4.3 Wall Attachment

Pre-drilled holes are located on the back of the cabinet for wall mounting. Use the provided wall attachment device to secure the cabinet to a sturdy wall. This is a critical safety step to prevent tip-over, especially in households with children or in areas prone to seismic activity.

PRODUCT DIMENSIONS

Figure 2: Detailed Features of the Cabinet

5. OPERATING INSTRUCTIONS

5.1 Adjusting Shelves

The cabinet is equipped with 2 adjustable shelves. These shelves can be repositioned to accommodate items of different heights. The pre-drilled slots for the shelf brackets are spaced approximately one inch apart, allowing for precise customization of storage space.

- To adjust a shelf, remove any items from it.
- Carefully lift the shelf to disengage the support brackets from their current slots.
- Reinsert the support brackets into the desired slots at the new height, ensuring they are level and securely seated on both sides.
- Place the shelf back onto the brackets.

LARGE CAPACITY, INCREASE SPACE

35.4" all-in-one model, made of cold-rolled steel forging, more storage and safer

Figure 3: Adjustable Shelf Configuration

5.2 Locking System

The cabinet features an upgraded 3-point locking system with thickened steel rods for enhanced security. It comes with 2 spare keys.

- To lock the cabinet, ensure both doors are fully closed. Insert a key into the lock and turn it to engage the locking mechanism.
- To unlock, insert the key and turn it in the opposite direction.
- Keep spare keys in a safe, accessible location.

5.3 Door Operation

The cabinet doors are designed with anti-collision reinforcements to ensure quiet operation and protect the cabinet when opening or closing. They feature a 180° opening angle for full access to the interior.

- The doors are equipped with magnets on the outer corners to help them stay closed when not locked. An extra magnet is provided for additional holding strength if needed.
- To open, gently pull the door handles. To close, push the doors until they meet the cabinet frame.

5.4 Leveling the Cabinet

The cabinet includes adjustable feet-screws located underneath. These can be adjusted from inside the cabinet through hidden holes on the bottom shelf, allowing you to level the cabinet without needing to lay it down.

- Once the cabinet is in its final position, open the doors.
- Locate the adjustment holes on the bottom shelf.
- Use a flat-head screwdriver to turn the feet-screws, raising or lowering each corner until the cabinet is stable and level.

6. MAINTENANCE

To ensure the longevity and appearance of your SISESOL Metal Storage Cabinet, follow these simple maintenance guidelines:

- **Cleaning:** Wipe the cabinet surfaces with a soft cloth dampened with water and a mild cleaning solution. Fingerprints and light dirt can be easily removed. Avoid abrasive cleaners or harsh chemicals that could damage the powder-coated finish.
- **Inspection:** Periodically check all screws and fasteners to ensure they remain tight. Retighten if necessary.
- **Load Management:** Always adhere to the specified weight limits for the cabinet and individual shelves to prevent structural damage.
- **Rust Prevention:** The special coating protects the cabinet from scratches and rust. However, avoid prolonged exposure to excessive moisture or corrosive substances.

7. TROUBLESHOOTING

This section addresses common issues you might encounter with your SISESOL Metal Storage Cabinet.

7.1 Cabinet Wobbles After Assembly

- **Solution:** Adjust the leveling feet-screws located at the bottom of the cabinet. Use a flat-head screwdriver through the hidden holes on the bottom shelf to raise or lower each corner until the cabinet is stable.

7.2 Doors Do Not Stay Fully Closed Without Locking

- **Cause:** While the cabinet has a secure locking mechanism, the magnetic closures may sometimes require adjustment or reinforcement.
- **Solution:** Ensure the cabinet is level (see 7.1). Verify that the magnetic strips on the doors and frame are clean and properly aligned. An extra magnet is provided in the hardware kit; consider adding it to the door for increased magnetic strength if needed.

7.3 Dents or Bent Panels Upon Arrival

- **Cause:** Minor cosmetic imperfections can sometimes occur during shipping.
- **Solution:** For minor bends, it may be possible to gently bend the panel back into shape. If the damage is significant and affects assembly or appearance, please contact SISESOL customer service for assistance.

7.4 Missing Parts or Hardware

- **Solution:** Refer to the package contents list (Section 3) and the assembly instructions. If parts are genuinely missing, contact SISESOL customer service immediately for replacements.

If you encounter any other problems during the installation or use of the product that are not covered here, please feel free to contact SISESOL customer service for assistance.
