# Enya Nova Go Sonic Smart Electric Guitar User Manual

Model: NOVA GO SONIC BK | Brand: Enya

## INTRODUCTION

---

The Enya Nova Go Sonic is an innovative smart electric guitar designed for versatility and portability. It integrates a 10-watt wireless speaker, onboard presets, and various connectivity options, making it an all-in-one solution for musicians on the go or for home studio use. Constructed from durable carbon fiber, this instrument offers a comfortable playing experience with its ergonomic design and asymmetrical neck profile.

## SETUP

### Unboxing and Initial Inspection

Upon receiving your Enya Nova Go Sonic, carefully unbox all components. Verify that the guitar, carrying case, charging cable, and any included accessories are present and in good condition. The guitar is designed to be ready for use right out of the box.

## Charging the Guitar

Before first use, it is recommended to fully charge the guitar. Connect the provided USB Type-C cable to the guitar's charging port and to a compatible USB power adapter (not included). The charging indicator light will provide status. A full charge ensures optimal performance and battery life for extended practice or performance sessions.

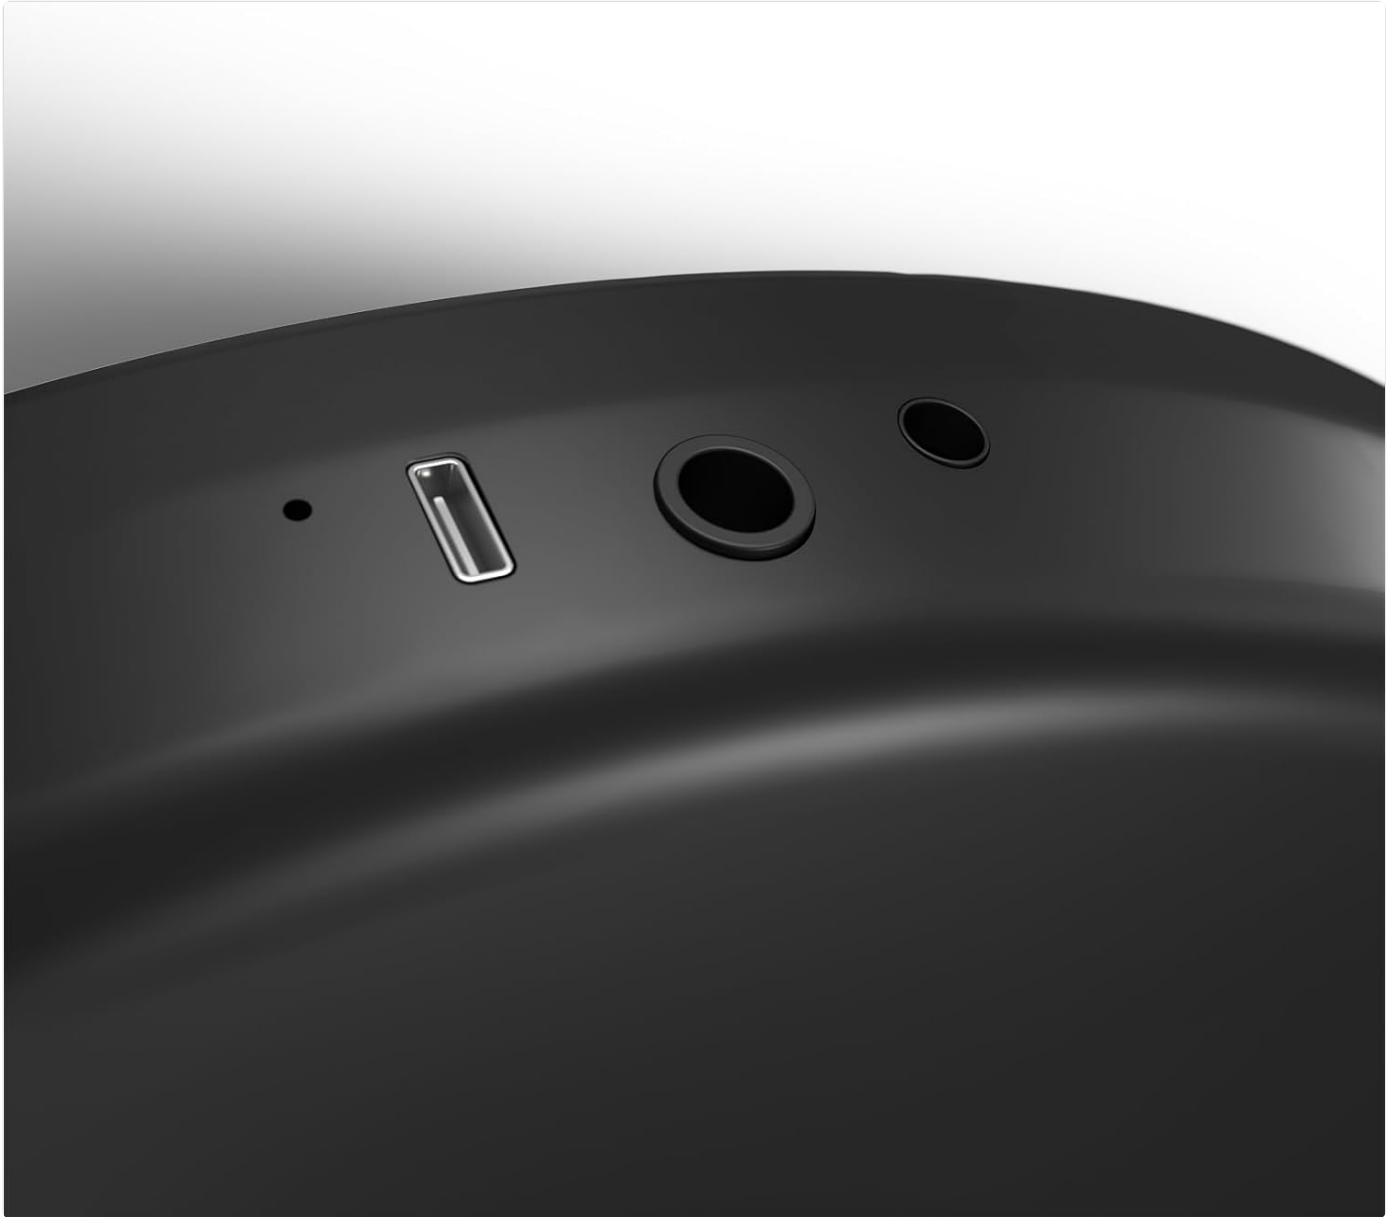

Figure 2: Detail of the guitar's connectivity ports, including the USB Type-C charging port.

## Initial Tuning

While the guitar is set up for playability out of the box, a quick tuning is recommended before your first session. Use a standard guitar tuner or the tuner function within the Enya Music App to ensure accurate pitch for all six strings. The closed tuners are designed for smooth and stable tuning.

## Enya Music App Installation and Pairing

To unlock the full potential of your Nova Go Sonic, download the Enya Music App from your device's app store. Follow the in-app instructions to pair your guitar via Bluetooth. The app allows for customization of presets, access to additional effects, and control over various guitar settings.

## OPERATING INSTRUCTIONS

---

## Onboard 10W Wireless Speaker

The Nova Go Sonic features a built-in 10-watt speaker, providing ample volume for practice and small jam sessions without external amplification. The speaker amplifies both the guitar's sound and any effects or backing tracks played through it. This integrated speaker simplifies your setup, allowing for immediate play anywhere.

# Built in 10W wireless Speaker

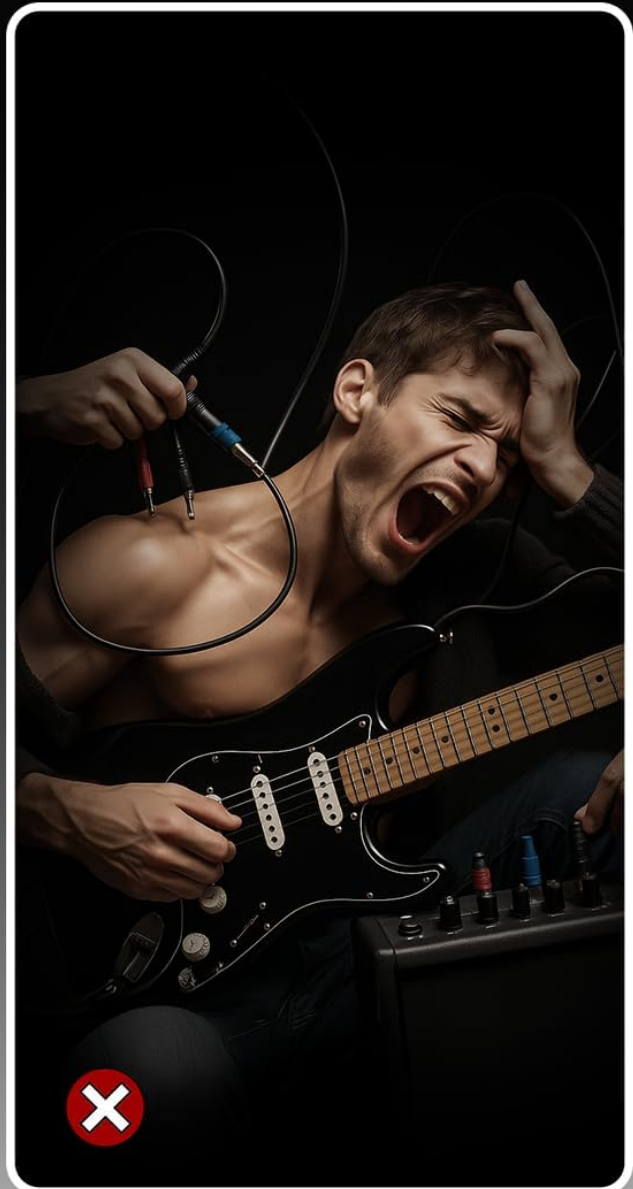

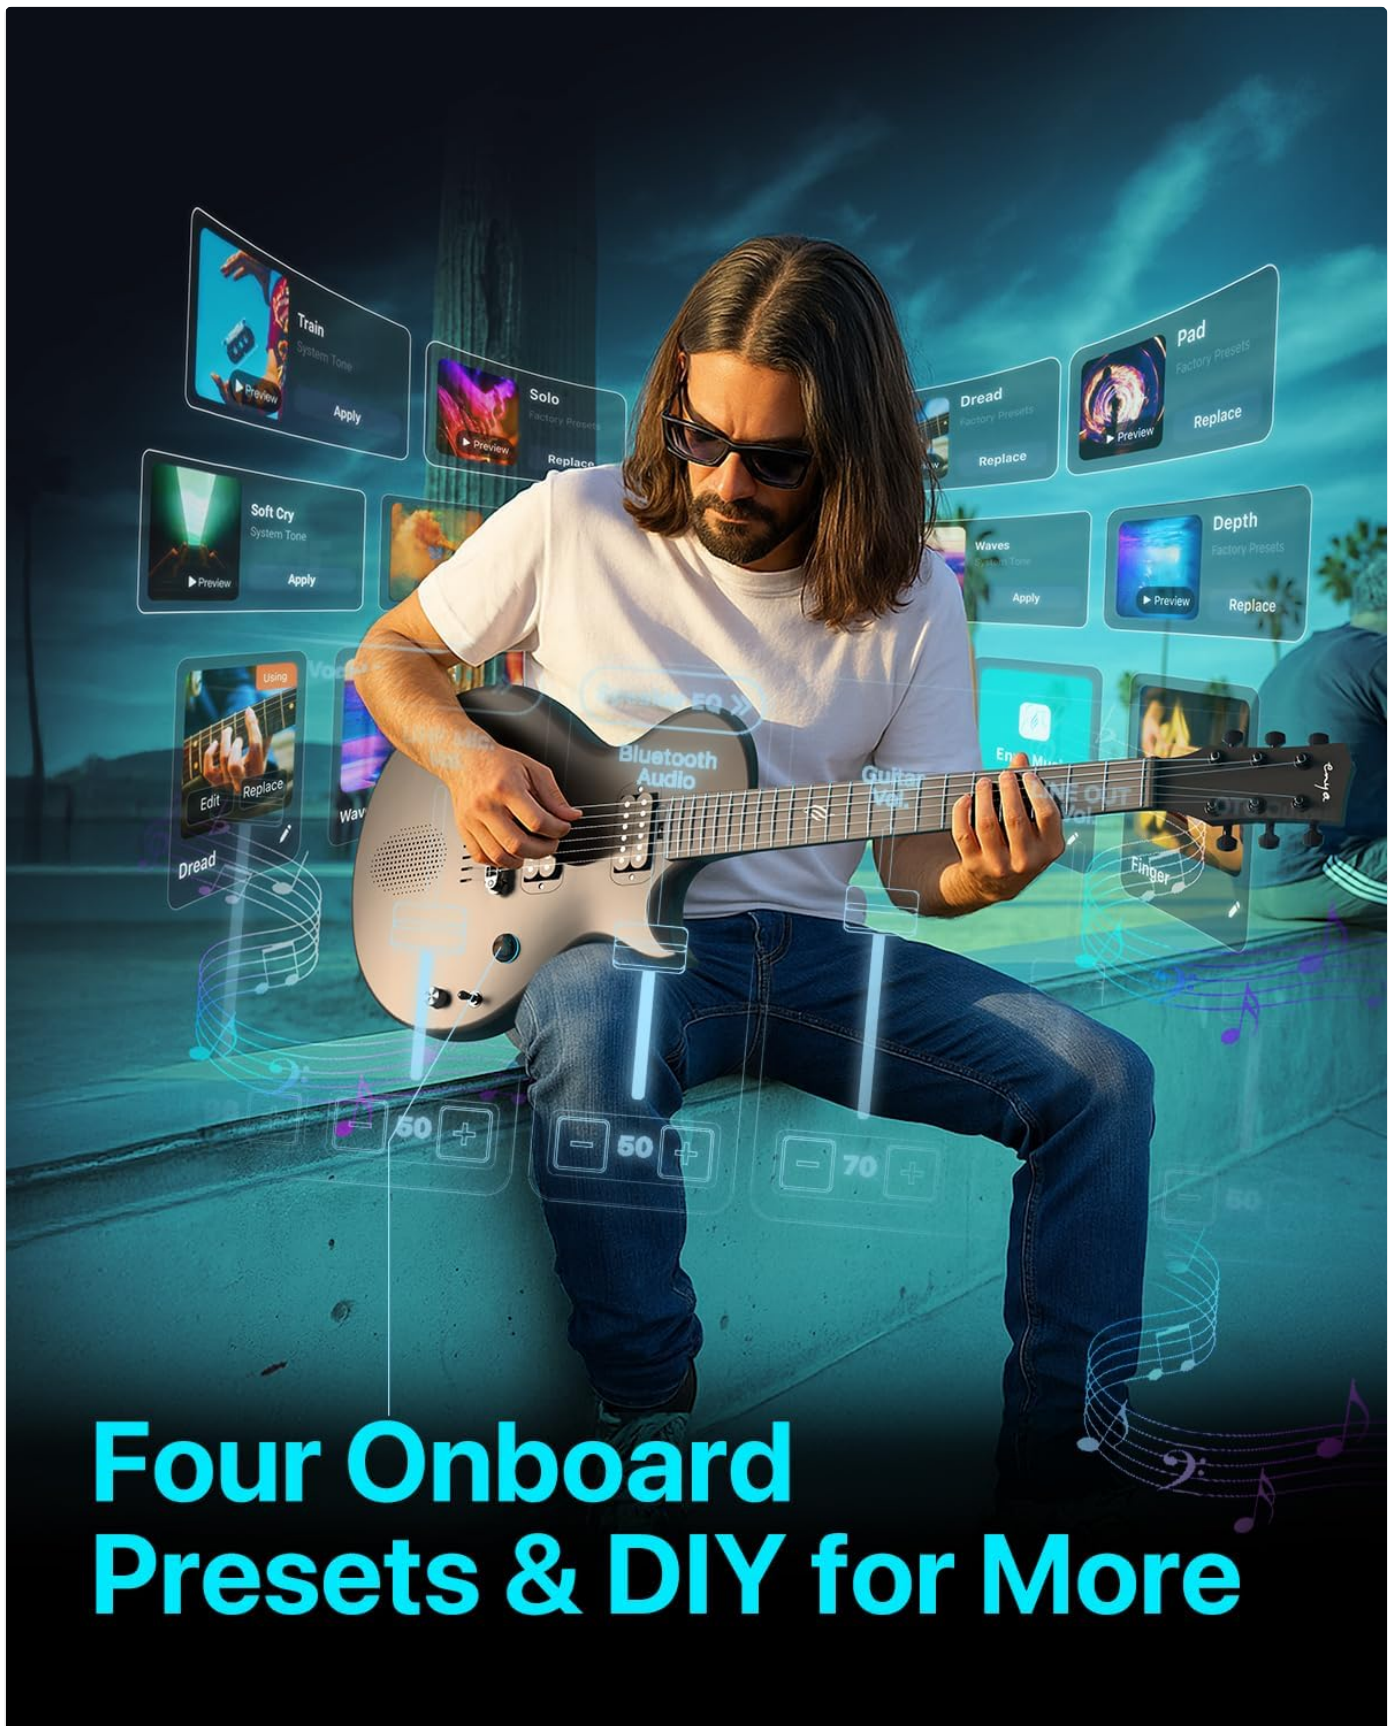

Figure 3: The integrated 10W wireless speaker on the guitar body, enabling direct sound output.

## Using Onboard Presets

The guitar comes with four onboard presets: Clean, Overdrive, Crunch, and Lead. These can be cycled through using the dedicated button on the guitar body. Each preset is fully customizable via the Enya Music App, allowing you to fine-tune your sound with virtual pedal effects such as amp models, equalizers, modulation, noise reduction, delay, and reverb. These presets are active whether using the onboard speaker or an external amplifier.

### **Pickup Configuration and Tone Control**

The Nova Go Sonic features an Alnico 2 magnet humbucker in the neck position and an Alnico 5 humbucker in the bridge position. This combination provides a versatile tonal range, from vintage warmth to powerful modern sounds. The push-pull volume knob allows for coil splitting of the neck pickup, offering a single-coil tone similar to a Stratocaster's "in-between" sounds, expanding your sonic palette.

Figure 6: The guitar's control layout, highlighting the pickups and the push-pull volume knob.

## Connectivity Options

- **Wireless Connectivity:** Connect your smart device wirelessly to the guitar to stream backing tracks through the onboard speaker, allowing you to play along with your favorite songs.
- **3.5mm Headphone Output:** For silent practice, plug headphones into the 3.5mm jack. This allows you to hear your playing and any backing tracks without disturbing others.
- **USB Type-C (OTG Recording):** The USB Type-C port serves for charging and On-The-Go (OTG) recording. You can record your guitar playing, including any effects and backing tracks, directly to an external device.

# Grab and Enjoy your OTG Practice Sessions.

### General Care and Cleaning

The Enya Nova Go Sonic is constructed from carbon fiber composite material, offering exceptional durability under various environmental conditions. To clean the guitar, wipe it down with a soft, dry cloth after each use to remove sweat and dust. For more thorough cleaning, a slightly damp cloth can be used, followed by a dry cloth. Avoid abrasive cleaners or solvents that could damage the finish.

### String Replacement

The guitar comes equipped with Nickel High Carbon strings. Replace strings regularly to maintain optimal tone and playability. When replacing strings, do so one at a time to maintain neck tension. Ensure new strings are properly seated in the zero-fret and bridge system.

Figure 8: Detail of the zero-fret, designed for consistent string height and improved intonation.

## Fretboard and Fret Care

The fretboard is made of carbon material. The frets feature a round end polishing for a smooth playing feel. Periodically inspect the frets for wear. If significant wear occurs, professional fret dressing may be required to maintain optimal playability.

## TROUBLESHOOTING

Problem	Possible Cause	Solution
String Buzz	Action too low, uneven frets, or neck relief issues.	Check neck relief and bridge height. Adjust as needed. If persistent, consult Enya Musical support for guidance.
Audio Feedback from Speaker	High volume or certain frequencies causing resonance.	Reduce the volume. In the Enya Music App, access the mixer option to decrease the overall volume or adjust specific frequencies to eliminate feedback.
Cannot Connect to Enya Music App	Bluetooth not enabled, guitar not in pairing mode, or app issues.	Ensure Bluetooth is enabled on your device. Restart the guitar and the app. Try re-pairing the device. Refer to the app's help section for specific pairing instructions.
No Sound Output	Low battery, volume turned down, or incorrect output selection.	Charge the guitar. Increase the volume knob. Ensure no headphones are plugged in if you intend to use the onboard speaker. Check cable connections if using an external amp.

## SPECIFICATIONS

Feature	Detail
Model Number	NOVA GO SONIC BK
Item Weight	10.48 pounds
Product Dimensions	38.19 x 12.8 x 4.53 inches
Body Material	Carbon Fiber
Neck Material Type	carbon
Fretboard Material	carbon
Number of Strings	6
Guitar Pickup Configuration	H-H (Humbucker-Humbucker)
Speaker Amplification Type	active
Speaker Count	1
String Material	Nickel High Carbon
Supported Software	Enya Music App
Proficiency Level	All
Hand Orientation	Right
